HEAVY HAUL INSTITUTE, DFCCIL, NOIDA

31, December 2024

MESSAGE FROM GENERAL MANAGER/TRAINING & RESEARCH

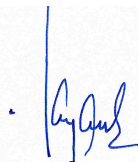

As we celebrate the culmination of this year, December has been a month filled with enriching experiences and significant milestones. Trainees had the opportunity to visit OCC, Ahmedabad through Rail Car, gaining invaluable exposure. We were honored by the visit of the ED/Works to HHI, who interacted meaningfully with our trainees. We also conducted an important sessions on POSH, while a session on trust & teamwork further enhanced their learning and professional development.

Additionally, we hosted impactful lectures, including a session on safety in general by our esteemed ex-Managing Director, Shri. Ravindra Kumar Jain, and a motivational talk by Mr. P.N. Shukla, former Director, OP&BD.

Another notable achievement was the presentation of our final application for NCVET accreditation, marking a significant step toward formalizing our efforts and raising the bar of excellence at HHI.

This year has been transformative, filled with learning, growth, and innovation. As we step into the new year, we eagerly anticipate greater opportunities and breakthroughs.

Wishing everyone a prosperous and innovative New Year!

Col. Mayank Upadhya
General Manager/Training & Research

DO YOU KNOW

- **Moravec's Paradox:** In other words, tasks that require high-level cognitive skills for humans, such as logical reasoning and creativity, are often trivial for machines, while seemingly simple tasks for humans, such as vision and motor skills, can be incredibly challenging for machines.
- **Pinnochio Paradox:** "My nose will grow longer," what will happen? If he is telling a lie, his nose should grow longer, but that would make it true, so his nose should not grow longer, but that would make it false and so on.
