2. SUBMISSION OF TENDERS:-

- 2.1 The tenders shall be submitted as per the format of DFCC enclosed herewith before or on 16 May, 2012 upto 15:00 hrs in the Office of Chief Project Manager, DFCCIL, First Floor, A- 102, Sector- 4, NOIDA (GB Nagar).
- 2.2 The tender shall be addressed to: “CHIEF PROJECT MANAGER/ DFCCIL, NOIDA” and Name of Work clearly indicated on top.
- 2.3 Tenders submitted by post shall be sent as “REGISTERED POST ACKNOWLEDGEMENT DUE” and shall be posted with due allowance for any postal delay. The tenders received after the due date and times of opening are liable to be rejected. Telegraphic offers and offers received by telex or e-mail shall not be considered.
3. Tenders shall be opened at the date and time (i.e. 16 May, 2012 at 15:30 hrs) as specified in the tender notice and any amendments thereof in the presence of such of those Tenderers or their authorized representatives who may be present in the Office of Dedicated Freight Corridor Corporation of India Ltd. at First Floor, A-102, Sector- 4, NOIDA (G B Nagar).
4. The Tenderer shall closely peruse all the clauses, specifications indicated in the Tender Documents before quoting. Should the Tenderer have any doubt about the meaning of any portion of the Tender specifications or find discrepancies/omissions in the tender documents issued or shall require clarification on any of the technical aspects, Scope of Work etc., he shall at once contact the authority inviting the tender for clarification at least seven days before the due date of submission of the tender.
5. After award of contract to the successful Tenderer, if it is observed that there is any discrepancy or confusion about any specifications or interpretation of any item, the

interpretation of specifications shall be finalized by the Bridge Designer/ Engineer based on the functional and aesthetic requirements of overall design of bridge and will be approved by DFCC.

6. Before Tendering, the Tenderers are advised to inspect the site of work and the environments and be acquainted with the actual working and other prevalent conditions, facilities available, position of material and labour. No claim will be entertained later on grounds of lack of knowledge.
7. The Tenderers should quote for all the items in the Tender schedule. The rates should be quoted in English Language and International numerals. These rates shall be entered in figures as well as in words. In case of difference in rates between words and figures, rates mentioned in words shall be treated as valid rate. For the purpose of tender, the metric system of units shall be used. In case of absence of rates in figure or words, the tender will be rejected.
8. All entries in the tender shall be written in ink. Erasers and over writing are not permitted. All cancellations and insertions shall be duly attested and signed by the Tenderers.
9. Lay out plans & other key plans are available in the office of DyCPM/NOIDA for the guidance of the Tenderers.
10. **BID SECURITY(EARNEST MONEY DEPOSIT)**
Every tender must be accompanied by the prescribed amount of Bid Security/Earnest Money Deposit of **Rs.13,58,008/-** in the form of Demand Draft/ Bankers cheque issued by any nationalized /scheduled bank of India in favour of **Dedicated Freight Corridor Corporation of India Ltd** payable at New Delhi.

10.1 The earnest money shall be valid for **28 days beyond the original validity period of the tender i.e. 120 days or beyond any period of extension** , if requested.
11. Tenders received **without Bid Security/Earnest Money in full** in the manner prescribed above shall be summarily rejected.
11.1 The Bid Security/Earnest Money Deposit of the successful Tenderer, will be retained towards part of Retention Money/Security Deposit.
12. In case of unsuccessful Tenderers, the Bid Security/Earnest Money will be refunded to them after finalization / award of the tender.
12.1 Dedicated Freight Corridor Corporation of India Ltd. reserves the right of **forfeiture of Bid Security(Earnest Money Deposit)** in case the successful Tenderers:
 - a) After opening of Tender, revoke/withdraws his tender within the validity period or revises/alters his earlier quoted rates/conditions.
 - b) Fails to submit the Performance Security (Contract Performance Guarantee) as specified in General Conditions of Contract.
 - c) Fails to start work as may be indicated in the Letter of Acceptance.

The forfeiture of Bid Security/Earnest Money Deposit shall also be applicable if the work is terminated at any stage as per the General Conditions of Contract.

13. **AUTHORISATION AND ATTESTATION:**

Tenders shall be signed by the person duly authorized /empowered to do so. Certified copies of such authority (Power of Attorney) and relevant documents shall be submitted alongwith the tenders.

14. **VALIDITY OF OFFER**

The offer shall be kept open for acceptance for a minimum period of **120 days from the date of opening of tenders**. In case Dedicated Freight Corridor Corporation of India Ltd., calls for negotiations, such negotiations shall not amount to cancellation or withdrawal of the Original offer which shall be binding on the Tenderers.

15. **EXECUTION OF CONTRACT**

The successful Tenderers" responsibility under this contract commences from the date of issue of Letter to Proceed/Letter of Acceptance by Dedicated Freight Corridor Corporation of India Ltd. The successful Tenderer shall be required to execute an agreement in the prescribed Proforma enclosed herewith with the Dedicated Freight Corridor Corporation of India Ltd. within two weeks of acceptance of his tender.

16. **PERFORMANCE SECURITY**

The procedure for obtaining Performance Guarantee is outlined below:

- (a)The successful bidder shall have to submit a Performance Guarantee (PG) within 30 (thirty) days from the date of issue of Letter of Acceptance (LOA). Extension of time for submission of PG beyond 30 (thirty) days and upto 60 days from the date of issue of LOA may be given by the Authority who is competent to sign the contract agreement. However, a penal interest of 15% per annum shall be charged for the delay beyond 30 (thirty) days i.e. from 31st day after the date of issue of LOA. In case the contractor fails to submit the requisite PG even after 60 days from the date of issue of LOA, the contract shall be terminated duly forfeiting EMD and other dues, if any payable against that contract. The failed contractor shall be debarred from participating in re-tender for that work.
- (b)The successful bidder shall submit the Performance Guarantee (PG) in the form of irrevocable bank guarantee , amounting to 5% of the contract value:
Also, FDR in favour of DFCCIL, New Delhi may be accepted.
- (c)The Performance Guarantee shall be submitted by the successful bidder after the Letter of Acceptance (LOA) has been issued, but before signing of the contract agreement. This P.G. shall be initially valid upto the stipulated date of completion plus 60 days beyond that. In case, the time for completion of work gets extended, the contractor shall get the validity of P.G. extended to cover such extended time for completion of work plus 60 days.
- (d)The value of PG to be submitted by the contractor will not change for variation upto 25% (either increase or decrease). In case during the course of execution, value of

the contract increased by more than 25% of the original contract value, an additional Performance Guarantee amounting to 5% (five percent) for the excess value over the original contract value shall be deposited by the contractor.”

- (e) The Performance Guarantee (PG) shall be released after physical completion of the work based on „Completion Certificate” issued by the competent authority stating that the contractor has completed the work in all respects satisfactorily. The Security Deposit shall, however, be released only after expiry of the maintenance period and after passing the final bill based on „No Claim Certificate” from the contractor.
- (f) Whenever the contract is rescinded, the Security Deposit shall be forfeited and the Performance Guarantee shall be encashed. The balance work shall be got done independently without risk & cost of the failed contractor. The failed contractor shall be debarred from participating in the tender for executing the balance work. If the failed contractor is a JV or a Partnership firm, then every member/partner of such a firm shall be debarred from participating in the tender for the balance work in his/her individual capacity or as a partner of any other JV/partnership firm.
- (g) The engineer shall not make a claim under the Performance Guarantee except for amounts to which the DFCCIL is entitled under the contract (not withstanding and/or without prejudice to any other provision in the contract agreement) in the event of:
- (i) Failure by the contractor to extend the validity of the Performance Guarantee as described herein above, in which event the Engineer may claim the full amount of the Performance Guarantee.
- (ii) Failure by the contractor to pay DFCCIL any amount due, either as agreed by the contractor or determined under any of the Clauses/Conditions of the Agreement, within 30 days of the service of notice to this effect by Engineer.
- (iii) The Contract being determined for rescinded under provision of the GCC, the Performance Guarantee shall be forfeited in full and shall be absolutely at the disposal of the DFCCIL.

17. **SECURITY DEPOSIT**

The Bid security(EMD) deposited by the successful contractor with the tender will be retained by employer as part of security of the due and faithful fulfillment of the contract by the contractor and in addition, 10% will be deducted from On-Account bills progressively so that overall retained security deposit is **5% of the contract value including Bid security(EMD)**.

18. REJECTION OF TENDER AND OTHER CONDITIONS:-

- 18.1 The acceptance of tender will rest with Dedicated Freight Corridor Corporation of India Ltd. which does not bind itself to accept the lowest tender or any tender and reserves to itself full rights to reject any or all the tenders without assigning any reason whatsoever.
- 18.2 Conditional tenders, incomplete tenders or otherwise considered defective and not in accordance with the tender conditions, specifications etc. are liable to be rejected.

- 18.3 If the Tenderer deliberately gives wrong information in his tender DFCC reserves the right to reject such tender at any stage or to cancel the contract, if awarded and forfeit the Bid Security(Earnest Money)/Security Deposit/ Performance Security/any other moneys due.
- 18.4 Canvassing in any form in connection with the tender is strictly prohibited and the tenders submitted by the Contractor who resorts to canvassing are liable to be rejected.
- 18.5 Should a Tenderer or Contractor or in the case of a firm or Company of Contractors/one or more of its Partners /Share holders/ Directors have a relation or relations employed in DFCC , the authority inviting the tender shall be informed to the fact along with the offer, failing this, DFCC may at its sole discretion reject the tender or cancel the contract and forfeit the Bid security(Earnest Money)/Security Deposit.

19. **OTHER CONDITIONS**

.19.1 The Contractor, shall during the course of execution , prepare and keep updated a complete set of “as built “ drawings to show each and every change from the contract drawings. No changes shall be done unless approved by the DFCC. Four copies of “as built“ drawings shall be submitted to DFCC by the Contractor on completion of works along with the Final Bill.

19.2 Successful Tenderer may have to supply working drawings based on overall plans and designs supplied by DFCC. For submission of these drawings, if case arises, the contractor shall be given seven days penalty free extra time for submission of drawings. However, if more time is required. beyond 7 days, the permission of competent authority of DFCC shall be required.

19.3 Mode of Supervision/Monitoring by DFCC: DFCC shall supervise the work through its architect and/or nominated Engineer at site.

20.0 **Scope of works:** The successful tenderer has to carryout the following works:

- (i) Construction of boundary wall for Corporate office & Regional Headquarter in Jhatta village and Dadri Yard in Gulistanpur village by making pillars and fixing precast concrete panels between pillars as per approved drawings and specifications.
- (ii) Construction of barbed wire fencing of the acquired land along the DFCC alignment except the area of Regional Headquarter in Jhatta village and Dadri Yard in Gulistanpur village as per approved drawing & specifications.
- (iii) Construction of service road as per approved drawing & specifications.
- (iv) Construction of two Inspection Huts as per approved drawing.
- (v) Construction & Commissioning of Tube Wells as per estimate.
- (vi) Supply, Installation & Commissioning of two Diesel Generator sets 5 KVA.
- (vii) Taking electric connections from local power supply authority, at Inspection Huts.

- (viii) Providing and installing retro-reflective signboards with aluminium sheets and synthetic enamel painted signboards with iron sheets.
- (ix) Other civil engineering works as per instructions of Engineer-in-charge.

21.0 ON ACCOUNT PAYMENT

The contractor shall be entitled to be paid from time to time by way of "On Account" bills, only for such Works, as in the opinion of the Engineer, the contractor has executed in terms of the Contract.

The Contractor shall submit the On-Account bills, by the date stipulated by the Engineer, in the prescribed proforma, supported with measurements.

After preliminary scrutiny and certification by the Engineer, payment of the certified amount shall be made by the Employer. The amount certified shall account for all deductions, including statutory deductions, recoveries for advances and any amounts due from the contractor.

Such payments made by the Employer, shall not constitute any acceptance of the measurements or bill of quantities by the Employer and the Employer shall have the right to alter, modify, reduce or diminish the quantities or classification entered in the Measurement Books or Bills. The Employer shall have the right to recover any amount paid in the earlier bill from any subsequent bill and should the amount to be recovered be more than the amount of the subsequent bill, the Contractor shall on demand from the Engineer or Employer immediately refund the extra amount to the Employer within 3 days, failing which he shall have to pay interest @ 12% per annum till the said extra amount is paid back by him.

22.0 Defect Liability Period

The contractor shall remove any defect due to quality of work **upto a period of six months** after completion of work.

23.0 Minimum eligibility criteria for the work is as under:

- 1) The tenderer should have completed Precast concrete works with Government/ Semi Government/ Big Corporate Organization.

As a proof of technical experience /competence, the tenderer should have **physically** completed successfully at least **one similar single work for a minimum value of 35 % of advertised tender value**, in last Three financial years (i.e current year and three previous years) up to the date of opening of the tender."

- 2) The tenderer should have received **total contract amount** for works with Government/ Semi Government/ Big Corporate Organization during last three financial years and up to date of opening in the current year as per latest audited books of accounts of a **minimum value of 150% of advertised cost of work**. A certificate from Chartered Accountant needs to be enclosed.

***"Similar work means Civil Engg. Building work."**

- (3) No JV firms are allowed to participate in the tenders of value less than Rs 25 crores.
- (4) New joint ventures will not be permitted. Only such joint ventures who satisfy the above criteria as JV for the works undertaken in the past will be considered.

(5) Tenderers must submit the documents/certificates in support of information submitted against para 23.0 (1,2) failing which his/their offer may be rejected without any correspondence with the tenderers at the sole discretion of DFCCIL. All the documents/certificates of the completed works should be from Govt. organization/ Indian Railways /PSUs /Public/ Private Ltd. Companies. The completed work should be available for inspection by DFCC. DFCC may hold discussion with senior management of the undertakings for whom the work has been undertaken.

The certificates from private individuals for whom such works are executed/being executed shall not be accepted.

NOTE:

The Tenderers using tender documents purchased from office / downloaded from the DFCC website www.dfcc.in or www.dfccil.org are required to keep visiting the website to download corrigendums, which may be issued from time to time. The final offer shall include all corrigendums otherwise the offer shall be liable to be rejected. No separate communication will be made with the tenderers who download tender documents from website.

Dedicated Freight Corridor Corporation of India Ltd.

SECTION – IV

SPECIAL CONDITIONS OF CONTRACT.

A. GENERAL

1. The Tenderer shall visit the site and shall satisfy himself as to conditions under which the work is to be performed. He shall also check, ascertain the locations of any existing structures or equipment or any other situation which may affect the work. No extra claim as a consequence of ignorance or on ground of insufficient description will be allowed at a later date.
2. The price of items includes all accessories, consumables etc. as required to make the item complete in all respects, compatible with other related/associated items and fully functional.
3. Contractor shall be fully responsible for any error, difficulty in execution/damage incurred owing to discrepancy in drawings which has been overlooked by him. However, the several documents forming the contract are to be taken as mutually explanatory of one another, detailed drawing being followed in preference to small scale drawing and figured dimensions in preference to scaled dimensions.

In the case of discrepancy between schedules of quantities, the specifications and/or the drawings, the following order of preference shall be observed:

- i. Description in the Schedule of Items, Rates and Quantities (BOQ)
- ii. Drawings.
- iii. Technical Specifications.

If there are varying or conflicting provisions made in any one document forming part of the contract, the accepting authority or the Employer shall be the deciding authority with regard to the intention of the document. Any error in decision, quantity or rate in Schedule of Quantities or any omission therefrom shall not vitiate the contract or release the contractor from the execution of the whole or any part of the work comprised therein according to drawing and specification or from any of his obligations under the contract.

4. For each item of BOQ, normally brands/makes are mentioned in the tender document. However, DFCC reserves the right to substitute any mentioned brand/make. Also, the material will be used only after approval of DFCC for which contractor shall maintain proper records. Based on quantity and site

requirement, DFCC can go for a different brand/make for which no extra rate shall be paid to the contractor.

5. LAND FOR CONTRACTORS ESTABLISHMENT

For the purpose of construction of Contractor's store yard, godowns, site office etc, the contractors may utilize with the permission of the Employer/Architect, portion and/or space belonging to the Employer if available, at such location as would not interfere with the execution of the work. The contractor shall for this purpose submit to the Employer for his approval a plan or plans of the proposed layouts for the site facilities. The Employer/Architect reserve the right to modify the contractor's proposal as he may deem fit.

6. CONTRACTOR'S GENERAL RESPONSIBILITIES:

6.1 The Contractor shall execute and maintain the works with due care and diligence and shall provide all materials, labour including supervision thereof, constructional payment, temporary works, transport and all other things, whether of temporary or permanent nature, required for the proper execution and maintenance of the works.

6.2 The Contractor shall execute the whole and every part of the work, in the most substantial and workmanlike manner, both as regards materials and labour and in every respect in strict accordance with the contract documents. The Contractor shall conform exactly, fully and faithfully to the designs, drawings, and instructions relating to the works.

6.3 Before commencing any item of work, the Contractor shall correlate all relevant drawings and information and satisfy himself that the information available thereof is complete, unambiguous and without any discrepancies. The Contractor shall be responsible for any errors in the execution of the works and/or his sub contractor and/of the specialist agency to which has been assigned is not brought to the notice of the DFCC.

6.4 Levels, dimensions and other information shown on the drawings are believed to be correct. The contractor shall however, verify them for himself and no claim of allowance whatsoever shall be entertained on account of any errors or omissions in the levels, dimensions etc. from those shown in the drawings.

6.5 The Contractor shall pay, in full, all the third party suppliers and sub-contractors the amounts due in respect of the purchases of goods and services made of the works and shall on demand from the DFCC provide evidence of such payments. It is clarified the DFCC is not responsible to the third party suppliers and/or sub contractor for the payment of any dues.

6.6 TECHNICAL EXAMINATIONS: The proposed work covered under this tender during its progress is subject to inspection by the Chief Technical Examiner/ Technical examiner, Central Vigilance Commission, Govt. of India or by an officer of the Vigilance cell of the Employer. The contractor will be required to extend all assistance and facilities for each inspection.

6.7 GUARANTEE: Wherever a provision for submission of a guarantee has been advised, the same shall be submitted from the specialized agency along with a counter guarantee by the main contractor engaged for the work. The guarantee shall be furnished on a non-judicial stamp paper of appropriate value. If the contractor is required to submit guarantee/guarantees for any item/items for a period of more than 12 months, the guarantee/guarantees in case of these items shall remain valid even after expiry of the defect liability period of 6 months as stipulated.

6.8 INSURANCE FOR WORKS: (In pursuance of GCC clause 6.0) The contractor at the time of signing the contract or before commencing the execution of work, without limiting his obligations and responsibilities shall insure the work at his own cost and keep them **insured till defect liability period** of the contract with a nationalized insurance company in the joint names of the Employer and the Contractor (the name of the former being placed first in the policy) for the full amount of the contract. Such policy shall also cover the property of the employees.

The contractor shall deposit the policy and receipt for the premiums with the employer within seven (7) days, from the date of signing of the contract/ commencement of the execution of the work or unless otherwise instructed by the employer. In default of the contractor insuring as provided above, the employer on his behalf may so insure and may deduct the premiums paid from any moneys due or which may become due to the contractor. The contractor shall as soon as any claim under the policy is settled on the work reinstated by the Insurance office should elect to do so, proceed with all due diligence with the completion of the works in the same manner as through the misfortune/accident has not occurred and in all respect under the same condition of the contract. The contractor in case of rebuilding or reimbursement after accident shall be entitled to such extension of time for completion, as the employer deems fit.

6.9 WATER: The rates quoted by the contractor shall include all expenditure for providing all the water for the full contract period required for the work, including that for the work people and all staff on the site. He shall make his own arrangement for the supply of good quality water. He shall obtain municipal connection. And all charges for the connection & consumption shall be borne by him. If municipal water is not available or inadequate, he shall make other arrangements like sinking tube wells, or making bore wells or transport from outside by tanker or any other suitable means entirely at his own and no separate payment for the same shall be made.

6.10 POWER: The contractor shall at his own cost arrange for necessary power connection and lighting for the entire period of contract. If, however, separable power is available in the premises, the contractor shall make his own arrangements to obtain necessary connections, maintain efficient services of electric lights and power and shall pay for all the requisite charges for the same. The employer, as well as the consultant shall give the recommendations necessary to obtain power and water connections from the concerned authorities, but the responsibilities for obtaining the same shall rest with the contractor.

If any other contractor, appointed by the employer, is required to use water and power, he shall be allowed to use the same and make temporary connections from the supply

arranged by the main contractor at rates, terms and conditions that may be decided by the Employer/Consultant.

6.11 FIRST-AID FACILITIES: The contractor shall at his own expense arrange to ensure availability of medical attendance promptly when necessary. He shall provide properly equipped first-aid station, in charge of qualified person at suitable location within easy reach of the workmen and staff. The contractor shall also provide for transport of serious cases to the nearest hospital. The contractor shall be responsible for any liability which may be excluded from the insurance policies referred in above mentioned clause and also for all other damages to any person, animal or property arising out of or incidental to the negligence or defective carrying out of this contract. He shall also indemnify the Employer in respect of any cost, charges or expenses arising out of any claims or proceedings and also in respect of any award of compensation and damages arising there from. The Employer shall with the concurrence of the consultant be entitled to deduct the amount of any damages, compensation, cost, charges and expenses arising from or occurring from or in respect of any such claim or damages from any or all sums due to or become to the contractor without prejudice to the employer's rights in respect thereof.

6.12: FIRE EXTINGUISHERS The contractor shall at his own expenses provide at suitable, prominent and easily accessible places, requisite number of fire extinguishers buckets – some filled with sand and some with water.

7. MANUFACTURERS' DESIGN & CATALOGUES:

7.1 For the items of works which are executed to the manufacturers' designs and specifications, the Contractor shall allow in his tender for providing DFCC with 3 copies of all designs, drawings and specifications, general arrangements drawings(GAD) and shop drawings which he may be called upon to submit.

7.2 The Contractor shall supply 3 copies of manufacturer's catalogues, brochures of all equipment and proprietary articles specified or which the Contractor proposes to use for the approval by the DFCC as soon as is reasonably practicable.

8. CONTRACTOR'S SUPERVISION:

8.1 The contractor shall provide all necessary supervision during the execution of the works and the guarantee period for the proper fulfillment of the Contractor's obligations under the contract document.

8.2 The Contractor shall employ for the execution of the works- such technical persons as are qualified and experienced and such representatives, Foremen and supervisory staff as are competent to supervise the works and in the course of any operations carried out by him for the purpose of completing any outstanding work or rectification of defects during the Guarantee Period.

8.3 The supervisors deployed can be demobilized on instructions of DFCC, if not found fit for the job.

8.4 Any material rejected by DFCC shall be removed from premises within 24 hours by the contractor at his own cost.

9. CO-OPERATION AND INTERFACE WITH OTHER CONTRACTORS:

- 9.1 The Contractor shall co-operate and interface with other Contractors and consulting agencies and freely exchange with them such technical information as necessary for the proper execution of the work.
- 9.2 The Contractor shall afford all reasonable opportunities to other Contractors, their workmen and to the workmen of DFCC for carrying out their works.
- 9.3 All operations necessary for the execution of works shall be carried out so as not to interfere unnecessarily with the execution of works by other.
Contractors execution of works under this contract shall be coordinated with the works of other contractors where it would interfere with their works or working. The DFCC and the concerned Contractor shall be informed well in time for effective coordination and proper execution of works.

10. CO-ORDINATION OF WORK:

- 10.1 At the commencement of work, and from time to time, the Contractor shall interface with other Contractors, sub-contractors, persons engaged on separate contracts in connection with the works, and with the DFCC for the purpose of coordination and execution of the various phases of works. The Contractor shall ascertain from the other Contractors, sub-contractors and persons engaged in separate contracts in connection with the works the extent of all chasing, cutting and forming of all opening, holes, groves etc., as may be required to accommodate the various services.
- 10.2 The Contractor shall ascertain the routes of all services and the position of all floors and wall outlets, traps etc., in connection with the installation of plant. services and arrange for the construction of work accordingly. The breaking and cutting of the completed work must not be done unless specifically authorized in writing by the DFCC. Generally, all breaking shall be by the Contractor for civil works and no work shall be done over broken or patched work without first ascertaining that the broken surface is adequately prepared and reinforced to receive and hold further work.
- 10.3 The contractor shall protect and preserve the works from all damages or accidents.
- 10.4 The contractor shall properly clean the work as it progresses and shall remove all rubbish and debris from the site from time to time as is necessary and as directed. On completion, the contractor shall ensure that the premises and/or site are cleaned, surplus materials, debris, sheds etc. removed, all fixtures cleared and polished wherever necessary, all appliances commissioned so that the whole installation is left fit for immediate occupation or use and to the satisfaction of the Employer.

11. PROGRAMME/PROGRESS EVALUATION AND REVIEW:

- 11.1 Network based integrated time schedule shall be submitted by the contractor. The time schedule shall include details of mobilization of resources, materials, equipment and labour. After the award of contract, the DFCC shall require the Contractor to expand the information given in the programme, until it is suitable for the effective review of progress during the execution of the works. The critical path shall be determined. The Contractor has to submit a time schedule that has to be duly approved by the DFCC and is available prior to the commencement of the works.
- 11.2 The Contractor shall every week, review and update this programme and furnish for the information to the DFCC, in writing, details of the Contractor's arrangement for executing the works, materials procured, erected, balance at site and expected deliveries the next

week, skilled/unskilled labour, foremen, supervisors working at site and steps proposed for speeding up progress of work. A progress report, in writing, comparing the actual work to the completion schedule should be provided to the DFCC on a weekly basis.

11.3 If, at any time it appears to DFCC, that the progress of the work does not conform to the approved programme, the Contractor shall furnish a revised programme and take such steps at his cost, as are necessary to expedite progress and ensure completion of works within the completion period or extended date of completion.

11.4 Approval by DFCC of such programme or the furnishing of such particulars shall not relieve the Contractor of any of his duties or responsibilities under the contract documents.

11.5 The Contractor shall be called upon to attend co-ordination meetings with DFCC, and shall fully cooperate with persons and agencies involved in these discussions. The Contractor shall take notes of the discussions during the meeting and shall strictly adhere to the decisions of DFCC in performing the works.

11.6 The Employer shall have the right to take possession of or use any completed or partially completed part of work. Such possession or use will not be an acceptance of any work not completed in accordance with the contract agreement.

12. QUALITY OF MATERIALS AND WORKMANSHIP: All materials and workmanship shall be the best of the respective kinds described in the Contract and in accordance with the instructions and directions of the DFCC and shall be subjected from time to time, to such test as the DFCC may direct at the place of manufacture or fabrication or on the site or at such other places as may be directed. The Contractor shall execute the whole and every parts of the works in the substantial and workmen like manner, both as regards materials and workmanship, and in every respect in strict accordance with the contract documents and in compliance with the applicable government laws, governmental laws, ordinance, statutes, codes, rules and regulations. The Contractor shall also conform exactly and faithfully to the designs, drawings and instructions in writing of the DFCC.

13. QUALITY CONTROL: The contractor shall submit to the DFCC a comprehensive quality approval plan for all materials, equipments and things to be provided under the contract. No material or equipment shall be dispatched by the manufacture or vendor or brought to site by the Contractor until the quality of the material or equipment has been established through inspection and tests or through test certificates furnished by the manufacturer. In case the DFCC accepts such test certificates as sufficient proof that the material or equipment conforms to the contract document, he shall accord his approval for the dispatch of materials or equipment.

14. STANDARD OF WORKMANSHIP: To determine the acceptance standard of workmanship, the DFCC may require the Contractor to execute certain proportions of works and services under his close supervision. On approval of such samples of work, the same shall be termed as guiding samples. Work shall be executed to conform to the standard of workmanship of these samples.

15. INSPECTION OF WORKS:

15.1 The DFCC or any person authorized by them shall at all times access to the works and to all workshops and places where work is being prepared or from where materials or

equipments are being obtained for the works and the contractor shall assure and make available every facility and assistance in obtaining the right to access at his own cost.

15.2 All works embracing more than one process shall be subject to examination and approval at each stage thereof and the Contractor shall give due notice to the DFCC when such each stage is ready.

16. **ADHERENCE TO TIME SCHEDULE:** Timely completion of work is the essence of the contract.

17. **WITHHOLDING OF PAYMENTS:** DFCC may withhold or on account of subsequently discovered evidence, nullify the whole or part of any certificate to such extent as may be necessary to protect DFCC from loss on account of:

(a) Defective work not remedied.

(b) Failure of the contractor to make payments properly to sub-contractors for materials or equipments or labor.

(c) Damage to works of another Contractor or Sub-Contractor.

(d) A reasonable doubt that the contractor is unlikely to complete the contract for the balance amount unpaid.

(e) A reasonable doubt that the contractor intends to leave the work incomplete.

(f) Delay the work at site.

18. In no event shall the contractor be entitled to collect any additional fees or further payments for general condition, administrative or overhead costs or expenses or profit in connection with any change in the works. No change in the works, whether by way of alteration or addition to the works shall be carried out unless the authorization is received. No course of conduct or dealings between the parties, nor expenses or implied acceptance of alterations or additions to the work and no claim that DFCC has been unjustly enriched by any alteration or addition to the work whether or not there is in fact any such unjust enrichment, shall be the basis for any claim to an increase in the contract sum or extend the completion date.

19. The work as detailed in this Tender shall be executed and completed in all respects in accordance with the Tender document, Instructions to Tenderers, Bill of Quantities, General & Special Condition Of The Contract, technical specifications, Schedules and Drawings to the satisfaction of DFCC.

20. DFCC does not bind itself to accept the lowest tender and reserves the right to reject any or all the tenders without assigning any reasons whatsoever.

21. Codes and specifications.

21.1 The execution of work shall be carried out in terms of specifications of latest editions of IRS (Indian Railways Standard), IRC (Indian Roads Congress) and BIS (Bureau of Indian Standards).

(i) The specifications mentioned in Special conditions relating to Site Data and Specifications shall be primarily governing.

(ii) Where there is conflict between IRC & BIS Specifications, IRC specifications

shall prevail.

- (iii) Where there is no provision of specifications in IRS, the IRC conditions shall be referred to and followed.
- (iv) For items not covered in BIS/IRC specifications, BS-5400 (all parts) shall be referred to and followed.
- v) Any difference of opinion between Engineer and contractor shall be referred to Engineer-in-charge.
- vi) The appeal against decision of Engineer-in-charge shall lie with GM/Co/WC/DFCC
- (vii) The decision of GM/Co/WC/DFCC of the project shall be final and binding in the interpretation of the clause of the codes and specifications under the Special Conditions relating to Site Data and Specifications of this tender document and no claim whatsoever shall be entertained on this account by DFCCIL.
- (viii) Items under this scope shall be deemed to be "excepted matters".

21.2 Apart from the basic data, specifications etc. all items of works shall be governed by the following codes as revised/corrected/amended upto the time of submission of the tender/negotiated rates for acceptance.

- (i) DFCCIL Engg. Deptt General Conditions of Contract (enclosed).
- (ii) Northern Railway Engg. Deptt. Unified Standard Schedule of Rates, 2010.
- (iii) Northern Railway Engg. Deptt. Unified Standard Specifications for material and works, 2010.
- (iv) I.S. Code of practice for plain and reinforced concrete for general building
- (v) I.S. Code of practice for use of structural steel in general building construction (IS-800-1984).
- (vi) IRS code of practice for plain concrete construction – 1982.
- (vii) IS code of practice for electric welding of mild steel structure IS-226-1969, IS- 814-1974, IS-816-1989, IS-823-1964 and IS-6227-1971.latest edition
- (viii) Indian Railway code of practice of plain/reinforced and pre-stressed concrete for general bridge construction (concrete bridge code) adopted in 1936, revised and 1997 second revision and all latest correction slips, including supplemental measures as given in Annexure–3 as incorporated in correction slip No. 20 dated 20.03.1989.
- (ix) I.S. specification for fine and coarse aggregate from natural sources for concrete IS-383-1970 and IS-515 & 516-1959 latest with upto date correction slips.
- (x) I.S. Code 875-1987 all parts, of practice for structural safety of building and loading.
- (xi) IS-1893-1984 Criteria for earth quake resistant design of structures
- (xii) IS-1905-1987 code of practice for structural safety of building masonry walls.
- (xiii) IS-1964-1966 (latest edition), code of practice for structural safety of building foundations
- (xiv) Steel tubes for structural purposes shall conform to specifications laid down in IS-1611-1968 (latest edition).
- (xv) Indian Railway schedule of dimensions with latest edition..
- (xvi) I.S. Specifications for medium quality galvanized mild steel continuous welded cables conforming to IS-1239-1979. (Latest edition)
- (xvii) Other approved drawings and latest relevant IRC, IRS and ISI codes of practice.

- (xviii) IS: 226-1975 specifications for structural steel latest edition
- (xix) IS: 2720 (Pt. VIII)-1974 and all parts latest revision with upto date correction slips for IS method on testing of soil
- (xx) IS: 3764-1992 code for safety for excavation work.
- (xxi) IS Code 13415-1992 Code for safety for protective barriers.
- (xxii) IS: 13416 -1992 Code for preventive measures at work place.
- (xxiii) IS: 3558-1983 Code for use of vibrator
- (xxiv) IS 7861 Part I & II Code for extreme weather concreting
- (xxv) IS 12468:1988 Code for general requirement for vibrators for mass concreting
- (xxvi) IS 9013 -1978 Code for method for making curing and determining compressor strength of concrete test.
- (xxvii) IS: 516 - 1959 Code for test of concrete
- (xxviii) IS: 2430:1986 Code for sampling of aggregate for concrete
- (xxix) IS 4634:1968 Code for testing performance of batch type concrete mixer.
- (xxx) IS: 2386-1983 all relevant parts (Code for testing aggregate for concrete).
- (xxxi) IS: 7320-1974 Code for concrete slump test.
- (xxxii) IS: 9103-1999 Code for admixtures for concrete.
- (xxxiii) IS: 10790 (all relevant parts), Code for sampling of steel for reinforcement concrete (RCC)
- (xxxiv) IS 432 1982 (Part I & II) Code for mild steel for RCC.
- (xxxv) IS: 1786-1985: Code for HYSD steel bars for RCC
- (xxxvi) Indian Railway Bridge Rules, specifying the loads for design of super structures and sub structures of bridge including chapter VII for the rule for the opening of railway, adopted in 1941-revised August, 1982 incorporating upto date correction slips including RDSO letter No. CBs/PBR/RCS dated 31.12.87 (hereinafter referred to as the bridge rules)
- (xxxvii) Indian Railway standard (IRS) bridge sub structures and foundation code of practice for the design of the sub structures and foundation of bridge adopted 1936 revised – 1985 (hereinafter referred to as sub-structure Code) with upto date correction slips.
- (xxxviii) MOST guidelines for construction of bridges.
- (xxxix) IS: 2911 Pile foundations with latest amendments.
- (xxxx) Various Circulars, joint procedural orders related to safety during construction near railway track.

Note:

- (a) Latest edition including correction slips, as on date of submission of tender/negotiated rates shall govern.
- (b) The list given above is by no means exhaustive. All I.S. codes pertaining to work shall be applicable.
- (c) Contractor must have one copy of each relevant code at site as applicable & should hand over to site engineer of DFCCIL after completion of work.

B. MATERIAL

1. Cement.

1.1 Ordinary Portland cement grade-43 conforming to IS-8112 or high strength ordinary Portland cement grade-53 conforming to relevant IS code IS-12269 capable of achieving the required design concrete strength shall only be used. Payment shall be made under

relevant NS item.

1.2 Supply for cement by contractor at the rate of relevant item will be governed by the following conditions.

(a) Cement for use in works shall be procured by the contractor from the main producers or their authorized dealers only.

(b) Cement **older than 3 months** from the date of manufacture as marked on the bags shall **not be accepted**. Cement bags packing should bear the following marking:-

i) Manufacturer's name

ii) Regd. trade mark of manufacturer

(iii) Type of cement.

iv) Weight of each bag in Kg or no. of bags/ tonnes.

v) Date of manufacture generally marked as week of the year/year of manufacture.

(c) Quality test certificate for cement as per IS 4031 shall be furnished by the contractor/s at his own cost from the manufacturer, before use of cement.

1.3 DFCCIL may also take samples during the course of execution of works and get the cement tested to ascertain its conformity to the relevant IS specifications at contractor's cost before a particular lot is put to use. Frequency of testing shall be as prescribed by the relevant IS code. Following test inter-alia shall be carried out. I) Fineness ii) compressive strength iii) Initial and final setting time iv) Consistency v) Soundness.

1.4 In case samples tested do not pass the quality tests conducted, the entire batch of cement supplied shall be rejected and returned to the contractor/s.

1.5 For storage of cement, the contractor shall have to construct a temporary godown of adequate capacity at his own cost. The contractor shall bring the cement to the site of work only after instructions received from Project In-charge. It will be obligatory on the part of the contractor to get every consignment/truck of cement weighed in the presence of inspector in charge or his representative and supply the original copy of weight slip along with consignment. The inspector in charge will verify the weight of cement brought to the site of work and return one verified weigh slip to the contractor after the same is stacked inside the cement go down under his supervision.

1.6 The record of cement brought to the site of work, daily consumption, daily opening balance and closing balance shall be maintained at the site jointly by the inspector in charge of work and contractor/s or his/ their authorized representative.

1.7 The contractor shall be the custodian of cement godown and shall keep the godown under his lock and key to ensure safe custody of cement. The contractor shall ensure

that the cement once brought to the site and accounted shall be used at the site only and shall not be taken away from site for any other purpose. The contractor shall make the cement godown available for inspection along with connected record to the site Engineer or his representative as and when required.

1.8 Land for constructing the temporary cement godown shall be handed over by the DFCCIL on the written request of the contractor free of any rent.

1.9 The contractor shall ensure that after completion of the work and/or termination of the contract for any reason whatsoever, the temporary cement Godown shall be dismantled and all dismantled material /debris shall be removed and the clear site shall be handed over back to DFCCIL. All the released material shall be the property of the contractor/s and no payment shall be made by the DFCCIL for dismantling etc. The final bill and earnest money shall not be released unless the Godown is dismantled and the site is cleared in all respects.

2.0 Reinforcement Steel

2.1 Only MS/HYSD/TMT bars will be supplied by the firm of reputed ISI approved Co., and brands and no claim on account of wastage will be entertained from the contractor. Steel reinforcement for use on the work shall be worked out by multiplying the length of steel rod with the standard weight.

2.2 Before use, contractor/s will be required to obtain test certificate for the quality of reinforcement used, at his/their own cost from the laboratory/institute, approved by the Engineer-in charge.

2.3 Before reinforcement is placed, surface of the bars and the surfaces of any metal bar supports shall be cleaned of rust, loose mill scale, dirt, grease and other objectionable foreign substances. After being placed, the reinforcing bars shall be maintained in a clean condition

2.4 Welding of reinforcement will not be generally permitted except in special circumstances under the written approval of the Engineer-in-charge.

2.5 Binding wire of approved quality shall be arranged by the contractor/s himself/themselves and the rates quoted for RCC work should include cost of this item of work.

2.6 Nothing extra will be paid for un-authorized overlaps and wastage of steel.

2.7 Reinforcement shall be arranged by the contractor and payment shall be made as per NS item.

2.8 Payment for the steel reinforcement shall be made on the basis of standard unit weights and as per approved drawings and nothing extra will be paid for unauthorized overlaps and wastage of steel involved in cutting the bars to their required sizes. Nothing

extra will be paid for overweight steel and no deduction will be made for underweight steel within the limit of tolerances permitted as per IS 1786-1985.

2.9 Steel having unit weights per meter not falling within the tolerances specified in above IS code shall not be accepted.

3 Coarse Aggregate

3.1 The source from which the aggregate is to be procured shall be subject to approval of the Engineer-In-Charge/consulting engineer. It shall conform to IS: 383 and shall be as per the requirement of IS: 456.

The coarse aggregate shall be made from crushed quarry stone of the specified size and shall be clear, hard, strong and durable.

3.2 It shall be free from dirt, clay leaves or any organic matter, the broken stone shall be free from mixture of soft or decayed matter and shall cause no injurious chemical action when mixed with cement.

3.3 The contractor shall wash the aggregate before use at his own expense, if required by the authorized representative of Engineer-In-Charge.

3.4 Before use of aggregate in concreting the contractor shall be required to get the material tested from recognized institute/laboratory and submit the test report. The cost of the test shall be borne by the contractor.

4 Fine Aggregate

4.1 Bikaner/ Badarpur/ Coarse sand or approved quality shall be used as fine aggregate for cement concrete/reinforced cement concrete/controlled concrete works and shall be clean and absolutely free from dirt and admixture of earth Kankar or other deleterious matter. Local pit/rivers sand shall under no circumstances be permitted for any concrete.

4.2 The sand shall consist of natural sand composed of fine granular materials resulting from natural disintegration of rock and which has been deposited by streams or produced by crushing hard stone or gravel. The sand shall be hard durable, and chemically inert.

4.3 The sand shall not contain any harmful impurities, such as iron pynties, alkalies salts, laminated or other materials in such form or in such quantities, which affect adversely the hardening, the strength, the durability or the appearance of the mortar of concrete.

4.4 The amount of deleterious substances, namely, clay, fine silt and fine dust, shall not exceed 4% by weight when tested as laid down in IS: 383. If the sand contains more than the prescribed limit of clay, mud etc, it shall be properly washed prior to being used.

4.5 Before use of aggregate in concreting, the contractor shall be required to get the material tested from recognized institute/laboratory and submit the test report. The cost of the test will be borne by the contractor.

4.6 Storage of aggregates:

Coarse aggregates shall be delivered at site and stored in separate sizes as ordered by the Engineer-in-charge. The Engineer-in-charge shall decide and direct the contractor to bring, stack and store aggregates in different sizes as he deems necessary for the proper quality control. Aggregates shall be stored or stock piled in such a manner that

segregation of fine and coarse sizes will be avoided and also that the various sizes will not intermix before proportioning. These shall be stored, stock piled and handled in such a manner that will prevent contamination by foreign deleterious materials.

5. WATER:

5.1 The contractor has to make necessary arrangement for supply of water for RCC/PCC & works at the site with his own cost.

5.2 Relevant clauses of IS: 456 shall be applicable. The PH value shall not be less than 6. Necessary test certificate shall be brought by contractor at his own cost from recognized institute laboratory as decided by Engineer-In-Charge.

6. Specifications for CC/RCC works

6.1 These specifications shall be read in conjunction with any other specifications for concreting work given elsewhere in tender document.

6.2 Clear cover shall be provided as per approved drawings or as directed by Engineer-in-charge.

6.3 Coarse aggregate material shall be chemically inert, strong, hard, of limited porosity and free from any adhering coatings, clay and organic or other impurities that may cause corrosion of the reinforcement or affect the strength and durability of concrete. The amount of deleterious substance shall not exceed the limits in percentage by weight as set out in IS codes.

6.4 The decision of Engineer-in-charge shall be final regarding approval of the sources of coarse and fine aggregates for the concrete. The contractor shall be required to carry out washing and sieving of aggregates if directed by Engineer-in-charge and cost for the same shall be borne by the contractor without any extra claim.

6.5 FORM WORK

6.5.1 Form work shall be of steel plates of minimum 5mm thickness fixed on the angle iron frame. It should be watertight sufficiently strong and rigid to resist forces caused by vibration and incidental loads associated with it and keep the form rigid.

The surface vibrator may have to be used while casting the main beam, if so decided by Engineer-in-charge. Nothing extra shall be payable for this.

6.5.2 If the work is to be executed in close proximity of running track, the shuttering should be so planned so as not to infringe with schedule of minimum moving dimension, B.G of 1973 (2004 revised). Shuttering should be of self-supporting nature as no centering or propping will be permitted on the running track side.

6.5.3 Work shall be executed without disturbing the existing position of running track as shown in plan and entire work should be planned accordingly.

6.5.4 If at any stage of work during/ after placing the concrete in the structure, the work is found defective, such concrete shall be removed and work shall be redone with fresh concrete and adequate and rigid forms at the cost of contractor. The double wedges in order to facilitate causing & removal of the shuttering without jarring shall support the props for the centering wherever permitted. Centering and shuttering should be carefully released in order to prevent the loading being instantly transferred to concrete. The

period that shall lapse after the last pour of concrete for easing removal of centering and shuttering shall be fixed by the Engineer-in-charge and will be binding on the contractor/s.

6.5.5 It may be necessary to make provision for holes/ grooves in the form work to house the various services, for which neither any extra payment shall be made to the contractor/s for making these provisions nor any deduction shall be made on a/c of any saving in RCC work due to these provision.

6.5.6 Wherever chamfer or rounded corners are mentioned in the drawing formwork should be such that no chiseling/ cutting is required.

6.5.7 The surface of formwork shall be clear, smooth and free of cement mortar etc.

6.5.8 The Contractor shall give the Engineer In-charge due notice before placing any concrete in the forms to permit him to inspect and accept the false work and forms as to their strength, alignment and general fitness but such inspection shall not relieve the contractor of his responsibility for safety of works, men, machinery, materials and for result obtained.

6.6 Removal of Form Work:

6.6.1 The Engineer In-Charge shall be informed in advance by the contractor of his intention to strike any formwork.

6.6.2 While fixing the time for removal of form work, due consideration shall be given to the local conditions, character of the structure, the weather and the other conditions that influence the setting of concrete and of the material used in the mix.

6.6.3 The period shall be suitably increased in case of temperature lower than 25 degree Celsius and for any other conditions tending to delay the setting of concrete.

6.6.4 These field operation are controlled by strength tests of concrete, the removal of the load supporting arrangements of soffit may commence when concrete has attained strength equal to twice the stress to which the concrete will be subjected to, at the time of striking props including the effect of any further additions of loads. When field operations are not controlled by strength test of the concrete the vertical forms of beams columns & walls may be removed as per orders of the Engineer In-charge.

6.6.5 For pre-stressed units the side forms shall be released as early as possible after 12 hours of casting and soffit forms shall be permitted without restraint deformation of the member when pre-stressed is applied.

6.6.6 All formwork shall be removed without causing any damage to the concrete. Centering shall be gradually and uniformly lowered in such a manner as to avoid any shock or vibrations. Supports shall be removed in such a manner as to permit concrete to take stress due to its own weight uniformly and gradually. Where internal metal ties are permitted, their removable parts shall be extracted without causing any damage to the

concrete and the remaining holes filled with mortar. No permanently embedded metal parts shall have less than 40mm cover to the finished concrete surfaces were it is intended to re-use released form work, it shall be cleaned and make good to the satisfaction Engineer-in-charge.

6.7 Formed surfaces and finish: The formwork of CC/RCC shall be of steel and be lined so as to provide a smooth finish of uniform texture and appearance. Thickness of shuttering plates shall be 5mm. This material shall leave no stain on the concrete and so joined and fixed to its backing as not to impart any blemishes. It shall be of the same type and obtained from only one source throughout for construction of a particular structure. The thickness of steel plates for formwork, their sizes and bracing shall be got approved from the Engineer-in-charge and shall be such as to produce uniform, true and even surfacing and produce no local bulging or leakage of mortar at joints. The contractor shall make good any imperfections in the resulting finish. Internal ties and embedded metal parts will be allowed only with the specific approval of the Engineer. All formwork shall conform to IRC guidelines for the design and erection of false work for Road Bridges (IRC 87) and relevant BIS codes on the subject.

6.8 The contractor will furnish a bar bending schedule on the basis of approved drawings and actual length of reinforcement bars supplied by DFCCIL s, indicating the positions of laps and splices and will get the same approved by the Engineer before commencing placement of reinforcement.

6.9 It shall be the responsibility of the contractor to clean the reinforcement bars with wire brush/gunny bags if they are coated with light rust or other impurities. No extra payment will be made on this account.

6.10. Welding of reinforcement will not be permitted except in special circumstances under the written approval of the Engineer.

6.11 Binding wire of approved quality shall be arranged by the contractor himself at his own cost and rates quoted for RCC work shall include cost of this item of work.

6.12 Temperature/surface reinforcement shall be provided in mass CC as per approved plans/directions of the Engineer. Whenever this item has not been included in the item rate, separate payment for the same shall be made under relevant NS item.

6.13 Precast C.C. Blocks of suitable size and shape and of same mix and strength as of the structure with binding wire fixed in while casting shall be provided by the contractor duly tied with the reinforcement, so as to give required concrete cover as per plan and directions of the Engineer without any extra payment to the contractor. In case of cast-in-situ piles in foundations, such blocks may be circular in shape with suitable dia hole in the center to pass through the reinforcement.

6.14 All reinforcing bars shall be accurately placed in exact position as shown on the drawings and shall be securely held in position during placing of concrete by annealed binding wire not less than 1 mm in size and conforming to IS 280 and by using stays,

blocks or metal chairs, spacers, metal hangers, supporting wires or other approved devices at sufficiently close intervals. Bars will not be allowed to sag between supports nor displaced during concreting or any other operation of the work. All devices used for positioning shall be of non-corrodible material. Metal supports will not extend to the surface of concrete, except where shown on the drawings. Placing of bars on layers of freshly laid concrete for adjusting bar spacing will not be allowed. Pieces of broken stone, stone or brick and wooden blocks shall not be used. Layers of bars shall be separated by spacer bars, pre-cast mortar blocks or other approved devices.

6.15 After being placed in position, the reinforcement shall be maintained in a clean condition until completely embedded in concrete. Special care shall be exercised to prevent any displacement of reinforcement in already placed concrete.

6.16 To protect reinforcement from corrosion, concrete cover shall be provided as indicated on the drawings. All bars protruding from concrete to which other bars are to be spliced and which are likely to be exposed for an indefinite period shall be protected by a thick coat of neat cement grout.

6.17 In the case of columns and walls, vertical bars shall be kept in normal position with timber templates, having slots accurately cut in for bearing position. Such templates shall be removed after the concreting has progressed upto a level must below them.

6.18 Bars crossing each other, shall be secured by binding wire (annealed) of size not less than 1mm dia and conforming to IS:280 in such a manner that the same do not slip over each other at the time of fixing and concreting.

6.19 As far as possible, bars of full length shall be used. In case this is not possible, overlapping of bars shall be done as directed by the Engineer. When practicable, overlapping bars shall not touch each other, but be kept apart by 25mm or 1.25 times the maximum size of the coarse aggregates whichever is greater, by concrete between them. Where not feasible, overlapping bars shall be bound with annealed steel binding wire, not less than 1mm diameter, twisted tight. The overlaps shall be staggered for different bars and located at points along the span where neither shear nor bending moment is maximum.

6.20 The minimum center to center spacing of parallel bars shall be 2-1/2 times the diameter of the bar but in no case shall the clear distance between the bars be less than 1-1/2 times the maximum size of the coarse aggregate used. Bundled bars shall be tied together at not more than 2 meters.

6.21 Mesh reinforcement shall be rolled flat before placing unless otherwise shown on the drawings or directed by the Engineer. It shall be held firmly in place against vertical or horizontal movement by means of devices found satisfactory by the Engineer.

6.22 Tack welding of mesh reinforcement to bar reinforcement will not be permitted.

6.23 Splicing of reinforcing bars shall be done by lapping only or by appropriate type of

coupling which shall be arranged by contractor at his own cost.

6.24 Reinforcing bars may be continuous at locations where splices are shown on the drawings at the option of the contractor. The location of splices, except where shown on the drawings, shall be determined by the contractor based upon use of available commercial lengths where practicable, subject to the approval of Engineer.

6.25 Mixing, placement & curing of concrete: Mixing of concrete shall conform to IS: 456-2000.

6.25.1 Mixing of concrete for controlled concrete works shall be done, unless otherwise agreed by Engineer-in-charge, by batch type mixer, which shall comply with IS: 1791, IS: 4935 or other such type as the Engineer-in-charge may approve.

6.25.2 Batch mixers will be tested for their performance, in accordance with IS: 4634 or such other tests as the Engineer-in-charge may direct.

6.25.3 Mixers which have been out of use for more than 30 minutes shall be thoroughly cleaned before putting in a new batch. Unless otherwise agreed to by the Engineer, the first batch of concrete from the mixer shall contain only two thirds of the normal quantity of coarse aggregate. Mixing plant shall be thoroughly cleaned before changing from one type of cement to another.

6.25.4 Concrete shall not be mixed when the air temperature in the shade is below 3 degree Celsius (38 degree F) unless special precautions are taken which have been approved by the Engineer. During the hot weather the contractor shall ensure that the constituent materials are sufficiently cool to prevent the concrete from stiffening in the interval between its discharge from the mixer and its final deposition.

6.25.5 Concrete shall be mixed for not less than 120 seconds and not more than 5 minutes from the time all constituents have been introduced into the mixer and till all materials are uniformly mixed.

6.25.6 The controlled concrete ingredients should be weigh batched in approved type weigh- batcher. The concrete will have to use "Ready Mix Concrete" if so decided by the Engineer in charge and nothing extra shall be payable on this account. RDSO guidelines will have to be followed for the RMC.

6.25.7 In case of difficulty is experienced in placing the concrete of specified mix and approved consistency between and below the reinforcement bars in the bottom of beams and similar structural members, the bars shall be embedded in concrete of improved workability by increasing the proportion of cement by an approved amount and as using aggregates of approved smaller size than specified, for which nothing extra shall be paid.

6.25.8 The contractor shall use plasticisers of approved quality to improve the workability of cement concrete, if so called for by the Engineer-In-Charge for such sections of the

PRC/RCC. Which are very slim/ thin and where adequate space is not available for vibrating the concrete so as to improve its workability. However, no payment will be made for mixing plasticisers where needed. To improve the workability of concrete and cement grout, admixtures conforming to IS: 6925 and IS: 9103 may be permitted as directed by Engineer-in-charge subject to satisfactory proven use. The decision of Engineer-in-charge shall be final in this case. Admixtures generating Hydrogen, Nitrogen etc. shall not be used.

6.25.9 The slump of the approved trial mix shall be measured and this slump shall not be exceeded through out all the batches of concrete made from the same materials mixed in the same Proportion as the trial mixes and used in those parts of the work as instructed.

6.25.10 Placing: All concrete members shall be compacted by mechanical vibration. Generally internal vibrators shall be used on all sections that are sufficiently large to admit them.

6.25.11 Vibrator shall have operating frequency of at least 3600 impulses per minute. Higher frequencies upto twice the minimum are preferred.

6.25.12 Following techniques shall be followed for vibration:-

1. Vibration shall be distributed so that concrete becomes uniformly dense and plastic.
2. Vibrators shall be used for compaction only and not for moving concrete horizontally along the form.
3. For horizontal and vertical operations of form vibrators, the spacing of points of vibration shall be such that the zones of influence overlap.
4. For concrete deposited in layers the vibrators shall be inserted vertically and allowed to sink due to its own weight to the bottom of the layer and be slowly withdrawn. For succeeding layers, the vibrator shall penetrate the surface of the previous layer. Compaction shall conform to provisions of IS: 456-2000.
5. The exposed surface of plain R.C.C work shall be rubbed with Carborandum stone and rendered smooth if necessary with cement to leave surface smooth and even. Nothing extra will be paid on this account. Cement for the same will be arranged by the contractor/s at his own cost and no payment shall made.

6.25.13 Curing: All cement work whether in concrete, mortar, plaster, pointing etc. shall be continuously cured for the prescribed period as per direction of the Engineer.

Curing shall be done by covering the newly laid concrete with gunny bags and keeping them wet continuously. If it is found that the contractor is not properly observing these instructions, the Engineer may undertake the curing through other agency/labour without any notice to the contractor at the cost of the contractor. The cost incurred along with incidental charges @ 2% and supervision charges @ 12.5% of the cost will be debited to the contractor. Intimation of the employment of another agency for curing will be given to the contractor as soon as possible. This intimation in writing to the contractor under the hand of the Engineer-in-charge of the work shall be conclusive evidence of the employment of another agency.

6.26 Mix – Design: Prior to execution of design mix concrete; contractor has to submit mix design for required strength from reputed consultant for approval by the DFCCIL. Only approved Mix design shall be permitted in execution of the work. The rates quoted by the contractor for the items involving design mix concrete shall be deemed to have included the cost of this element and nothing extra shall be paid on this account

6.26.1 The concrete shall be mixed properly in mechanical mixer and shall be of proper consistency. The proper consistency shall be determined by Engineer-In charge through tests that shall be carried out by the contractor/s. The Concreting shall be commenced only after the Engineer-in charge has inspected the shuttering, the placement of reinforcement and passed the same. Cost of concrete moulds and other test shall be borne by the contractor/s.

6.26.2 The contractor shall make adequate arrangements for casting of necessary numbers of cubes and cure and finish them as per direction of Engineer.

6.26.3 The contractor shall establish laboratory in field and provide the necessary equipments to carryout all preliminary test and working out the grading and proportioning of aggregate, assessing the moisture content, casting and testing of cubes etc., in order to obtain and maintain uniform quality of work confirming to codal practices.

7.0 EARTHWORK:-

7.1 The earth required for filling is to be arranged by the contractor/s at his/their own cost from outside DFCCIL land, and for which no lead, lift, carriage, royalty and other charges, if any, incidental to the complete finished work over and above the accepted through item rate shall be paid by the DFCCIL

7.2 The tenderer/s will have to specify the tentative source of the earth from which the tenderer/s propose to bring from outside the DFCCIL land. The earth will have to be approved by the Engineer-in-charge and the contractor/s will not be allowed to form the Banks with unapproved earth. Non-approval of soil from particular area by the Engineer will not entitle the contractor/s for any claim against the DFCCIL on any a/c. The decision of the Engineer will be considered final and binding on the contractor/s.

7.3 The contractor/s shall at his/their own expenses provide all stacks, bamboo"s, string, pegs and labour for marking of center line and profiles required for correct execution of work & he/they will be responsible to ensure its proper maintenance at his/their own cost.

7.4 Centerline pucca pillars shall be provided by the contractor/s as decided by the Engineer-in charge. These centerline pillars shall not be paid for separately and elements of same shall be covered by the through items rates quoted by the contractor/s.

7.5 Any other work done extra to the requisite slope or required profile or earthwork done for making any path by the contractor/s for reaching on the platform shall not be paid. The contractor/s shall however, make good any concave surface in slopes and on the top at his own cost.

7.6 In case the contractor/s does not remove earth deposited extra to requirement on the top and slopes on formation after having been given 48 hours verbal notice, the payment will only be made as per designed cross section after recovering of shrinkage and no cognizance of extra will be taken.

7.7 It must be clearly and specifically noted that the item rates are intended to cover and full cost of finished work.

7.8 NS item of earthwork includes cutting in and through any type of soil, to met with inclusive of all ascent, descents, crossing of nallahs, tracks, crossings, or any other obstructions etc., and disposing of the excavated earth as per direction of Engineer in charge

8.0 TESTING OF MATERIALS:

8.1. The contractor shall at his own cost arranges and carries out the following tests of materials to be used in the work. The tests shall be carried out in Laboratories approved by the Engineer In-Charge.

8.2 STEEL:

8.2.1 Weldable Steel material shall be procured from SAIL, IISCO, TISCO,; RINL Steel shall conform to IS: 2062/1992 Gr-B fully killed & fully normalized shall be used. Test certificate for steel before use as per latest relevant IS specifications will be furnished by the contractor at his own cost from the manufacturer or the laboratories approved by the Engineer In-Charge.

8.2.2 DFCCIL will also take samples during the course of work and get the steel tested to ascertain their conformity to the relevant IS specification at the contractor's cost before a particular lot is to be used. Frequency of testing shall be as prescribed by the relevant IS Code.

8.3 CEMENT:

8.3.1 Quality test certificate for cement as per IS-4031 Code shall be furnished by the contractor before use of cement supplied.

8.3.2 DFCCIL may also take samples during the course of execution of works and get the cement tested to ascertain its conformity to the relevant IS specifications at contractor's cost before particular lot is put to use. Frequency of testing shall be as prescribed by the relevant IS Code. Following tests interline shall be carried out:-

- (i) Fineness
- (ii) Compressive strength
- (iii) Initial and final setting time
- (iv) Soundness

8.4 AGGREGATE:

8.4.1 Course Aggregate shall conform to latest IS-383 for grading, strength and other properties. Where required by the Engineer, course aggregate shall be tested for the following tests in accordance with the procedure in the latest IS-383 sieve analysis.

8.4.2 Determinations of Clay, fine silt and fine dust in aggregates, strength of test tubes of cylinders or as required, organic impurities.

8.4.3 Soundness:

As per IS-383: The limits being set by the agreement between the purchaser and the supplier except that aggregate failing in the accelerated soundness test may be used if they pass a specified seizing and throwing test satisfactory to the user.

8.4.4 Abrasion value test.

For wearing surface = 30%

For aggregate to be used in other concrete = 50%

8.5 WATER

8.5.1 Water shall be tested before starting the work or whenever the quality or source of water changes and testing is required by the Engineer, water shall be tested for its chemical and other impurities to ascertain its suitability for use in concrete and other structural works as per codal provisions.

8.6. Quality Control

8.6.1 The contractor shall set up, at his own cost, a properly equipped laboratory at site which shall be open for use and inspection by DFCCIL at any time. All the equipments and instruments etc. shall be kept in good working conditions. The contractor shall be required to have the gauges and equipments calibrated from a reputed laboratory as per relevant codes or as directed by Engineer. The laboratory shall be equipped with following minimum equipments:

- i) Sieve analysis apparatus for coarse and fine aggregates with suitable weigh balance.
- ii) Slump test apparatus and compaction factor test apparatus as per IS: 7320 and IS:5515.
- iii) Compression tests on concrete cubes as per IS: 516.
- iv) Concrete permeability test apparatus as per IS: 3085.
- v) Apparatus for determining moisture content of fine aggregates as per relevant part of IS: 2386.
- vi) Setting time, compressive strength of cement as per IS: 4031, 5513, 650, 10080 etc.

8.6.2 The cost of setting up the laboratory, equipping the same, maintaining and conducting all tests on materials and cubes shall be borne by the Contractor and cost of the same shall be deemed to have been included in the quoted/accepted rates for various items of work. Nothing extra is payable on this account. Contractor shall keep a copy of latest edition of all relevant codes and specifications in the laboratory.

8.6.3 The contractor shall also be required to get the materials (to be used for the work which are supplied by him) certified by independent agency for following tests (at the frequency as laid by Engineer-in-charge) at his own cost. Depending upon the exigencies, the frequency for the same will be laid by the Engineer-in-charge.

- i) Sieve Analysis of coarse aggregates.
- ii) Sieve Analysis of fine aggregates.
- iii) Test on Aggregate-Alkali reaction, hardness, abrasion and soundness of coarse aggregates.
- iv) Cube strength of mix design proportions.
- v) Quality tests for water as required for concrete.
- vi) Chloride and sulfate contents of all constituents of concrete.
- vii) Tests required on GI items.
- viii) Tests required on high tensile steel/spends.
- ix) Test on cement.
- (x) Any other test as directed by Engineer-in-charge.

8.6.4 The contractor shall submit concrete mix design for the concrete strength M-20 and above. The design shall be further checked by trial mixes as per relevant BIS codes. Cement for trial mixes shall be issued free of cost. The mix design shall be as per IS: 10262 and shall be subject to approval by the DFCCIL

8.6.5 Preliminary Site Testing

8.6.5.1 After the materials and mixes have been approved and at least 10- days before any concrete is placed in the works, the contractor shall make preliminary sets of test cubes. Each set shall comprise nine nos. 150mm cubes.

8.6.5.2 Each cube shall be made and tested under the Engineer's supervision in accordance with the procedure in IS: 516. Three cubes shall be tested 7-days after and three cubes 28 days after the date of manufacture. The balance cubes shall be preserved by the contractor until the end of the maintenance period unless otherwise required to be tested by the Engineer. Preliminary works test cubes shall be made and tested for all grades of concrete to be used and for all proposed sources of the aggregates, cement or water. Should strength of either the 7days or 28- days test cubes fall below the specified strength and the failure is confirmed by testing the balance cubes, the contractor shall make such changes to the mix design, aggregate source, aggregate grading, cement, water, method of mixing or type of mixer as shall produce a satisfactory concrete.

All cubes shall be properly marked so that they can be easily identified.

8.6.6. Works strength test for Controlled and Ordinary concrete

8.6.6.1 Concrete shall be tested for slumps, density, crushing strength and modules of rupture tests as directed by the Engineer-in-charge of the work.

8.6.6.2 Provision specified in Clause 5.3 of IS-456 for proportioning of ingredients of controlled concrete will apply in general unless otherwise as modified by the Engineer.

During the course of the work samples of concrete will be taken and tested at regular intervals from representative portions of the work. A sampling and testing programme will be established by the Engineer in consultation with the contractor before any concrete is placed. The establishment of this programme will not prevent the Engineer from procuring samples and testing of any concrete at any time. The sampling and testing will be carried out in accordance with IS: 516. One set of six cubes will normally be taken from each batch to be sampled. Three cubes will be tested at 7 days and three at 28 days. Should strength of the cubes fall below the specified strength the contractor shall on the Engineer's instructions, either alter the mix design, the method of making concrete, the method of mix control or carry out appropriate remedial measures. If in the opinion of the Engineer the results are such as to jeopardize the stability, function, strength or durability of the structure, he may order all concrete represented by the failed sample to be cut and replaced at contractor's expenses. The work will be executed afresh and cement used in the dismantled portion shall be recovered from contractor as per relevant clause of special tender conditions and instructions to tenderers. The Engineer may require the contractor to cut out defective concrete from the work even though the test cubes for the batch are satisfactory.

8.6.6.3 The permissible variation from the specified value shall also conform to these specifications. It shall be sole responsibility of the contractor to arrange for quality control test during the construction as per specification. The Engineer-In-Charge shall be empowered to get the quality control tests done through other agency if required, the cost of which shall be borne by the contractor.

9.0 MAINTAINING RECORD OF CONSTRUCTION WORK:

9.1 The contractor is required to take and supply to the Engineer-in-charge colored photographs detailing the various stages of construction activities and achievements of milestones as directed by the Engineer-in - charge.

9.2 The coloured photographs shall be taken by the contractor of all the activities pertaining to the work at regular intervals as directed by the Engineer-in-charge. Two sets of 5"x3" prints of each shall be supplied. The quantum shall involve a minimum 50 snaps. Out of the above the contractor shall be required to supply as directed the Engineer-in-charge blown up size coloured prints of up to 36"x36" size of up to four photographs. The negatives of all the photographs taken shall be supplied to the Engineer-in-charge.

9.3 All the cost of reels, taking, developing and printing etc. shall be deemed to have been included in rates quoted against various items and nothing extra shall be paid for the item of work under the clause as above. The DFCCIL shall have full ownership of copyright of these entire photograph and the contractor shall indemnify the DFCCIL against any claim of any sort.

9.4 A recovery upto Rs. 5,000 shall be made for non compliance of instruction 9.1 to 9.3.

9.5 RECORDS AND REGISTERS

The contractor shall maintain proper records, plans and charts showing the dates and progress of all main operations and the Engineer shall have access to this information at all reasonable times. Records of tests made shall be handed over to the Engineer's

representative after carrying out the tests. The following registers will be maintained at site by the contractor/s.

- i. SITE ORDER REGISTER :- The contractor shall promptly comply with site orders given therein by the Engineer or his representative or superior officers. The compliance shall be reported by the contractor to the Engineer in reasonable time so that it can be checked.
- ii. CEMENT REGISTER : This register will be maintained to record daily receipt and issue of cement duly indicating the balance quantity. The quantum of work done for which cement is used on a particular date will also be mentioned.
- iii. STEEL REGISTER : This register will record the receipts of steel items and details of reinforcements and members wherever steel is used.
- iv. LABOUR REGISTER : This register will be maintained to show daily strength of labour in different categories employed by the contractor.
- v. PLANT AND MACHINERY REGISTER : This register will record daily particulars of machinery with the contractor.
- vi. DAILY ACTIVITY REGISTER: All activities are required to be chronologically logged in this book, shifts-wise and date-wise.
- vii. UNUSUAL OCCURENCES REGISTER: All unusual occurrences are required to be chronologically logged in this book.
- viii. PRESTRESSING REGISTER: All records of load & settlement are entered in this register.
- ix. LOAD TESTING REGISTER: Containing the record of load testing on piles as well as load test on spans. All these registers/records will be signed jointly by the Engineer's representative and the contractor.
- x. CAMBER / DEFLECTION REGISTER : This register record camber / deflection of steel girders during execution / erection and final record after completion of work
- xi RIVETS / BOLTS INSPECTION REGISTER; This register record the testing of rivets or Bolts at main joints and on members connection.

9.6 Submission of **Completion Plans**:

The contractor shall submit completion plans of the work in original tracing. The completion plans shall have structural as well as general details including dimensions and shall be got approved by Engineer-in-charge. Nothing extra shall be paid for this and accepted rates of various items in the schedule shall be deemed to include this aspect. In case of contractor's failure to comply with this provision, **a recovery of Rs 50,000/- will be affected from final bill of the contractor.**

9.7 **Quality Assurance Manual**

The contractor will submit a "Quality Assurance Manual" covering for steel girder for fabrication mix designs, tests on materials, setting up of field laboratory, check lists at various stages of construction, quality control aspects, supervision requirements, site records, statistical checks etc. Contractor will submit this manual within one month of award of the work. Nothing extra shall be paid for this and accepted rates of various items in the schedule shall be deemed to include this aspect. **In case of contractor's failure to comply with this provision, a recovery of Rs 5,000/- will be affected from subsequent on account bill of the contractor.**

10. TIME SCHEDULE:

On acceptance of tender, the contractor shall provide the detailed bar chart including the starting & finishing date of each and every activity, which shall be approved by Engineer-In-Charge. Thus contractor then, start the work as per the approved bar chart.

11. Site office

The contractor shall construct a temporary site office with one office table, 6 executive chairs, one computer with printer with latest configurations, Fax, DOT phone with electricity and water supply arrangement and shall maintain the same upto the completion of work. All the item mentioned above will be returned to contractor after completion of work.

12. TESTS AND STANDARDS OF ACCEPTANCE

The materials shall be tested in accordance with relevant IS specification and necessary test certificates shall be furnished. Additional tests, if required, shall be got carried out by the contractor at his own cost.

13. SERVICE ROAD

Any service road required by the contractor for his/ their use along the alignment will be provided by the contractor and his/their tendered rates will be deemed to include the cost of provision & maintenance of service road as required by the contractor.

The DFCCIL constructs and maintains service roads according to their requirement and convenience. However, the contractors will be permitted to use the service road free of cost but no claim will be entertained for non provision of service road in any stretch whatsoever.

14. HIRING OF TOOLS AND PLANTS.

14.1 The contractor will be entirely responsible to arrange all necessary machinery, including concrete mixers, vibrators, compressors, pumps, pneumatic equipment's, dredges derricks, cranes, service girders, staging, motor vehicles, trailer tools and plants and their spare parts required for sufficient and methodical execution of work and transport them to the site of work. Delay in procurement of such items due to their non-availability on account of import difficulties or any other cause whatsoever, will not be taken as excuse for slow or non-performance of the work. Safety of plants and machinery will be the responsibility of the contractor and for any loss due to any cause or wash away in flood, or otherwise no claim will be entertained on this account whatsoever.

14.2 The DFCCIL may give on hire to the contractor any plant or equipment, if available. But it will not entertain any claim due to the DFCCIL failure to do so nor can be DFCCIL inability to supply such plant taken as an excuse for slow progress or non-performance of the work.

14.3 If, the DFCCIL loans any plant to the contractor on hire, charge will be levied, as detailed below and separate agreement will have to be entered into before the plant is issued.

(A) The cost of the plant for the purpose of calculating the hire charges shall be its book value plus freight charges and all other incidental charges to which supervisions charges at the rate of 12-1/2 on total cost will be added.

(B) The charges per annum will be calculated at the following rates on the cost of plant as per (A) above.

(i) Ordinary repair and maintenance charges 5%.

(ii) Interest on the capital cost at the ruling rate, dividend payable by Railways to the General Revenue.

(iii) Special repair and maintenance charges at 10%.

(iv) Depreciation charges at the following rates

(a) Light plant - 15% per annum. b) Heavy plant - 10% per annum. (c) Special plant - 6% per annum. The classification of the plants shall be as per para 3502 of Indian Railway Way and Works Manual.

(C) An additional 10% on the total (i) to (iv) above to meet contingencies.

14.4 The hire charges per day shall be arrived at by dividing the annual hire charges vide (A) & (B) above by 250 which shall be assumed number of working days in a year for this purpose. These hire charges will be payable from the day the plant is handed over till it is returned by the firm/contractor to the DFCCIL. However, during this period if the plant remains out of order for reasons beyond the control of the hirers or is sent for periodical overhaul. Such periods shall not be counted for levy of hire charges provided a certificate to that effect is given by the Engineer. In case of any difference of opinion between the Engineer and the contractor the decision of the Chief Project Manager/ DFCCIL, Noida will be final and binding.

14.5 If the CC crib is available will be given to the contractor on hire charges will be levied as under:-

(A) Hire charges for CC cribs 2" x 2" x 6" size including leading, loading from site store to site and back without any damage including all labour and material as a complete job:-
Rs. 1.05 per crib/per day (Rs. One & paise five only per crib/per day)

15. General.

15.1 If, Proper approach road for transporting the various material are not available, the contractor may have to handle the material involving head lead etc. Proper spacing for stacking the material may not be given in the yard and it may be away from the yard. The contractor will be required to stack the material at the specified area nominated by the Engineer In charge.

15.2 The work is to be completed on a strict time bound schedule. The contractors who have sound Experience and necessary resources, requisite tools and plants, equipments and finance to handle the job shall be considered. Tenderers are required to submit credentials about their experience of having executed these kinds of various works.

15.3 After the acceptance letter is issued, contractor will be required to submit the detailed programme for completion of works.

15.4 It may be noted that the work is to be carried out under running traffic where the essential DFCCIL traffic shall be moving all the 24 hours and the work shall have to be

carried out without hindering the Railway traffic in any way. Suitable arrangements shall have to be made by the contractor without infringing the schedule of dimensions.

DFCCIL shall not be responsible for any loss or damage to contractor's men, materials, equipments, tools and plants etc from any cause whatsoever. No claim for idle labour, idle machinery/plant etc on any account shall be entertained by DFCCIL. Similarly no claim will be entertained for business loss or any such loss for whatsoever reason.

15.7 The contractor will ensure that minimum waterway of the bridge is blocked during the course of its construction and also that such blockages shall be removed by him at his own cost before the middle of June of the year or as directed by the Engineer. Any damage to the bridge on this account will be contractor's sole responsibility.

16.0 Maintenance period.

16.1 The maintenance period of the permanent works shall be treated as 12 (twelve) months from the date of completion.

16.2 Refund of security deposit shall be allowed after the maintenance period of one year subjected to satisfactory maintenance and performance of the repairs/rehabilitation done by the contractor.

17.0 Arbitration Clause

17.1 In the event of any dispute or difference between the parties in connection with this work, arbitration clause No 20 of General Conditions of Contract, regulations and instructions to tenderer/s and standard form of contract with replacement of work contract by contractor Architects/Consultant shall be applicable.

18.0 SUPPLY OF ELECTRIC POWER:

18.1 The Contractor shall be responsible for the arrangements to obtain supply of electric power necessary for the work. He shall preferably arrange his own electric generating set, especially in view of erratic and unreliable electric supply.

18.2 The DFCCIL may make available electric power required for the work from the DFCCIL's existing power system, if spare, on terms and conditions to be determined by the DFCCIL provided that the contractor shall arrange at his own expenses to effect the connection, lay additional cables, provide switch gears and do the wiring etc., at his own cost and the contractor shall not be entitled for any compensation for interruption or failure of the electricity.

Consumption of electricity at site has to be borne by the contractor at the rates specified by the DFCCIL 18.3 The contractor shall abide by the Indian Electricity act and the Indian Electricity rules as amended from time to time.

18.4 On request of contractor, DFCCIL will forward the contractor's application for getting electric supply to local authorities.

19.0 LABOUR

19.1 The contractor/s will be held responsible for compliance with provision of various laws, acts and rules & regulations related to contract labour even in respect of labour employed by his/their sub-contractor in the execution of the works contracted by him/them.

19.2 The contractor/s shall obtain labour license/registration certificate from the appropriate licensing officer/labour enforcement authority of the area before commencement of the work and shall produce a copy thereof along with the original to the CPM,DFCCIL,NOIDA to start the work.

19.3 In any case, in which by virtue of provisions of contract labour (regulation and abolition) Act. 1970, the DFCCIL is obliged to provide amenities and/or pay wages to labour employed by the contractor directly or through petty contractor/s or sub-contractor/s under this contract then the contractor shall indemnify the DFCCIL fully and the DFCCIL shall be entitled to recover from the contractor the expenditure incurred on providing the said amenities and wages so paid by deducting it from the security deposit or from any sum due to the contractor from the DFCCIL provided that if any dispute arises as to the expenditure incurred by the DFCCIL on provisions of the said amenities, the decision of the Engineer-in-charge shall be final and binding on the contractor.

19.4 The DFCCIL will not take any responsibility or make arrangements for supply of food stuff to the contractor's staff or his/their labourers.

19.5 The contractor/s shall make his/their own arrangements at his/their own cost for supply of water to his/their staff and labour and the DFCCIL undertake no responsibilities for such supply of water to the contractor's staff or labourers.

19.6 The contractor/s shall take all precautionary measures in order to ensure protection of his own personnel moving about or working on the DFCCIL premises & shall have to conform to the rules and regulations as per instructions of Project Incharge. If any unforeseen incident or injury happens to any of contractor's personnel while working the contractor shall be solely responsible for the same.

19.7 The Contractor/s shall maintain necessary records such as employment cards, service certificates etc to be displayed on board in accordance with provisions of contractor labour act and contract labour rules.

20.0 WATER

The contractor shall be responsible for the arrangement to obtain supply of water necessary for the work at his own cost and rates quoted should take into account the cost of wells or any other arrangements required to be made for procuring water and loading/transporting/conducting water to the site of work, irrespective of the distance from the source. Quality of water in accordance with relevant BIS specifications depending upon the type of work will have to be confirmed. DFCCIL has no source of supply of water so far as construction of this work is concerned.

21.0 NOTICES TO PUBLIC BODIES

The contractor/s shall give to the municipality, police and other authorities, all notices that may be required by law and obtain all requisite licenses for temporary obstructions, enclosures and pay all fees, taxes and charges, which may be livable on account of his operations in executing the contract. He should make good any damage to adjoining premises whether public or private and supply and maintain any lights etc. required at night. Nothing extra shall be payable on any such account and accepted rates of various items in the schedule of items, rates and quantities shall be deemed to cover any such aspect.

22.0 FIRST AID

The contractor/s shall maintain in a readily accessible place First Aid appliances including adequate supply of sterilized cotton wool. The appliances shall be placed under the charge of a responsible person who shall be trained for the purpose and shall be readily available during working hours.

23.0 CONDITIONAL TENDERS

Conditional tenders are liable to be rejected straight away. DFCCIL reserve the right to reject such tenders summarily without assigning any reasons whatsoever

**GENERAL CONDITIONS OF CONTRACT
FOR
BUILD ONLY AND PART DESIGN AND BUILD CONTRACTS**

1. GENERAL PROVISIONS

1.1 Definitions

In the contract (defined below) the following works and expressions shall have the meanings assigned to them, except where the context requires otherwise. Works indicating persons or parties include corporations and other legal entities except where the context requires otherwise.

- a. **“Employer”** means **Dedicated Freight Corridor Corporation of India Ltd. (DFCC), its legal successors and assignees.**
- b. **“Engineer”** means any person nominated or appointed from time to time by the Employer to act as the Engineer for the purpose of the Contract and notified to the Contractor by the Employer.
- c. **“Engineer’s Representative”** means any assistant of the Engineer, appointed from time to time by the Engineer.
- d. i). **“Contractor” or “Successful Tenderer”** means the person whose tender has been accepted by the Employer and the legal successors in title to such person. In this condition the two words are used interchangeably.
- ii). **“Contractor’s Representative”** shall mean a person named by the Contractor or appointed from time to time by the Contractor to act on behalf of Contractor.
- e. **“Sub Contractor”** means any person named in the contract as a sub contractor or any person appointed *by the contractor* with the approval of employer as a sub contractor for a part of the work and the legal successors in title to each of these persons.
- f. **“Other Contractor”** means a person employed by or having a Contract directly or indirectly with the employer otherwise than through the Contractor.
- g. **“Tenderer or Bidder”** means the person submitting a bid/Tender.
- h. **“Scheduled bank”** means a bank included in the second schedule to the Reserve Bank of India Act, 1934, or modifications thereto.
- i. **“Contract”** means the Contract agreement, the Letter of Acceptance, the Letter of Tender, these conditions, the specifications, the drawings, the schedules and the further documents (if any) which are listed in the Contract agreement or in the Letter of Acceptance..
- j. **“Tender or Bid”** means the offer made by the Tenderer to the Employer for the execution of the Works.
- k. **“Specification”** means the specification referred to in the Contract and any modification thereof or addition thereto, as may from time to time be furnished or approved in writing by the Engineer.
- l. **“Drawings”** means the Drawings of the works, as included in the contract and any additional/modified Drawings approved by the Engineer from time to time.
- m. **“Bill of Quantities”** means the priced and completed bill of quantities forming part of the tender.

- n. **“Contract Price” or “Contract Value”** means the sum stated in the letter of Acceptance, subject to such additions thereto or deductions there from as may be made under the provisions of the Contract.
- o.
 - i. **“Works”** means the Permanent Works or Temporary works, or either of them as appropriate.
 - ii. **“Permanent Works”** means the permanent works to be executed, completed and maintained in accordance with the Contract.
 - iii. **“Temporary Works”** means all temporary and enabling works of every kind required for the execution and completion of the works and the remedying of any defects therein.
- p. **“Contractor’s Documents”** means the calculations, computer programs and other softwares, drawings, manuals, models and other documents of a technical nature (if any) supplied by the Contractor under the Contract.
- q. **“Constructional Plant”** means all machinery, appliances or things of whatsoever nature, required for the execution, completion or maintenance of the works, but does not include material or other things, intended to form a forming part of the Permanent Works.
- r. **“Site”** means the places provided by the employer where the works are to be executed and to which plant, and materials are to be delivered, and any other places as designated in the Contract as forming part of the site.
- s. **“Materials”** means things of all kinds (other than Plant) to be provided and incorporated in the permanent Works by the Contractor, including the supply only items (if any) as specified in the contract.
- t. **“Test”** means such tests as are prescribed in the Specifications or by the Engineer or Engineer’s Representative, whether performed by the Contractor or by the Engineer or his Representative or any agency under the direction of the Engineer.
- u. **“Approval or Approved”** means Approval in writing including subsequent written confirmation of previous verbal approval.
- v. **“Defects Liability Period”** means the period for remedy of defects (if any) specified in the contract commencing from the date of completion of the work as certified by the Engineer.
- w. **“Letter of Acceptance”** means the formal acceptance letter from the Employer of the Tender.
- x.
 - i. **“Day”** means a calendar day.
 - ii. **“Month”** means a calendar month”
 - iii. **“Year”** means 365 days.
- y. **“Terms and expressions not herein defined”** shall have the meanings assigned to them in the “Indian General Clauses Act, 1897” or the Indian Contract Act or the Indian Sale of Goods Act or any other applicable Indian law, as the case may be.

1.2 Interpretation

In the Contract except where the context requires otherwise:

- a. words indicating one gender include all genders:
- b. works indicating the singular also include the plural and words indicating the plural also include the singular and

- c. "written" or "in writing" means hand-written, type written, printed or electronically made and resulting in a permanent record.

The marginal words and other headings shall not be taken into consideration in the interpretation of these conditions.

1.3 Communications and Language of Contract

1.3.1 Communications to be in writing

Communications between parties will be effective only when in writing. Verbal communication if any must be confirmed in writing later on. A notice will be effective only when delivered/*dispatched*.

1.3.2 Language of Contract

The contract document shall be in English.

1.4 Governing Law and Priority of Documents

1.4.1 Governing Law

The Contract shall be governed by the Acts and Laws of India, the rules, regulations and bye-laws of the concerned public bodies and authorities.

1.4.2 Jurisdiction of Courts

This is a condition of contract that the courts at Delhi/New Delhi shall have the exclusive jurisdiction to try all disputes between the parties arising out of the agreement.

1.4.3 Priorities of documents

The several documents forming the contract are to be taken as mutually explanatory of one another. If any inconsistency or discrepancy is found in the documents, the Engineer shall issue any necessary clarification or instruction. For the purpose of interpretation, the priority of documents shall be in accordance with the following sequence:

- a) The letter of Acceptance.
- b) the Contract Agreement (if completed).
- c) The notice inviting Tender/Instructions to Tenderers.
- d) Special conditions of Contract.
- e) General conditions of Contract.
- f) Bill of Quantities
- g) Drawings.
- h) The specifications
- i) The schedules and any other document forming part of Contract.

1.5. Joint and Several Liability

If the contractor is (under applicable Laws) a joint venture, consortium, or other incorporated grouping of two or more persons:

- a. these Persons shall be deemed to be jointly and severally liable to the Employer for the performance of the Contract.
- b. these Persons shall notify the Employer of their leader who shall have authority to bind the Contractor and each of these persons: and
- c. The Contractor shall not alter its composition or legal status without the prior consent of the Employer.

2. EMPLOYER

2.1 General Obligations

The Employer shall provide the site and pay the Contractor in accordance with the Contract.

The Employer shall give the Contractor right of access to and possession of the Site progressively to enable the Contractor to complete the Works as per schedule. The right and possession may not be exclusive to the Contractor.

2.2. Permits, License or approvals

It shall be contractor's responsibility to get approvals, permits or license required for the contract. However, the Employer shall (where he is in position to do so) provide reasonable assistance to Contractor at the request and cost of the Contractor in getting Permits, License or Approvals required during the Contract.

2.3 Assignment by the Employer

The Employer shall be entitled without the consent of the Contractor to fully assign the benefit of the Contract or any part thereof and interest therein or there under to any third party.

3. ENGINEER AND ENGINEER'S REPRESENTATIVE

3.1 Duties and Authority of Engineer

The Engineer shall carry out the duties specified or implied in the Contract. If the Engineer is required to obtain the Approval of the Employer before exercising a specified authority, as per the requirement in accordance with the contract. Any requisite approval shall be deemed to have been given by the Employer for any such authority exercised by the Engineer. The Engineer shall have no authority to amend the Contract nor to relieve the Contractor of any of its obligations of the Contract.

3.2 Delegation by the Engineer

- i. The Engineer may from time to time assign duties and delegate authority to Engineers Representative/assistants and may also revoke such assignments or delegations. The delegation or revocation shall be in writing.
- ii. Each Assistant to whom duties have been assigned or authority has been delegated shall be authorized to issue instructions to the Contractor to the extent defined by the delegation. Any approval, check, certificate, consent, examination, inspection, instruction, notice, proposal, request, Test or similar act by assistance shall have the same effect as though the act had been act of the Engineer. However,
 - a. Any failure to disapprove any work, plant or Materials shall not constitute Approval, and shall not therefore prejudice the right of the Engineer to reject the work, plant and materials.
 - b. If the Contractor questions any determination or instruction of an assistant, the contractor may refer the matter to the Engineer who shall promptly confirm, reverse or vary the determination or instruction.

3.3 Assistants to Engineer and Engineer's Representative

The Engineer or the Engineer's representative may appoint any number of assistants to assist them after duly notifying their names, duties and scope of authority to the contractor.

3.4 Instructions of the Engineer

The Contractor shall comply with the instructions given by the Engineer, Engineer's Representative or the delegated assistant, on any matter related to the Contract. Wherever practicable, their instructions shall be given in writing. If the Engineer or a delegated assistant:

- a. Gives an oral instruction
 - b. Receives a written communication of the instruction, from (or on behalf of) the Contractor, within two working days after giving the instruction, and
 - c. Does not reply by issuing a written rejection and/or instruction within two working days after receiving the confirmation,
- then the confirmation shall constitute the written instruction of the Engineer or delegated assistant (as the case may be).

CONTRACTOR

4.1 Contractor's General Obligations

The Contractor shall design (to the extent specified in the Contract), execute and complete the Works in accordance with the Contract and with the Engineer's instructions, and shall remedy any defects in the Works, as directed by the Engineer. The contractor shall provide the Plant and Contractor's documents specified in the Contract, and all Contractor's Personnel, Goods, consumables and other things and services, whether or a temporary or permanent nature, required in and for this design, execution, completion and remedying of defects.

The Contractor shall be responsible for the adequacy, stability and safety of all such operations and of all methods of construction. The Contractor shall, whenever required by the Engineer, submit details of the arrangement and methods which the contractor proposes to adopt for the execution of the works. No significant alteration to these arrangements and methods shall be made without this having previously been notified to the Engineer.

If the Contract specifies that the Contractor shall design any part of the Permanent Works, then unless stated in Special Conditions of contract:

- a. the Contractor shall submit to the Engineer the Contractor's document for the part in accordance with the procedures specified in the Contract;
- b. these Contractor's Documents shall be in accordance with the specifications and Drawings, shall be written in the language for communications defined in and shall include additional information required by the Engineer to add to the Drawings for co-ordination of each party's designs;
- c. the Contractor shall be responsible for this part and it shall, when the Works are completed, be fit for such purposes for which the part is intended as are specified in the Contract; and

- d. prior to the commencement of the Tests on completion, the Contractor shall submit to the Engineer the “as-built” documents and operation and maintenance manuals without any extra cost in accordance with the Specifications and in sufficient detail for the Employer to operate, maintain, dismantle, reassemble, adjust and repair this part of the Works, Such part shall not be considered to be completed for the purposes of issue of Completion Certificate until these documents and manuals have been submitted to the Engineer.

4.2 Contractor’s Warranty of Design

If it is specified in the Contract that the Contractor shall be responsible for design;

- a. The Contractor warrants that the Contractor’s part of the design (in accordance with **Sub-Cause 4.1**) meets the specifications provided by the Employer and is fit for the purpose thereof. Where there is any inadequacy, insufficiency, impracticality or unsuitability in or of the specification or any part thereof, the Contractor’s part of the design shall take into account, address or rectify such inadequacy, insufficiency, impracticality or unsuitability at Contractor’s own cost.
- b. The Contractor shall indemnify the Employer against any damage, expense, liability, loss or claim, which the employer might incur, sustain or be subject to arising from any breach of the contractor’s design responsibility and/or warranty set out in this clause.
- c. The contractor further specifies and is deemed to have checked and accepted full responsibility for the Contractor’s part of the design (in accordance with **Sub Clause 4.1**).
 - i. Notwithstanding that such design may be or have been prepared, developed or issued by the Employer, any of Contractor’s consultants, his sub contractor’s and/or his qualified personnel/persons or cause to be prepared, developed or issued by others.
 - ii. Notwithstanding any warranties, guaranties and/or indemnities that may be or may have been submitted by any other person.
 - iii. Notwithstanding that the same have been accepted by the Engineer.

4.3 Compliance with Regulations and Bylaws

The Contractor shall confirm in all respects with:

- a. The Contractor shall conform to the provision of any statute relating to the works and regulation and bye-laws of any local authority and of any water and lighting companies or undertakings, with whose system the work is proposed to be connected and shall before making any variation from the drawings or the specifications that may be necessitated by so confirming give to the Engineer notice specifying the variation proposed to be made and the reason for making the variation and shall not carry out such variation until he has received instructions from the Engineer in respect thereof.

The Contractor shall be bound to give all notices required by statute, regulations or bye-laws as aforesaid and to pay all fees and taxes payable to any authority in respect thereof which will be reimbursed on production of proper record.

The provision of all laws of land in force and enacted from time to time will be complied by the Contractor.

- b. the regulations or bye-laws of any local body and utilities.
- c. the contractor shall be bound to give all notices required by statute, regulations or bye-laws, aforesaid and to pay all fees and bills payable in respect thereof. The contractor will arrange necessary clearances and approvals before the work is taken up. Nothing will be paid by employer on this account.

Ignorance of rules, regulations and bylaws shall not constitute a basis for any claim at any stage of work.

4.4 Representation of Works

The Contractor shall, when he is not personally present on the site of the works place and keep a responsible agent at the works during working hours who shall on receiving reasonable notice, present himself to the Engineer and orders given by the Engineer or the Engineer's Representative to the agent shall be deemed to have the same force as if they had been given to the Contractor. Before absenting himself, the Contractor shall furnish the name and address of his agent for the purpose of this clause and failure on the part of the Contractor to comply with this provision at any time will entitle the DFCC to rescind the contract under Clause 11 of these conditions.

4.5 Provision of Efficient and Competent Staff

The Contractor shall employ and keep on the works at all times efficient and competent staff to give necessary directives to his workers for execution of works in a safe and proper manner. If the Engineer asks the Contractor to remove a person of his work force stating the reasons, the contractor shall ensure that the person leaves the site within seven days and has no further connection with the work in the Contract.

4.6 Securities:

4.6.1 Tender Security (Earnest Money Deposit):

Tender shall be accompanied with tender security @ 2% of estimated cost of tender in shape of FDR (Fixed deposit receipt)/Crossed Demand Draft/ Banker's Cheque in favour of DFCCIL, New Delhi payable at New Delhi from a scheduled bank. The tender security of the successful tender shall be kept as security deposit for fulfillment of contractual obligations. Tenders without the requisite security shall be summarily rejected. The tender Security of unsuccessful tenderer/s shall be returned on award of contract.

4.6.2 Performance Security (PERFORMANCE GUARANTEE)

4.6.2.1 Amount of performance Security

The procedure for obtaining Performance Guarantee is outlined below:

- a) The successful bidder shall have to submit a Performance Guarantee (PG) within 30 (thirty) days from the date of issue of Letter of Acceptance (LOA). Extension of time for submission of PG beyond 30 (thirty) days and upto 60 days from the date of issue of LOA may be given by the Authority who is competent to sign the contract agreement. However, a penal interest of 15% per annum shall be charged for the delay beyond 30 (thirty) days i.e. from 31st day after the date of issue of LOA. In case the contractor fails to submit the requisite PG even after 60 days from the date of issue of LOA, the contract shall be terminated duly forfeiting EMD and other dues, if any payable against that contract. The failed contractor shall be debarred from participating in re-tender for that work.
- b) The successful bidder shall submit the Performance Guarantee (PG) in the form of irrevocable bank guarantee, amounting to **5% of the contract value**.
Alternatively the Performance Guarantee may be submitted in the form of FDR in favour of DFCCIL, New Delhi.
- c) The Performance Guarantee shall be submitted by the successful bidder after the Letter of Acceptance (LOA) has been issued, but before signing of the contract agreement. This P.G. shall be initially valid upto the stipulated date of completion plus 60 days beyond that. In case, the time for completion of work gets extended, the contractor shall get the validity of P.G. extended to cover such extended time for completion of work plus 60 days.
- d) The value of PG to be submitted by the contractor will not change for variation upto 25% (either increase or decrease). In case during the course of execution, value of the contract increased by more than 25% of the original contract value, an additional Performance Guarantee amounting to 5% (five percent) for the excess value over the original contract value shall be deposited by the contractor.”
- e) The Performance Guarantee (PG) shall be released after physical completion of the work based on „Completion Certificate“ issued by the competent authority stating that the contractor has completed the work in all respects satisfactorily. The Security Deposit shall, however, be released only after expiry of the maintenance period and after passing the final bill based on „No Claim Certificate“ from the contractor.
- f) Whenever the contract is rescinded, the Security Deposit shall be forfeited and the Performance Guarantee shall be encashed. The balance work shall be got done independently without risk & cost of the failed contractor. The failed contractor shall be debarred from participating in the tender for executing the balance work. If the failed contractor is a JV or a Partnership firm, then every member/partner of such a firm shall be debarred from participating in the tender for the balance work in his/her individual capacity or as a partner of any other JV/partnership firm.

- g) The engineer shall not make a claim under the Performance Guarantee except for amounts to which the President of India is entitled under the contract (not withstanding and/or without prejudice to any other provision in the contract agreement) in the event of:
- i. Failure by the contractor to extend the validity of the Performance Guarantee as described herein above, in which event the Engineer may claim the full amount of the Performance Guarantee.
 - ii. Failure by the contractor to pay President of India any amount due, either as agreed by the contractor or determined under any of the Clauses/Conditions of the Agreement, within 30 days of the service of notice to this effect by Engineer.
 - iii. The Contract being determined or rescinded under provision of the GCC, the Performance Guarantee shall be forfeited in full and shall be absolutely at the disposal of the President of India.

4.6.2.2 Security Deposit.

The tender security deposited by the contractor with a tender will be retained by employer as part of security of the due and faithful fulfillment of the contract by the contractor and in addition, 10% will be deducted from on-account bills progressively so that overall retained security deposit is 5 % of contract value, including tender security (EMD).

4.6.2.3 Release of Performance Security & Security Deposit:

- i. On completion of the entire work, Security Deposit shall be refunded to the Contractor. This shall not relieve the Contractor from his obligations and liabilities, to make good that may be detected during the Defects Liability Period and on issue of maintenance certificate by the Engineer.
- ii. The balance amount of performance security be paid to the Contractor, after the expiry of the Defects Liability Period & issue of maintenance certificate by the Engineer.

4.7 Assignment of Contract

The Contractor shall not assign a right or benefit under the Contract without first obtaining Employer's prior written consent, otherwise than by:

- a. Charge in favour of the Contractor's bankers of any money due or to become due under the contract, or
- b. Assignment to the Contractor's insurers (in cases where the insurers have discharged the Contractor's loss or liability) of the Contractor's right to obtain relief against any other party liable.

4.8 Subcontracting

- a. The contractor shall not subcontract the whole of the Works.
- b. The Contractor can Subcontract part of the work upto 5% of contract value. Subcontracting by more than 5% shall require prior written consent of the employer.
- c. Subcontracting does not alter the Contractor's obligations in any manner and the Contractor shall ensure sufficient superintendence as well as impose such terms and conditions on the subcontractor as are appropriate to the parts of the works Sub-Contractor, to enable the Contractor comply with his obligations under the Contract.
- d. The contractor shall not be required to obtain such consent for provision of labour and material and for petty contractors/piece works under direct supervision of Contractor's Representatives.

4.9 Assignment of Subcontractor's Obligations

If a Subcontractor's obligations extend beyond the expiry date of Defects Liability Period then the contractor shall assign the benefits of such obligations to the Employer.

4.10 Compensation for Breach

Any breach of **sub clauses 4.7 to 4.9** shall entitle the Employer to terminate the Contract under **Clause 11.4** of these conditions and also render the contractor liable for loss or damage arising due to such termination.

4.11 Specifications and Drawings

4.11.1 Ownership

The contractor shall keep at site in good order, one copy of latest approved Specifications, drawings and other documents. All specifications and drawings shall remain the property of the Employer and shall be returned to the Employer on completion or on termination of the contract.

4.11.2 Adherence to specifications and Drawings

- i. The works shall be executed in conformity with the Specifications and drawings of the Contract issued to the Contractor by the Engineer from time to time. If the contractor does any work or part in a manner contrary to the specifications or drawings, he shall bear all the costs arising therefrom including dismantling and reconstruction strictly in accordance with the specifications and drawings and shall be responsible for all loss to the Employer.

- ii. If any ambiguity arises as to the meaning and intent of any portion of the Specifications and drawings or as to execution or quality of any work or material or as to the measurement of the works, the decision of the Engineer thereon shall be final and binding.
- iii. The term “drawings” in this sub clause includes also the drawings prepared by the Contractor and approved by the Engineer, as specified in the special Conditions of Contract.

4.11.3 Compliance with Contractor’s Request for Details

- i. The contractor shall give written notice to the Engineer whenever progress of the works is likely to be delayed or disrupted unless any further drawing, where the special conditions of Contract provide for such drawings to be prepared by the Engineer, or order, including a direction, instruction or approval is issued by the Engineer within a reasonable time. The notice shall include details of the Drawing or order required and of why and by when it is required and of any delay or disruption likely to be suffered if this issue is delayed.
- ii. The Engineer shall furnish with reasonable promptness, on receipt of request from the Contractor, additional instructions by means of drawings or otherwise necessary for the proper execution of the works or any part thereof. All such Drawings and instructions shall be consistent with the Contract documents and reasonable inferable therefrom. The Engineer may ask the Contractor for alternative proposals or clarifications or additional data or any other detail in respect Contractors request, if any.

If, due to any failure or inability of the Engineer to issue within a reasonable time any drawing or order requested by the Contractor as stated above, the contractor suffers delay and/or incurs additional costs, the Engineer shall take such delay into account while determining any extension of time to which the Contractor would be entitled and no claim whatsoever shall be entertained on this account.

4.12 Deleted.

4.13 Deleted.

4.14 Temporary Works

All temporary works necessary for the proper execution of the works shall be provided and maintained by the Contractor at his cost and subject to the consent of the Engineer shall be removed by Contractor at his own expense when they are no longer required and in such manner as the Engineer shall direct. In case the Contractor fails to get the same removed, than the same will be removed by the Engineer/Employer and cost thereof shall be recovered from the Contractor.

4.15 Bore holes and Exploratory Excavation

The contractor shall be guided by the Site investigation details furnished in the Tender Documents. In such cases, if the Engineer shall require the Contractor to make bore holes or to carry out explanatory excavation, the same shall be paid extra to the contractor as determined by the Engineer.

4.16 Setting Out

4.16.1 Accurate setting Out

The Contractor shall be responsible

- a. the accurate setting out of the works in relation to the original points, lines and levels of reference given by the Engineer in writing.
- b. The correctness of position, levels, dimensions and alignments of all parts of the works.
- c. The provisions of all necessary instruments, equipment, apparatus and labour in connection with the foregoing responsibilities.
- d. Carefully protecting and preserving all bench marks, sight rails, pegs and other things used in setting out the works.

4.16.2 Errors in Setting Out

If at any time during the execution of the work, an error appears in the positions, levels, dimensions or alignment of any part of the works, the contractor on being required to do so by the Engineer shall, at his cost, rectify such error to the satisfaction of the Engineer **with no extra cost**.

4.17 Safety of Works

The contractor shall be responsible for safety of works at site. In this connection, Contractor is required to take note of all necessary provisions in Employer's Safety, health and Environment Manual (SHE Manual), which shall be inclusive of all necessary costs to meet the prescribed safety standards. In the case, the contractor fails in the above, the Employer may provide the necessary arrangements and recover the costs from the Contractor.

4.18 Security of site and works

Unless otherwise stated in special Conditions of Contract

- a. the contractor shall be responsible for keeping unauthorized persons off the site.
- b. Authorized persons shall be limited to the Employees of the Contractor, subcontractor or persons authorized by the Engineer.

4.19 Site Data and Inspection of site

- i. The employer shall have made available to the Contractor with the tender documents such relevant data in Employer's possession on hydrological and subsurface conditions. The contractor shall be responsible for interpreting all such data.
- ii. The contractor shall be deemed to have obtained all necessary information as to risks, contingencies and other circumstances which may influence or affect the Tender or Works.
- iii. The contractor shall also be deemed to have inspected and examined the site, its surroundings, the above data and other available information and to have been satisfied before submitting the tender as to all the relevant matters, including without limitation:
 - a. the form and nature of the site, including the subsurface condition
 - b. the hydrological and climatic conditions
 - c. the extent and nature of work and goods necessary for the execution and completion of the work and the remedying of any defects.
 - d. The applicable laws, procedures and labour practices
 - e. The contractor's requirement for access, accommodation, facilities, personnel, power, transport, water and other services.

4.20 Sufficiency of accepted Contract amount

The contractor shall be deemed to have satisfied himself, before Tendering, as to the correctness and sufficiency of his tender for the works and of the rates and prices stated in the priced Bill of quantities and the schedule of rates and Prices, if any, all of which shall, except in so far as it is otherwise provided in the contract, cover all his obligations under the contract and all matters and things necessary for the proper execution and maintenance of the works. The tenders containing any deviation from the Contractual Terms and conditions, specifications and other requirements save as provided in this General Conditions of Contract or Special Conditions of Contract shall be rejected as non responsive.

4.21 Unforeseeable Physical conditions

In this clause "physical conditions" means natural physical conditions, which the Contractor encounters at Site while executing the Works excluding climatic conditions.

If during the execution of the works, the Contractor shall encounter physical conditions, which, in his opinion, could not have been reasonably foreseen by an experienced Contractor, the Contractor shall forthwith give written notice thereof to

the Engineer and if, in the opinion of the Engineer, such conditions could not have been reasonably foreseen by an experienced Contractor, then the Engineer shall certify and the Employer shall pay reasonable additional cost to which the Contractor shall have been put by reason of such conditions in the following cases:

- a. for complying with any instruction which the Engineer may issue to the Contractor in connection therewith, and
- b. for any proper and reasonable measures approved by the Engineer which the Contractor may take in the absence of specific instructions from the Engineer, as a result of such conditions or obstructions being encountered.

When the Engineer is required to determine value, cost or extension of time, he shall consult with the Contractor and the Employer in an endeavor to reach agreement. If agreement is not achieved, the Engineer shall determine the matter fairly, reasonably and in accordance with the Contract, with the approval of Employer.

4.22 Right of Way and Facilities

The Employer will acquire and provide land for Permanent Works and right of way (within DFCC's land). The contractor shall bear all cost and charges for special or temporary rights of way which he may require including those of access to the site. The contractor shall also obtain, at his risk and cost, any additional facility outside the site which he may require for the purpose of the Works the Employer/Engineer reserves the right to make use of these service roads/rights of way for itself or for other Contractors working in the area, as and when necessary without any payment to the Contractor.

4.22.1 Avoidance of Interference And Safety of Public

- i. The contractor shall not interfere unnecessarily or improperly with:
 - (a) the convenience of the public, or
 - (b) the access to and use of all roads, footpaths, waterways without the Prior permission of the Engineer.

The contractor shall indemnify and hold the Employer harmless against and from all damages, losses and expenses (including legal fees and expenses) resulting from any such unnecessary or improper interference.

- ii. During progress of work in any street or thoroughfare, the Contractor shall make adequate provision for the passage of traffic, for securing safe access to all premises approached from such street or thoroughfare and for any drainage, water supply or means of lighting which may be interrupted by reason of execution of Works and shall erect and maintain at his own cost save as provided in the Contract barriers, lights and other safeguards as prescribed by the Engineer for the regulation of traffic, and provide watchman necessary to prevent accidents. The Works shall in such cases be executed day and night if the Engineer so decides and so that the traffic is impeded for as short a time as possible.

- iii Existing road or watercourses shall not be blocked, cut through, altered, diverted or obstructed in anyway by the contractor, except with the permission of the Engineer. All compensation claimed for any unauthorized closure, cutting through, alteration, diversion or obstruction to such roads or water courses by the Contractor or his staff or Sub Contractors shall be recoverable from the Contractor by deduction from any sums which may become payable to him in terms of the Contract or any other amount due to him in any other Contract.
- iv. The contractor shall be responsible for taking all precautions to ensure safety of the public, whether on public or Employer's property and shall post such look-out men as may, in the opinion of the Engineer, be necessary to comply with the regulations appertaining to the work and to ensure safety.

4.23 Electricity, Water and Gas

The contractor shall be responsible for making his own arrangements at his own cost to obtain supply of water, electricity or gas for the works. The Employer where feasible may at his discretion assist the contractor in this respect.

The Employer may provide water, electricity or gas if available at the rates fixed by the Engineer but employer will not be responsible for any disruption of supply of these items and in that case, contractor will make his own arrangement to avoid suffering of progress of work.

4.24 Contractor's Equipment

4.24.1 All constructional plant and materials provided by the Contractor once brought by the contractor to site shall be deemed to be extensively intended for the execution of the works and Contractor shall not remove them without the consent in writing of the Engineer.

4.24.2 Deleted.

4.24.3 The employer shall not at any time be liable for the loss or damage to any of the Constructional Plant, Temporary works or Materials save as mentioned in Clauses 18.5 and 18.1

4.24.4 In respect of any Constructional Plant which the Contractor shall have imported for the purpose of the works, the employer will assist the Contractor, where required, in procuring any necessary Government consent for re-export of the same after completion of the works.

4.24.5 The Employer may assist (but is not obligated to) the Contractor, where required, in obtaining clearance through the Customs of Constructional plant, materials and other things required for the Works.

4.25 Protection of Environment

The contractor shall comply with the Safety, health and Environmental manual of the Employer and shall submit a detailed Site safety manual and Environmental plan as **specified in special Conditions of Contract**. Nothing extra shall be payable to the Contractor on this account and his tender price shall be inclusive of expenditure required to be incurred for working as per SHE Manual.

The Contractor shall take all reasonable steps to protect the Environment (both on and off site) and to limit damage and nuisance to people and property resulted from pollution, dust, noise and other results of his operations.

The Contractor shall ensure that emissions, surface discharges and effluent from the Contractor's activities shall not exceed the values indicated in the Specification and shall not exceed the values prescribed by applicable laws. The Contractor will ensure strict compliance of provisions in regard to protection of environment of Special Conditions of Contract.

4.26 Tools, Plants and Equipment supplied by the Employer

Except for any specific item mentioned in the Special Conditions of Contract, the Contractor shall provide all tools, plants and equipment for the works. In respect of such exceptional tools, plants and equipment committed to be provided by the Employer under terms and conditions specified in the Special Conditions of contract, the Contractor shall take all reasonable care and shall be responsible for all damages or loss caused by him, his representatives, sub-contractors or his workmen or others while they are in his charge. On completion of the works, the Contractor shall hand over the unused balance of the tools, plants and equipments to the Employer in good order and repair, fair wear and tear expected, and shall be responsible for any failure to account for the same or any damage done thereto. The decision of the Engineer as to the amount recoverable from the Contractor on this account shall be final and binding.

4.27 Sheds, Stores, Yards

It shall be the responsibility of the Contractor to provide at his own expense the required sheds, store houses, and yards for both Permanent and Temporary Works and provide free access to the Engineer and the Engineer's Representative who will have right of inspection including that of instructing the Contractor to remove a particular material from the stores and not to use the same on the works.

4.28 Use of Explosives

Explosives if required on the work shall be used by Contractor only with prior Approval of the Engineer and in the manner and to the extent permitted by him. The contractor shall be responsible for safe upkeep of such explosives in a special magazine as per the law on explosives as well as for taking all the precautions in the usage of the

explosives with proper license and at contractor's cost, sole risk and responsibility. The contractor shall hold the Employer harmless and indemnify for the above.

4.29 Employer's Material

4.29.1 Materials to be supplied by the Employer

Except for items mentioned in the Special Conditions of Contract, the Contractor shall provide all materials for the works. Material, if any, to be provided by Employer will be done only in a phased manner as per pre-approved program, against a bank guarantee for the value of the Material and at terms and conditions for issue, upkeep, usage, return and recovery of such materials as specified in special conditions of contract.

4.30 Discoveries

Any thing of historical importance or of significant interest discovered on the site shall be the property of the Employer. The Contractor shall notify the Engineer of such discoveries promptly and carry out Engineer's instructions for dealing with that.

4.31 Excavated materials

Materials of any kind obtained from execution of the site shall be property of the Employer and shall be disposed of as the Employer/Engineer may decide.

4.32 Housekeeping at the Site of works

The contractor shall at all times, maintain the site free from unnecessary obstructions and shall store or dispose neatly any Contractor's equipment and surplus materials. The contractor shall clear away and remove from site any wreckage, rubbish or Temporary Works no longer required.

On completion of the works, the contractor shall clear away and remove from site all constructional plant, surplus material and Temporary Works. He should leave the whole of the site and works in a clean, tidy and workmen like condition to the satisfaction of the Engineer. In case, the contractor even fails to clear the site as required within seven days from the issue of notice than site shall be cleared by the Engineer/Employer and cost thereof shall be recovered from the dues of the contractor.

On completion of work the contractor shall also clear away the labour camps, hutments and other related installations and restore the land to its original condition to the satisfaction of the Engineer within 45 days of the physical completion of the work, failing which it will be done by engineer on Contractors cost.

No final payment in settlement of the accounts for works shall be made till site clearance and clearance of labour camps etc. shall have been affected by the

Contractor in addition to any other condition necessary for settlement of such final payment.

4.33 Extraordinary Traffic

4.33.1 Avoidance of damage to roads

The contractor shall use every reasonable means to prevent any of the highways or bridges communicating with or on the routes to the site from being damaged or injured by any traffic of the contractor or any of his representatives or sub-contractors and, In particular, shall select routes, choose and use vehicles and restrict and distribute loads so that any such extraordinary traffic as will inevitably arise from the moving of plant and material from and to the site shall be limited., as far as reasonably possible, and so that no unnecessary damage or injury may be occasioned to such highways and bridges. Should any such damage or injury occur, the cost of rectification or reconstruction thereof shall be borne by the Contractor and he shall indemnify the Employer fully against any claim on this account.

4.33.2 Special Loads

Save in so far as the Contract otherwise provides, the contractor shall be responsible for and shall pay the cost of strengthening any bridges or altering or improving any road communicating with or on the routes to the site to facilitate the movement of Contractor's plant or materials or execution of Temporary works and the Contractor shall indemnify and keep indemnified the Employer against all claims for damage to any such road or bridge caused by such movement, including such claims as may be made directly against the employer, and shall negotiate and pay all claims arising solely out of such damage.

4.33.3 Settlement of Extraordinary Traffic Claims

If, notwithstanding **sub clause 4.33.1**, any damage occurs to any bridge or road communicating with or on the routes to the site arising from the transport of materials or plant, the contractor shall notify the engineer with a copy to the Employer, as soon as he becomes aware of such damage or as soon as he receives any claim from the authority entitles to make such claim. Where under any law or regulation the hauler of such materials or plant is required to indemnify the road authority against damage, the Employer shall not be liable for any costs, charges or expenses in respect thereof or in relation thereto. In other cases, the Employer shall negotiate the settlement and pay all sums due in respect of such claim and shall indemnify the Contractor in respect thereof and in respect of all claims, proceedings, damages, cost, charges and expenses in relation thereto. Provided that if and so far any such claim or part thereof is, in the opinion of the Engineer, due to any failure on the part of the contractor to observe and perform his obligations under **Sub Clause 4.33.1** and **4.33.2** then the amount, determined by the Engineer, after due consultation with the Employer and the Contractor, to be due to such failure shall be recoverable from the contractor by the Employer and may be deducted by the employer from any monies due or to become due to the contractor and the Engineer

shall notify the Contractor whenever a settlement is to be negotiated and, where any amount may be due from

4.34 Disclosure of Relationship

If the contractor or any partner of the contractor or Director of the Contractor's company is closely related to any of the Officers of the employer or the Engineer, or alternatively, if any close relative of an officer of the Employer or the Engineer has financial interest/stake in the Contractor's firm, the same shall be disclosed by the Contractor at the time of filling his tender. Any failure to disclose the interest involved, shall entitle the Employer to rescind the Contract, without payment of any compensation to the contractor. The Contractor shall note that he is prohibited from developing such interest during the Contract period without specific approval of the employer.

4.35 Opportunity for other Contractors

4.35.1 Reasonable Opportunity

The contractor shall, in accordance with the requirements of the Engineer, afford all reasonable facilities for any other contractor who may be carrying out, on or adjacent to any site any work not included in the Contract but required by the Employer, any utilities undertaking or other duly constituted authority.

The contractor shall, on the written request of the engineer, make available to any such other contractor or to the employer or any such authority, any roads or ways for the maintenance of which the contractor is responsible, for which no additional payment shall be made by the Employer.

4.35.2 Inspection of work of other Contractors

If any part of the contractor's work depends upon the work of another Contractor, he shall inspect and promptly report to the Engineer any defects in such work that may render it unsuitable for such proper execution. The contractor's failure to so inspect and report shall constitute acceptance of the other Contractor's work as fit and proper except as to defects which may develop in the other Contractor's work after execution of his work.

4.36 Progress Reports

Unless otherwise stated in special conditions of Contract, monthly progress shall be prepared by the Contractor and submitted to the Engineer in six copies. The first report shall cover the period up to the end of the first calendar month following the commencement of works in accordance with **sub clause 10.1**. Reports shall be submitted monthly thereafter, each within 7 days after the last day of the period to which it relates.

Reporting shall continue until the contractor has completed all work, which is known to be outstanding at the completion date stated in the completion Certificate for the works:

Each report shall include:

- a. Charts and detailed descriptions of progress, including each stage of design (**in accordance with sub clause 4.1**), contractor's document, procurement, manufacture, delivery to the site, construction, erection and testing: and including these stages for work by each subcontractor.
- b. Copies of quality assurance documents, test results and certificates of materials.
- c. List of notices given by either party.
- d. Safety statistics, including details of any hazardous incidents and activities relating to environmental aspects and public relations; and
- e. Comparisons of actual and planned progress, with details of any events or circumstances which may jeopardize the completion in accordance with Contract and measures being adopted to overcome delays.
- f. Labour welfare compliance report if desired by the Engineer in accordance with **sub clause 7.1**.
- g. Details of labour, engineers, tools & plants at site during the month under reference.
- h. Any problem/hindrances faced by the contractor in proper execution of the work.

5.0 CORRUPT OR FRAUDULENT PRACTICES

- 5.1 The employer requires that the bidders/contractors observe the highest standards of ethics during Tendering and execution of this contract. In pursuance with this policy, the employer:
 - a. Defines, for the purpose of these provisions, the terms set forth below as follows:
 - i. **"corrupt practice"** means the offering, giving, receiving or soliciting of anything of value to employer, engineer or any of their employees, influence in the procurement process or in contract execution; and
 - ii. **"fraudulent practice"** means a misrepresentation of facts in order to influence a procurement process or the execution of a contract to the detriment of the employer, and includes collusive practice among bidders (prior to or after bid submission) designed to establish bid prices at

artificial non-competitive levels and to deprive the employer of the benefits of free and open competition.

- b. will reject the tender for the work or terminate the Contract if the employer determines that the bidder/Contractor has engaged in corrupt or fraudulent practices.
- c. Will declare a Contractor ineligible, either indefinitely or for a stated period of time, to be awarded a Contract/s if he at any time determines that the Contractor has engaged in corrupt or fraudulent practices.

5.2 Action against Contractor on termination of Contract under this clause

In the event of termination of contract under sub clause 5.1 action will be taken in terms of clause 11. 4.2.

6.0 INSURANCE

6.1 Requirements

Before commencing execution of works, unless stated otherwise in the special conditions of Contract, it shall be obligatory for the contractor to obtain at his own cost stipulated insurance cover under the following requirements:

- i. Contractor's all risk and third party cover.
- ii. Liability under **workmen's compensation Act 1923, Minimum wages Act,1948 and Contract labour (Regulation and Abolition) Act 1970.**
- iii. Accidents to staff, engineers, supervisors, and others who are not governed by Workmen's Compensation Act.
- iv. Damage to material, machinery and works due to fire, theft, accident etc.
- v. Any other risk may be specified in the special Conditions of contract.

6.2 Policy in Joint names of Contractor and Employer

The policy referred to under **Sub clause 6.1 (i)** above shall be obtained in the joint names of the Contractor and the Employer and shall inter-alia provide coverage against the following, arising out of or in connection with execution of Works, their maintenance and performance of the contract.

- i. Loss of life or injury involving public, employee of the contractor, or that of Employer and Engineer, labour etc.
- ii. Injury, loss or damages to the works or property belonging to public, government bodies, local authorities, utility organizations, contractors, employer or others.

6.3 Currency of Policy

The policies shall remain in force through out the period of execution of the works and till the expiry of the defects Liability period. If the contractor fails to effect or keep in force or provide adequate cover in the insurance policies mentioned in **sub Clause 6.1**, or any other insurance he might be required to effect under the contract, then, the Employer may effect and keep in force any such insurance or further insurance and the cost and expenses incurred by him in this regard shall be deductible from payments due to the contractor or from the Contractor's Performance security.

The contractor will be responsible to indemnify the employer to pay damages if any becoming recoverable during the period of expiry of the policy and its renewal. It is a condition of the contract that contractor will renew the policy well in time and

employer will not be held responsible if policy is not renewed by employer due to failure of the contractor.

7.0 FACILITIES FOR LABOUR

7.1 Provision of accommodation

The contractor shall provide at his own expense, all necessary accommodation and the welfare facilities for his stag and labour. This includes good practices like provision of temporary crèche (Bal Mandir) where 50 or more women are employed at a time. All accommodation shall be maintained in a clean and sanitary condition, by the contractor at his cost and provision of law of land in force and enacted from time to time.

The contractor shall have a labour welfare Organisation which shall be responsible for labour welfare and compliance with prevalent labour laws, statutes and guidelines. In this context, the contractor is also required to familiarize himself with DFCC labour welfare Fund Rules as specified in Special conditions of Contract and comply with the same.

The Contractor shall prepare and submit compliance reports of adherence to labour laws as and when desired by the Engineer.

7.2 Compliance with Rules for Employment of labour

The contractor shall be responsible for compliance with all the statutes, guidelines and rules for the time being in force regarding engagement of labour by the Contractor or through his petty Contractors or Sub contractors. The contractor shall also ensure that he or his sub-contractors fully comply with all labour laws relating to engagement of labour and other related labour laws as in force and enacted from time to time.

7.3 Labour to be Contractor"s employee

If the contractor directly or through petty contractors or sub contractors supplies any labour to be used wholly or partly under the direct orders and control of the Engineer or the Employer, whether in connection with any work being executed by the Contractor or otherwise for the purposes of the Employer, such labour shall, for the purpose of this clause, be deemed to be persons employed by the contractor. The contractor shall indemnify the employer for any claim or payment becoming payable to labourers due to his failure to comply with labour laws.

7.4 Preservation of Peace

The contractor shall be responsible for preservation of peace at the site and its neighborhood by Contractor"s employees, Representatives, petty contractors, sub contractors etc. In case, deployment of a special Police Force, becomes necessary at or near site, during the tenure of works, the expenses for the same shall be borne by the contractor.

7.5 Health and safety

Precautions shall be taken by the contractor to ensure the health and safety of his staff and labour. The contractor shall in collaboration with and to the requirements of the local health authorities, ensure that medical staff, first aid facilities, other medical facilities, sick bay and ambulance are available at the accommodation and on the site at all times, and that suitable arrangements are made for all necessary welfare and hygiene requirements and for the prevention of epidemics. The contractor shall maintain records and make reports concerning health, safety and welfare of

persons and damage to property, as per the Engineer's requirement and will ensure complete compliance with relevant clauses of Employer's safety, Health and Environmental manual (SHE manual), which shall be binding on the contract.

7.6 Use of Intoxicants

The contractor shall ensure that no labour or employee is permitted to work at the Site in an intoxicated state or under influence of drugs.

8.0 Staff and Labour

8.1

8.2 Engagement

The contractor shall make his own arrangements for the engagement of all staff and labour at its own cost.

8.3 Labour Laws

In dealing with labour and employees, the Contractor and his sub-Contractors (including piece rate and petty Contractor) shall comply fully with all laws and statutory regulations pertaining to engagement, payment and upkeep of the labour in India.

8.4 Rates of Wages and Conditions of Labour

Full compliance of statutory requirements apart, the Contractor shall pay rates of wages and observe conditions of labour not less favourable than those established for the trade or the industry where the work is carried out.

8.4 Working Hours

The contractor if required, after notifying the Engineer shall carry out Works during night hour or in shifts unless specifically provided in the contract. No increase in rates or extra payment shall be admissible for night work. The Contractor shall provide adequate lighting and safety arrangement at his own cost.

8.5 Persons in the service/retired of employer/engineer

a. the contractor and/or any of his sub contractors shall not recruit or attempt to recruit, staff and labour from amongst the employer and the Engineers personnel.

b. Employment of Retired Officer/Engineer

The contractor and/or any of his sub contractors at the Tendering stage or during constructing stage will not employ any retired employee of Employer or Engineer of the Employer in any capacity unless such employee has completed at least two years post retirement period or has obtained the no-subjection certificate from Employer for being employed with the contractor. It will be responsibility of the contractor to collect the Employer's no objection certificate from such retired employee and submit the same back to the employer.

c. In case of non compliance of above, in addition to any or several of the courses, referred in sub-clauses 11.4.1 and 11.4.2 being adopted by the Employer the contractor on termination of the contract for the aforesaid reasons will have no claim whatsoever against the employer.

8.6 Claim on account of violation of Labour Laws

The contractor shall be solely accountable for violation of any labour law by it, its petty contractors or sub contractors and will pay any such claim/damage to the authorities forthwith on demand. If any moneys shall, as a result of any instructions,

directions or decisions from the Authorities or claim or application made under any of the labour laws or regulations, be directed to be paid by the Employer, such moneys shall be deemed to be moneys payable to the Employer by the Contractor and he will pay the same to the Employer forthwith on demand, without demur and without asking for any reasons/explanations from the Employer. On failure of the contractor to repay the Employer any moneys paid or to be paid by it as aforesaid within seven days after the same shall have been demanded, the Employer shall be entitled to recover the amount from any moneys due or incurring to the contractor under this or any other contract with the Employer.

8.7 Report of accidents to labour.

The Contractor shall be responsible for safety of all employees, employed by him on works, directly or through petty contractors or sub-contractors, and shall report accidents to any of them, however, and wherever occurring on Works, to the Engineer or the Engineers Representative, and shall make every arrangement to render all possible assistance and to provide prompt and proper medical attention. The compensation for affected Workers or their relatives shall be paid by the contractor in such cases with utmost expeditious in accordance with the Workmen's Compensation Act.

9.0 QUALITY CONTROL

The contractor shall institute a quality assurance system to demonstrate compliance with the requirements of the contract. The system shall be in accordance with the requirements in the Special conditions of Contract. The Engineer shall be entitled to audit any respect of the system. Compliance with the quality assurance system shall not relieve the contractor of any of his duties, obligations or responsibility in the contract.

9.1 Manner of Execution

All plant, materials, goods and workmanship shall be

- a. of the respective kinds described in the contract and in accordance with the Engineer's instructions.
- b. Subject from time to time to such Tests as the Engineer may require at the place of manufacture, fabrication, or on the site or any such other place or places as may be specified in the contract.

9.2 Contractor to provide everything necessary for Testing

The Contractor shall provide such assistance, instruments, machines, labour and materials as may be necessary for examining, measuring and testing any work and the quality, weight or quantity of any material used and shall supply samples of Materials before incorporation in the works for testing as maybe selected and required by the Engineer.

9.3 Sources of Materials

Sources of materials being supplied shall be intimated to the Engineer and are subject to his approval. Materials that are not specified in the contract document shall conform to the relevant Indian Standards or in their absence conform to any International Standard approved by the Engineer.

9.4 Supply of Sample

Save as otherwise expressly provided in the contract, sample shall be supplied by the Contractor. The contractor will however, be fully responsible to comply with specifications as per contract.

9.5 Cost of Test

The cost of making any test shall be borne by the Contractor if such test is clearly intended by or provided for in the contract. If any test is ordered by the Engineer which is either:

- a. not so intended by or provided for in the contract, or
- b. though so intended or provided for is ordered by the Engineer to be carried out by an independent person at any place other than the site or the place of manufacture or fabrication of the materials tested.

Then the cost of such Test shall be borne by the Employer. If, however, the Test shows the workmanship or Materials not to be in accordance with the Contract, then the cost of such Test will be borne by the Contractor.

9.6 Correction of defects.

- i. if as a result of the examination, inspection, measurement or testing, any plant, materials or workmanship is found to be defective or not in accordance with the Contract, the Engineer may reject the same by giving notice to the contractor with the reasons. The contractor shall then promptly make good the defect and ensure that the rejected item complies with the contract.

ii.

Notwithstanding any previous test or certification, the Engineer shall have the authority to instruct the contractor.

- a. to remove from the site and replace any plant or materials which is not in accordance with the Contract.
 - b. Remove and re-execute any other work which is not in accordance with the contract.
 - c. Execute any work which is urgently required for the safety of the works, whether because of an accident, unforeseeable event or otherwise.
- iii. In case of default on the part of the contractor in carrying out such order, the Employer shall be entitled to employ and pay other parties, to carry out the same, and all expenses consequent thereof or incidental thereto, shall be recoverable from the contractor or may be deducted by the Employer from any money which may be due to the Contractor.

9.7 COVERING UP OF WORK

9.7.1 Examination of work before covering up

A work or part of work shall be covered up or put out of view, in the presence of the Engineer or the Engineer's Representative.

9.7.2 Cost of uncovering the work already covered up

The contractor shall uncover any part or parts of the works, or make openings in or through the same, as the Engineer may from time to time direct, and shall reinstate and make good such part or parts, to the satisfaction of the Engineer. If any such part or parts, to the satisfaction of the Engineer. If any such part or parts have been covered up, or put out of view after compliance with the requirement of **Sub Clause 9.7.1** and the works are found to be executed in accordance with the Contract, the expenses of

uncovering, make openings in or through, reinstating and making good the same, shall be borne by the Contractor.

10.0 TIME MANAGEMENT

10.1.1 SIGNING OF AGREEMENT

The Engineer/Employer shall prepare the Agreement in the Performa prescribed annexed as Annexure V of these conditions, duly incorporating all the terms of agreement between the two parties. However, the successful tenderer shall arrange the necessary Non-judicial stamp papers of requisite value and attend the DFCC office to execute the agreement within two weeks of the date of receipt of the "Letter of acceptance" duly acknowledged and signed by the successful tenderer. Up on executing the agreement the original agreement will be retained by the employer and one copy of the Agreement duly signed by the Employer and the Contractor through their authorised signatories, will be supplied by the Employer to the contractor.

10.1.2 Commencement of work

The contractor shall commence the works on the date specified in the letter of Acceptance or if no date is specified in the Letter of acceptance, on the date specified in an instruction in writing to that effect from the Engineer. Thereafter, the contractor shall proceed with due diligence, without delay, and in accordance with the programme or any revised or modified programme of the works. Time will be the essence of the contract and time for completion shall run from the date the contractor is to commence the works under this clause.

10.2 Programme of Work

The contractor shall submit a detailed programme to the Engineer after receipt of the Letter of acceptance, not later than 28 days from the date of receipt of Letter of Acceptance. The contractor shall also submit a revised programme whenever the Engineer finds that the previous programme is inconsistent with actual progress or with the contractor's obligations. Each program shall include:

- a. the order and procedure in which the Contractor proposes to carry out the works
- b. the sequence and timing of inspections and tests specified in the contract.
- c. A supporting report which includes a general description of the method which the contractor intends to adopt and of major stages in the execution of the works.

No significant alterations to the programme or to such arrangements and methods shall be made without obtaining the approval of the Engineer. Approval by the Engineer to the Programme of Works shall not relieve the Contractor of any of his responsibilities or obligations under the contract.

10.3 Handing Over, Possession and use of Site

No land belonging to or in possession of the Employer shall be occupied without the permission of the Engineer or the Employer. The Contractor shall not use, or allow the site to be used for any purpose other than that of executing the works.

The employer shall give the contractor, right to or right of access to or possession of all parts of site as the case may be from time to time as stated to in the contract and as conforming with the requirement of the programme of the works.

In the event of any failure or delay by the employer or the engineer, to hand over to the contractor the possession of site necessary for execution of works then such

failure or delay, shall in no way affect or vitiate the contract or alter the character thereof, or entitle the contractor to damages or compensation thereof but in any such case, the engineer shall grant such extension or extensions of time to complete the work as in his opinion is/are reasonable without penalty and with PVC as applicable.

10.4 Access To Site of work

10.4.1 Access for Engineer The Contractor shall allow the Engineer or the Engineer's representative, at all times access to the site, and to any place where work in connection with the Contract is being carried out or is intended to be carried out and to any place where materials or plant are being manufactured, fabricated and/or assembled for the works. The contractor shall ensure that sub contracts if any shall contain provisions entitling the Engineer or any person authorized by him to have such access.

10.4.2. Access Road and Way Leaves Providing access roads/way leaves to the site will be contractor's responsibility at his own cost.

10.5 Time for Completion

The time allowed for execution and completion of the works or part of the works as specified in the contract, in accordance with contract conditions, shall be the essence on the part of the contractor subject to any requirement in the contract as to completion of any portion or portions of the works before completion of the whole work. The Contractor shall fully and finally complete the whole of the works comprised in the contract.

10.5.1 Time to continue to be the essence of the Contract in spite of extension of time.

It is an agreed term of the contract that notwithstanding grant of extension of time under any of the sub-clauses mentioned herein, time shall continue to be the essence of contract on the part of the Contractor.

10.6 Delay

Failure or delay by the employer or the Engineer, to hand over to the contractor the site necessary for execution of works, or any part of the works, or to give necessary notice to commence the works, or to provide necessary drawings or instructions or clarifications or to supply any material, plant or machinery, which under the contract, is the responsibility of the Employer, shall in no way affect or vitiate the contract or alter the character thereof or entitle the contractor to damages or compensation thereof but in any such case, the Engineer shall extend the time period for the completion of the contract. As in his opinion is/are reasonable.

In case of delay on the part of the contractor, the contractor shall be liable to pay liquidated damages in addition to any other compensation for the damages suffered by the Employer. This is without prejudice to the right of the Employer to rescind the contract in terms of **Clause 11.4**

10.7 Extension of time for completion not on Contractor's fault

The time with which, the works or any phase or part of the work is to be completed, may be extended by the Engineer by such further period of time as may reasonably reflect delay in completion of works notwithstanding due diligence and the taking of all reasonable steps by the contractor to avoid or reduce such delay, caused by any of the following events.

- i. **“Force Majeure”** referred to in **clause 19.0**
- ii. the issue of any instruction or major violation by the Engineer.
- iii. The contractor not being given possession of or access to the site or any part.
- iv. Instruction of the engineer to suspend the works and the Contractor not being in default as to reasons of suspension.
- v. Acts or omissions of other contractors in executing the work not forming part of this contract and on whose performance, the performance of the contractor necessarily depends.
- vi. Any act of prevention or breach of contract by the Employer and not mentioned in this clause.
- vii. Any order of Court restraining the performance of the contract in full or in any part thereof.
- viii. Due to extra or additional work ordered by the engineer for execution.
- ix. Due to modifications, if any in the contract which necessitates extension of time
- .x. Any other event or occurrence which, according to the employer is not due to the contractor’s failure or fault.

However, the contractor shall not be entitled to any extension of time where the instructions or acts of the Employer or the Engineer are necessitated by or intended to cure any default of or breach of contract by the contractor. If the contractor considers himself to be entitled to an extension of time for completion, he shall give notice to the Engineer of such intention as soon as possible and in any event within 28 days of the start of the event giving rise to the delay, together with any notice required by the contract and relevant to such clause.

10.7.1 Contractor to apply for extension of time

In case, the contractor feels that work cannot be completed within the specified period in the contract than he shall be responsible for requesting extension of the date as he may consider necessary as soon as cause thereof shall arise and in any case not less than one month before the expiry of the original date for completion of the works giving detailed reasons for delay in completion of the work.

10.8 Extension of time for delay due to Contractor and Liquidated damage

10.8.1 Extension of time for delays due to contractor

If the delay in the completion of the whole works or a portion of the works, for which an earlier completion period is stipulated, is due to the contractor’s failure or fault, and the Engineer is of the view that the remaining works or the portions of works can be completed by the contractor in a reasonable and acceptable short time, then, the Engineer may allow the contractor extension or further extension of time at its discretion with liquidated damages, for completion as he may decide.

10.8.2 Liquidated damages

In case the Engineer decides to extend the contract with liquidated damages for delays due to contractor, in that case without prejudice to any other right or remedy available to the Employer, the liquidated damages shall be levied at the rate of 0.1 percent of the contract value for the Works for each week or part of the week the contractor is in default subject to a maximum of 5% of the total Contract value.

If the delay relates to a portion of the works with a separate and earlier completion period, the contract value shall be restricted to the cost of that portion of the works only.

The decision of the Engineer as to the liquidated Damages payable by the Contractor under this clause shall be final and binding.

10.8.2.1 Consequences of Objection by the contractor for grant of extension with LD

In case the contractor does not agree/raise any objection to the grant of extension with levy of the liquidated damages then action will be taken under clause 11.4.2 for termination of contract. In case no objection is raised by the contractor within 7 days of issue of sanction for extension then it will be deemed that contractor has accepted extension with LD. No claim/dispute shall be entertained later on this account.

10.9 Rate of Progress

If for any reason which does not entitle the contractor to an extension of time, the rate of progress of the works is at any time, in the opinion of the Engineer too slow to ensure timely completion of the works or any part thereof, the Engineer may so notify the contractor in writing. The contractor shall thereupon take such steps as are necessary or in default of taking such steps, shall take such steps as the Engineer may reasonably instruct to expedite progress so as to complete the works or any part thereof within date of completion. The contractor shall not be entitled to any additional payment for taking such steps. If any step taken by the Contractor in meeting his obligations under this Sub clause cause the Employer to incur additional costs, such costs shall be recoverable from the Contractor and shall be deducted by the Employer from any monies due, or become to the Contractor.

10.10 Suspension

10.10.1 Suspension of work.

The Contractor shall, on the order of the Engineer, suspend the works or any part thereof, for such time and in such manner, as the Engineer may consider necessary, and shall during such suspension properly protect and secure the works as it is necessary in the opinion of the Engineer.

The Contractor shall not be entitled to extra cost, damages or loss of any anticipated profit during the period of suspension of work. However, the contractor shall be entitled to such extension of time for completion of work, as the Engineer may consider proper, having regard to the period of such suspensions.

If the suspension of the whole of the works or any part or group of the works exceeds 12 weeks, the contractor shall have the option to ask for closure of the contract, or deletion from the Contract of that part of works which has been suspended by giving 28 days" notice to the Engineer for restart of work. If no permission is granted then treat suspension as default of employer and terminate/omit that part of the work/contract after giving 14 days" notice.

11 TERMINATION OF CONTRACT

11.1 Termination for Employer"s Convenience

- (i) The Employer may terminate the Contract by giving notice to the Contractor with effect from the date stated in the notice, for its convenience and without need to give reasons.
- (ii) The Contractor must comply with the instructions of the Employer to wind down and stop work and the Contractor must leave the Site by the date stated in the termination notice and remove all Temporary Works it has brought on to the Site

- except for those items identified in the termination notice as to be retained on the Site.
- (iii) After termination under **Clause 11.1**, subject to its other rights under the Contract, the Employer shall pay to the Contractor:
 - a. the value of approved Materials actually brought to the Site and reasonably required to execute the Works during next three months, as per approved programme, and
 - b. Value of Work completed up-to-date by the Contractor at rates specified in the Contract, after taking into account any deductions, retentions, setoff
 - c. In addition, a sum not exceeding 2% (two percent) of the value of the work remaining incomplete on the date of Termination notice taking effect after adjusting the variation in cost of work as permissible under the contract.
 - (iv) the payment as above are full compensation for termination under this clause and the Contractor has no claim for damages or other entitlements whether under the Contract or otherwise.
 - (v) Any remaining tools, plants, equipment and surplus Materials of Employer with Contractor will be returned to the Employer at Employer's depot at Contractor's cost. In case of failure of the Contractor to do so, the Employer will be entitled to recover their cost from the Contractor from the amount becoming due to the Contractor or from any other money due in any other Contracts. The decision of the Engineer of amount to be recovered will be final decision and full credit at rates initially charged to the Contractor shall be allowed for such Materials. Similarly the Employer shall be entitled to recover the cost of unreturned material, plant, equipment and tools from the Contractor where such Materials have been supplied free of cost and plant, equipment and tools free of cost or on lease basis to the Contractor as stipulated in the Special Conditions of Contract.
 - (vi) Provided further, that any diminution of quantities against individual items of the Contract, merely as a variation when the work is completed, shall not constitute foreclosure of Contract in terms of this clause, and no compensation or payment whatsoever as per this clause will be due or payable to the Contractor on that account.
 - (vii) The Contract shall only be settled as above after furnishing no claim certificate by the Contractor and relieving the employer from all contractual liabilities under the contract.

11.2 Termination for Default of Employer

- i. In the event of the Employer:
 - a) failing to pay to the Contractor the amount due without reasonable cause, under any certificate of the Engineer, within ninety days after the same shall have become due under the terms of the Contract, subject to any deduction that the Employer is entitled to make under the Contract, or
 - b) becoming bankrupt or, being a company, going into liquidation, other than for the purpose of a scheme of reconstruction or amalgamationthen, the Contractor may give notice requiring the Employer to remedy the default within 28 days after receipt of the notice. If the Employer fails to

remedy the default or fails to propose steps reasonably acceptable to the Contractor to do so and in that case, the Contractor may terminate the Contract after issue of 14 days" notice to the Employer with a copy to the Engineer. In this case, the Contractor shall be compensated as per **Sub clause (iii) of 11.1**

The Engineer"s decision on the account payable on this account shall be final and binding.

11.3 Rescission of Contract Due To Death Of Contractor/Partner

If a Tenderer expires after the submission of his tender or after the acceptance of his tender, The DFCC shall deem such tender as cancelled without financial repercussions on each side. If a partner of a firm expires, after the submission of their tender or after the acceptance of their tender, the DFCC shall deem such tender as cancelled without financial repercussions on each side unless the firm retains its character. The heir of the Contractor or remaining partner of the firm shall only be paid for the work executed at site and nothing extra shall be paid.

11.4 Termination Of Contract Due To Contractor"s Default

11.4.1 Notice to Correct

If the Contractor fails to carry out any obligation under the Contract, the Engineer may by notice require the Contractor to make good the failure and remedy it within a specified time as the Engineer may deem reasonable.

11.4.2 Conditions Leading To Termination Of Contract

The Employer shall be entitled to terminate the Contract if the Contractor or any one of its constituents,

- a) fails to comply with a notice under Sub clause 11.4.1 above.
- b) abandons or repudiates the Contract
- c) without reasonable excuse fails to commence the Works in accordance with the Contract
- d) sub contracts the whole of the Works or assigns the Contract without approval of the Employer as per provision of the contract.
- e) becomes bankrupt or insolvent or goes into liquidation except voluntary liquidation for the purpose of amalgamation or reconstruction
- f) persistently disregards instructions of the Engineer or contravenes any provisions of the Contract,
- g) fails to adhere to the agreed programme of work by margin of 10% of the stipulated period or 21 days, whichever is earlier, or fails to complete the Works or parts of the Works within the stipulated or extended period of completion, or is unlikely to complete the whole Work or part thereof within time because of poor record of progress;
- h) fails to remove Materials from the Site, or pull down and replace work, after receiving notice from the Engineer to the effect that the said Materials or Works have been condemned or rejected.
- i) fails to take steps to employ competent and/or additional staff and labour.

- j) fails to afford the Engineer or his representative proper facilities for inspecting the Works or any part thereof.
- k) indulges in corrupt or fraudulent practices as explained in Clause 5.1 (a) (ii) of this GCC
- l) does not agree with the decision of the Engineer to grant extension with LD under Clause 10.8.2 of this GCC.
- m) fails to comply with provision of clause 8.5 of this GCC.
- n) fails to advise change in constitution of the firm and insist for this change if the same is not acceptable to the Engineer/Employer as per clause 21.4 of this GCC.

In any of these events or circumstances, the Employer may upon giving 14 days notice to the Contractor, terminate the Contract and expel the Contractor from the Site. The Employer shall give a 2 days notice to the Contractor towards the end of this 14 day period following which the Contractor shall remove all his Plants and Machinery from the site within these two days. The Employer's election to terminate the Contract shall not prejudice any other rights of the Employer under the Contract.

After termination of the contract, the Engineer/Employer shall be entitled to get the balance work completed by another agency, the manner & method in which such work is completed, shall be in the entire discretion of the Engineer whose decision shall be final.

On termination of Contract due to Contractor's default

- a. On termination of the contract, the security deposit of the contractor shall be forfeited and the performance guarantee shall be encashed and the balance work shall be got done without risk & cost of the original contractor.
- b. Final bill of the terminated contract shall be drawn and any legitimate amount due to the contractor after making necessary deductions as per provisions of contract shall be released on furnishing a no claim certificate relieving the employer of contractual liabilities under the contract.

11.4.3 Non-exercise of power not to constitute waiver.

Provided always that in case any of the powers conferred upon the Employer by Sub Clause 11.4.1 and sub clause 11.4.2 above, shall have become exercisable, and the same may not have been exercised, the non-exercise thereof shall not constitute waiver of any of the conditions thereof.

11.4.4 Execution of balance work by another agency.

In case of termination, original contractor shall be debarred from participating in the tender for executing the balance work. If the failed contractor is a JV or a partnership firm, then every member/partner of such a firm would be debarred from participating in the tender for the balance work either in his/her individual capacity or as a partner of any other JV/partnership firm.

12.0 VARIATIONS

12.1 Authority to order modifications

Engineer acting on behalf of Employer shall have the authority to make any variation of the form, quality or quantity of the Works or part thereof, which in his opinion may be necessary at any time before whole completion of work. The Contractor shall execute and to be bound by each variation ordered by the Engineer and shall do any of the following:

- a) increase or decrease the quantity of any item or part of work included in the Contract.
- b) Omit any such work included in the Contract.
- c) add a new part or item of the Work not included in the Contract.
- d) change the character or quality or kind of any such work.
- e) Change the levels, lines, positions and dimensions of any part of the Works.
- f) Execute additional work of any kind necessary for the completion of the Works or
- g) change any specified sequence or timing of construction of any part of the Works.

No such variation shall in any way vitiate or invalidate the Contract. The decision of the Engineer under this clause shall be final.

12.2 Variations to be authorized in writing.

All Variations shall be recorded in a written instruction/s from the Engineer and shall not be implemented by the Contractor without such an instruction in writing from the Engineer. In urgent cases, verbal instructions of the engineer shall be implemented but the same must be confirmed immediately thereafter. On receipt of an instruction from the Engineer to execute variation, the Contractor shall forthwith proceed to carry out the variation and be bound to these conditions in doing so as if such variation was stated in the Contract. The work shall not be delayed for fixing the rates/prices under this Sub clause.

12.3 Value Engineering or Innovation

12.3.1 Value Engineering Proposals

The Contractor may submit to the Employer, in writing at its own cost, value engineering proposals for modifying the Specifications for the purpose of reducing construction costs. The value engineering proposal shall not impair the essential character, functions or characteristics or the Work, including service life, economy of operation, ease of maintenance, desired appearance, or design and safety standards.

12.3.2 Value Engineering Proposals – Contents

If the Employer requires it, and if the Contractor wants to proceed with the proposal, the Contractor must provide (at no cost to the Employer) a detailed report, acceptable to the Employer and which shall include:

- (a) a general description of the original Contract requirements for the Works and the proposed changes.
- (b) an itemized list of all the proposed modifications to the Drawings and Specifications.
- (c) an itemized list of all Work and goods affected by the value engineering proposal.
- (d) a detailed estimate of the construction cost based on the original Contract requirements and based on the proposed changes.
- (e) any resultant time extensions or reductions for the Contract.
- (f) statement to the extent of minimum saving expected. The Contractor's cost of preparing value engineering proposal shall be excluded in determining the estimated net savings in construction basis.

12.3.3 Value Engineering Proposals – Employer Review

The Employer may in his sole discretion, accept or reject the value engineering proposal or any part thereof and determine the estimated net saving in the construction cost. The Employer shall not be liable for delays or damages to the Contractor due to any failure of the Employer to accept or act upon any value engineering proposal submitted pursuant to this Clause. If the submitted value engineering proposal is similar to a change/variation already under consideration by the Employer, the Employer may make such changes as deemed fit with no extra cost.

12.3.4 Amendments – Employer Issuance

If the value engineering proposal is acceptable to the Employer in whole or in parts, it will accept by execution of an amendment. Such amendment shall identify all the changes in the Specifications, Contract Period etc, shall specify net savings on construction costs and shall provide that the Contractor be paid 30% of saved net savings amount based on the difference between the amount contained in the Contract and the estimated net savings both as determined by the Employer.

12.3.5 Contractor's Acceptance and Payment.

The Contractor shall either accept or reject any proposed amendment executed by the Employer pursuant to this section within 5 working days of its receipt date from the Employer. If the Contractor does not reject the same in the period stipulated above, the amendments shall be deemed to be accepted by the Contractor and shall become a variation to the Contract. The Contractor's acceptance shall be unconditional and compensation of 30% of the value shall constitute the full compensation. The Contractor will be paid this 30% but not more at the time of final payment on Engineer's certification that the net savings as intended by value engineering have been achieved.

12.4 Variation In The Bill Of Quantities.

The quantities of items shown in the Bill of Quantities are approximate, and liable to vary during the actual execution of the Work. Some items/group of items may have to be altered, added or omitted. The Contractor shall be bound to carry out and complete the stipulated work as instructed by the

Engineer, irrespective of the magnitude of variations including additions, alterations or omissions in the Bill of Quantities, individual items or group of items, specified in the Bill of Quantities.

The procedure detailed below shall be adopted for dealing with variations in quantities during execution of works contracts:

1. Individual NS items in contracts shall be operated with variation of plus or minus 25% and payment would be made as per the agreement rate. For this, no finance concurrence would be required.
2. In case an increase in quantity of an individual item by more than 25% of the agreement quantity is considered unavoidable; the same shall be got executed by floating a fresh tender. If floating a fresh tender or operating that item is considered not practicable, quantity of that item may be operated in excess of 125% of the agreement quantity subject to the following conditions:
 - i. Operation of an item by more than 125% of the agreement quantity needs the approval of an officer of the rank not less than S.S. Grade;
 - a) Quantities operated in excess of 125% but upto 140% of the agreement quantity of the concerned item, shall be paid at 98% of the rate awarded for that item in that particular tender;
 - b) Quantities operated in excess of 140% but upto 150% of the agreement quantity of the concerned item shall be paid at 96% of the rate awarded for that item in that particular tender;
 - c) Variation in quantities of individual items beyond 150% will be prohibited and would be permitted only in exceptional unavoidable circumstances with the concurrence of associate finance and shall be paid at 96% of the rate awarded for that item in that particular tender.
 - ii. The variation in quantities as per the above formula will apply only to the Individual items of the contract and not on the overall contract value.
 - iii. Execution of quantities beyond 150% of the overall agreemental value should not be permitted and, if found necessary, should be only through fresh tenders or by negotiating with existing contractor.
3. In cases where decrease in involved during execution of contract:
 - a) The contract signing authority can decrease the items upto 25% of individual item without finance concurrence.
 - b) For decrease beyond 25% for individual items or 25% of contract agreement value, the approval of Competent Authority may be taken, after obtaining „No Claim Certificate“ from the contractor and with finance concurrence, giving detailed reasons for each such decrease in the quantities.
 - c) It should be certified that the work proposed to be reduced will not be required in the same work.
4. The limit for varying quantities for minor value items shall be 100% (as against 25% prescribed for other items). A minor value item for this

purpose is defined as an item whose original agreement value is less than 1% of the total original agreement value.

5. No such quantity variation limit shall apply for foundation items.

However, if the Engineer or the Employer so directs the Contractor shall be bound to carry out any such additional quantities beyond the limits stated above original quantities and or new items and the disagreement or the difference regarding rates to be paid for the same, shall be settled in the manner laid down under the conditions for the settlement of dispute.

Daywork:

The Engineer may, if in his opinion it is necessary or desirable issue an instruction that any varied work or new item of work shall be executed on a daywork basis. The Contractor shall be then paid for such item based on the actual expenditure made on daily basis under the terms set out in daywork schedule included in the Contract and at the rates and prices affixed by him in the Tender.

The Contractor shall furnish such receipts or other vouchers as may be necessary to prove the amounts paid and before ordering Materials shall submit to the Engineer the quotations for the same for his Approval. The Contractor shall furnish to the Engineer or his representative, a daily list (with name, occupation and shift time) of all workmen deployed on the work, in duplicate for checking and Approval. The Contractor shall submit to the Engineer a priced statement of labour, material, plant, etc., actually used on the work, together with the output of work at the end of each calendar month and / or as soon as the work is completed. The payment for the new item of work will be certified by the Engineer based on this submission.

13.0 PRICE VARIATION

13.1 The rates quoted by tenderer and accepted by DFCCIL shall hold good till the completion of the work and no additional individual claim will be admissible on account of fluctuation in market rates, increase in taxes/ any other levies/- tolls etc. except that payment/recovery for overall market situation shall be made as per **Price Variation Clause (for tenders of value more than Rs.50 (Fifty) Lakhs)** given in para below:

13.2 No cognizance will be given for any sort of fluctuations in taxes and other market conditions etc. for any individual item for the purpose of making adjustment in payments. The contract shall, however, be governed by the general price variation clause as under :

13.3 Adjustment for variation in prices of material, labour, fuel, explosives, detonators shall be determined in the manner prescribed below :

13.4 The percentage component of various items in contract on which variation in prices shall be admissible as prescribed for the respective category of work as shown in the statement given below:

13.5(a) Earthwork Contract

Labour component	50%
Fuel component	20%
Other material components	15%
Fixed component	15% *

Ballast and Quarry Products Contracts

Labour component	55%
Fuel component	15%
Other material components	15%
Fixed component	15%*

(B) Other works Contracts

Labour component	30%
Material component	25%
Fuel component	15%
Fixed component	30%*

*Will not be considered for any price variation.

The above weightage will be applied on the value arrived at after deducting the cost of steel and cement from the total contract value.

13.6 (A-1) The amount of variation in prices in the several components (labour material etc.) shall be worked out by the following formulae (except cost of steel and cement supplied by contractor as a separate NS item) :-

$$(i) \quad L = \frac{R \times (I-IO)}{100} \times \frac{P}{IO}$$

$$(ii) \quad M = \frac{R \times (W-WO)}{100} \times \frac{Q}{WO}$$

$$(iii) \quad U = \frac{R \times (F-FO)}{100} \times \frac{Z}{FO}$$

$$(iv) \quad X = \frac{R \times (DE-DO)}{EO} \times \frac{S}{100} \quad (v)$$

$$N = \frac{R \times (D-DO)}{DO} \times \frac{T}{100}$$

L – Amount of Price Variation in Labour

M – Amount of Price Variation in Materials

U – Amount of Price Variation in Fuel

X – Amount of price variation in Explosives

N – Amount of price variation in Detonators

R – Gross value of the work done by the contractor as per on account bill(s) excluding

- (i) Cost of materials supplied by DFCCIL at fixed price
- (ii) Cement and steel provided by the contractor for which separate PVC formulae is given.
- (iii) Specific payment, if any, to be made to the consultants engaged by the contractors
(such payment will be indicated in the contractor's offer).

IO = Consumer Price Index Number for Industrial Workers – All India –as Published in RBI Bulletin for the base period.

I = Consumer Price Index Number for industrial Workers – All India- as published in RBI Bulletin based on the average price index of the three months of the quarter.

WO = Index Number of wholesale Prices – By Groups and sub-groups – All commodities – as published in the RBI Bulletin for the base period.

W = Index Number of wholesale Prices – BY groups and sub groups – All commodities – as published in the RBI Bulletin based on the average price index of the three months of the quarter.

FO = Index Number of wholesales Prices – By Groups and sub-Groups for Fuel, Power, Light and Lubricants as published in the RBI Bulletin for the base period.

F = Index Number of wholesale Prices – By Group and sub-groups for Fuel, Power, Light and Lubricants as published in the RBI Bulletin based on the average price index of the three months of the quarter

EO = Cost of explosives as fixed by DGS & D in the relevant rate contract of the firm from whom purchases of explosives are made by the contractor for the base period.

E = Cost of explosive as fixed by DGS & D in the relevant rate contract of the firm from whom purchases of explosives are made by the contractor for the first month of the quarter under consideration.

DO = Cost of detonators as fixed by DGS&D in the relevant rate contract of the firm from whom purchases of detonators are made by the contractor for the base period.

D - Cost of detonators as fixed by DGS&D in the relevant rate contract of the firm from whom purchases of detonators are made by the contractor for the first month of the quarter under consideration.

P = % of labour component

Q = % of material component

Z = % of fuel component

S = % of explosive component

,T = % of detonators component

NOTE :-

1. The Price Variation Clause shall be applicable for tenders of value more than **Rs.50 (Fifty) Lakhs** irrespective of the contract completion period and PVC shall not be applicable to the tender of value less than Rs.50 (Fifty) Lakhs.
2. Price variation is payable/recoverable during the extended period of contract, provided the Price Variation Clause was part of the original contract and the extension has been granted on administrative ground i.e. under Clause 17 (1), (2) and (3) of this GCC.
3. No maximum value for the price variation is prescribed.
4. If, in any case, the accepted offer includes
 - (i) Cost of materials supplied by DFCCIL at fixed price
 - (ii) Cement and steel provided by the contractor for which separate PVC formulae is given.
 - (iii) Specific payment, if any, to be made to the consultants engaged by the contractors (such payment will be indicated in the contractor's offer).

Such payments would be excluded from the gross value of the work for purpose of payment/ recovery of variations.

5. The index number for the base period will be the index number as obtained for the month of opening of the tender and the quarters will commence from the month following the month of opening of tender. However, if the rates quoted in negotiated tender are accepted, the base month for the price variation clause is the month in which negotiations are held.
6. The adjustment for variation in prices if required shall be made once every quarter in the on-account payments, if more than one on-account payment is made to the contractor in a quarter, the adjustment, if required shall be made in each bill.
7. The price variation should be based on RBI's average price index of the 3 months of the quarter.
8. The demands for escalation of the cost may be allowed on the basis of provisional indices made available by the Reserve Bank of India. Any adjustment needed to be done based on the finally published indices is to be made as and when they become available.
9. The weightage would be applied on the value arrived at after deducting the cost of steel and cement from the total contract value.

10. The price variation implies both increase as well as decrease in input prices and, therefore price variation during the currency of the contract may result in extra payment or recovery as the case may be.

13.7 A-2(I) Price Variation in case of Steel supplied by the contractor

This special Price Variation Clause will be applicable only on Iron and Steel supply items of tender schedule without value addition.

The amount of variation for the component of supply of steel shall be adjusted (paid/recovered) by the following formulae :-

Ms = Q (Bs-Bso) where

Ms= Amount of price variation in steel payable/recoverable.

Q= Weight of steel in tones supplied by the contractor as per the on account bill for the month under consideration.

Bs= SAIL"s (Steel Authority of India Limited) ex-works price plus Excise Duty thereof (in rupees per tone) for the relevant category of steel supplied by the contractor as prevailing on the first day of the month in which the steel was purchased by the contractor (or) as prevailing on the first day of the month in which steel was brought to the site by the contractor whichever is lower.

Bso= SAIL"s ex-works price plus Excise Duty thereof (in rupees per tonne) for the relevant category of steel supplied by the contractor as prevailing on the first day of the month in which the tender was opened.

NOTE:

1. Relevant categories of steel for the purpose of operating the above price variation formula based on SAIL"s ex-works price plus Excise Duty thereof are as under:-

SN	Category of steel supplied in the DFCCIL work	Category of steel produced by SAIL whose ex-works price plus Excise Duty thereof would be adopted to determine price variation.
1	Reinforcement bars and other rounds.	TMT 8 mm IS 1786 Fe 415/ Fe 500
2	All types and sizes of angles.	Angle 65x65 x 6 mm IS 2062 E250A SK
3	All types and sizes of plates.	PM Plates above 10-20 mm IS 2062 E 250A SK
4	All types and sizes of channels and joints.	Channels 200 x 75 mm IS 2062 E250A SK

5	Any other section of steel not covered in the above categories and excluding	Average of price for the 3 categories covered under sl. No. 1,2,3 above.
---	--	--

2. The prevailing ex-works price of steel per tone as on 1st of every month for the above categories of steel as advised by SAIL to Railway Board would be circulated to DFCCIL.
3. Separate items for „supply of steel“ for RCC/PSC work should have been incorporated in the tender schedule to know the cost of steel actually consumed at any given point of time.
4. The Price Variation Clause shall be applicable for tenders of value more than **Rs.50 (Fifty) Lakhs** irrespective of the contract completion period and PVC shall not be applicable to the tender of value less than **Rs.50 (Fifty) Lakhs**
5. Price variation is payable/recoverable during the extended period of contract, provided the Price Variation Clause was part of the original contract and the extension has been granted on administrative ground i.e. under Clause 17 (1), (2) and (3) of this GCC
6. No maximum value for the price variation is prescribed.
7. If, in any case, the accepted offer includes
 - (i) Cost of materials supplied by DFCCIL at fixed price
 - (ii) Value of steel, for which PVC is being paid/ recovered under this clause
 - (iii) Specific payment, if any, to be made to the consultants engaged by the contractors (such payment will be indicated in the contractor's offer).

Such payments would be excluded from the gross value of the work for purpose of payment/ recovery of variations.
8. The SAIL's Ex-work price plus Excise Duty there of (in Rupees per tone) for the relevant category of steel, as prevailing on first day of the month in which tender is opened, will be considered. However, if the rates quoted in negotiated tender are accepted, the base month for PVC will be the month in which negotiations are held.
9. The adjustment for variation in prices, if required, shall be made every month in the on- account payments as per above formula.
10. The Dy CE concerned will maintain a register showing receipt of steel from contractor on site (supported by documentary evidence of purchase) and consumption thereof.
11. The price variation implies both increase as well as decrease in input prices and, therefore price variation during the currency of the contract may result in extra payment

or recovery as the case may be.

12. Steel supplied free or at firm price by DFCCIL, as per contract, if any, will not be considered for calculation of PVC.

13.7 A-2(II) Price Variation in case of Cement supplied by the contractor

This special Price Variation Clause will be applicable only on Cement supply items of tender schedule without value addition.

1. The amount of variation for the component of supply of cement shall be adjusted (paid/recovered) by the following formulae :-

Where $M_c = R \times (W_c - W_{co}) / W_{co}$

Where M_c = Amount of price variation in material (-Cement).

R = Value of Cement supplied by contractor as per on account bill in the quarter under consideration.

W_{co} = Index No. of Wholesale price of sub-group (of cement) as published in RBI Bulletin for the base period.

W_c = Index No. of wholesale price of sub group (of cement) as published in RBI Bulletin for the first month of the quarter under consideration.

Note:

1. Separate items for „supply of cement“ for RCC/PSC work should have been incorporated in the tender schedule to know the cost of cement actually consumed at any given point of time.
2. The Price Variation Clause shall be applicable for tenders of value more than Rs.50 (Fifty) Lakhs irrespective of the contract completion period and PVC shall not be applicable to the tender of value less than Rs.50 (Fifty) Lakhs.
3. Price variation is payable/recoverable during the extended period of contract, provided the Price Variation Clause was part of the original contract and the extension has been granted on administrative ground i.e. under Clause 17 (1), (2) and (3) of this GCC.
4. No maximum value for the price variation is prescribed.
5. If, in any case, the accepted offer includes
 - (i) Cost of materials supplied by DFCCIL at fixed price
 - (ii) Value of cement, for which PVC is being paid/ recovered under this clause
 - (iii) Specific payment, if any, to be made to the consultants engaged by the contractors (such payment will be indicated in the contractor's offer).

Such payments would be excluded from the gross value of the work for purpose of payment/ recovery of variations.

6. The index number for the base period will be the index number as obtained for the month of opening of the tender and the quarters will commence from the month following the month of opening of tender. However, if the rates quoted in negotiated tender are accepted, the base month for the Price Variation Clause is the month in which negotiations are held.
7. The adjustment for variation in prices, if required, shall be made once every quarter in the on-account payments, if more than one on-account payment is made to the contractor in a quarter, the adjustment, if required shall be made in each bill.
8. **The price variation would be based on the price index of the first month of the quarter under consideration.**
9. The demands for escalation of the cost may be allowed on the basis of provisional indices made available by the Reserve Bank of India. Any adjustment needed to be done based on the finally published indices is to be made as and when they become available.
10. The price variation implies both increase as well as decrease in input prices and, therefore price variation during the currency of the contract may result in extra payment or recovery as the case may be.
11. Cement supplied free or at firm price by DFCCIL, as per contract if any, will not be considered for calculation of PVC.

14.0 Deleted

15.0 CONTRACT PRICE AND PAYMENTS

15.1 Rates For Items Of Work.

The Contractor shall be paid only at accepted rates for finished work as per approved construction Drawings. Where such rates are not available the Contractor shall be paid as per Clause 12.0 read with Clause 12.4 "Variation" of these Conditions.

15.1.1 Rates accepted for BOQ are for complete item of work

The rates entered in the accepted Bill of Quantities of the Contract, shall provide for Works duly and properly completed in accordance with these Conditions of Contract, Special Conditions of Contract and the Specification and Drawings, together with such enlargement, extension, diminution, reduction, alteration or addition, as may be ordered in terms of conditions of Contract, and without prejudice to the generality thereof, shall inter-alia be deemed to include and cover all charges relating to labour and superintendence thereof, supply including all cost and freight of Materials, stores, equipments, profiles, moulds, cuttings, centerings, scaffoldings shuttering, machinery, derricks, tackles, ropes, pegs, posts, tools and all apparatus and plants, required at / for the work, and contingencies, complete in all

respects, except such items as may be specified in the Special Conditions of Contract to be supplied to the Contractor by the Employer. The rates quoted shall also include:

- Erection, maintenance and removal of all Temporary Works and Buildings.
- All watching, lighting, pumping and draining unless otherwise provided for.
- All barriers and arrangements for safety of the property, utilities, public or of employees/workers during the execution of Works.
- All sanitary and medical arrangements for labour camps as may be prescribed.
- The setting out of all Works of construction, repair and up-keep of all centre lines, benches, brackets, etc.
- Site clearance.
- All taxes, royalties, duties, cess, octroi and other levies payable to various authorities except as provided in Sub-clause 15.1.1. and 15.1.3

15.1.2 Deleted

15.1.3 Nothing extra payable over the accepted rates

Subject to **Sub-clause 15.1.1** above, nothing extra shall be payable over the quoted rates, notwithstanding any provision to the contrary in any law for the time being in force, save and except what is specifically provided in General or Special Conditions of Contract.

15.1.4 Changes in cost due to subsequent legislation.

If after the date for submission of tender, there is change/increase/decrease in various taxes through national or state statute, ordinance, decree or other law or any regulation or bye-law of any local or other duly constituted authority which causes additional or reduced cost to the contractor as otherwise permissible in the execution of the contract, such additional or reduced cost shall be determined by the engineer and shall be added to or deducted from the contract price as the case may be.

15.2 Payment on actual measurements

The quantities set out in the Bill of Quantities, are the estimated quantities and not the actual quantities of work to be executed by the Contractor. The Contractor shall be paid for the Works, at applicable rates based on the actual measurements.

Measurements of the work in progress shall be taken by the Contractor in presence of the Engineer. These measurements shall be recorded at such intervals, as in the opinion of the Engineer shall be proper having regard to the progress of the work in the Measurement Books to be supplied by the Engineer.

The Contractor or his authorized representative shall sign the result of the measurements, which shall also be signed by the Engineer or the Engineer's representative as an acknowledgement and acceptance of the accuracy thereof.

The Engineer or the Engineer's Representative shall have the right to delete or correct any measurement if it is found at a later stage that the work is incomplete, defective and / or not conforming to the Specifications.

15.3 Payment Currency:

The mode of payment in the Contract will be Indian Rupees unless specified otherwise.

15.4 On Account Payment

15.4.1 Procedure for On-Account payment.

- a. The Contractor shall be entitled to be paid from time to time normally once in a calendar month, by way of "On-account" bills, only for such Works, as, in the opinion of the Engineer, the Contractor has executed in terms of the Contract.
- b. The Contractor shall submit the On-account bills, by the date stipulated by the Engineer, in the prescribed proforma, supported with measurements.
- c. After preliminary scrutiny and certification by the Engineer, payment of 80% of the certified amount shall be made by the Employer within 7 days. The amount certified shall account for all deductions, including statutory deductions, recoveries for advances and any amounts due from the Contractor. The balance 20% shall be paid within 28 days, from the date of the preliminary certification of the bill by the Engineer.
- d. Such payments made by the Employer, shall not constitute any acceptance of the measurements or bill of quantities by the Employer and the Employer shall have the right to alter, modify, reduce or diminish the quantities or classification entered in the Measurement Books or Bills. The Employer shall have right to recover any amount paid in the earlier bill from any subsequent bill and should the amount to be recovered be more than the amount of the subsequent bill, the Contractor shall on demand from the Engineer or Employer immediately refund the extra amount to the Employer within 7 days, failing which he shall have to pay interest @ 12% per annum till the said extra amount is paid back by him. In addition to above, if contractor claims more on-account payment than due, second time, the facility of making 80% on-account payment within 7 days shall be withdrawn.

15.4.2 Non-recording of measurements

The Engineer reserves the right not to record the measurements, and/or not to entertain an on-account bill, when the work done during the period is less than 25% of the work to be executed for the period as per agreed programme

15.4.3 On-Account Payment without prejudice

„On account“ payments made in respect of work; done or Materials delivered by the Contractor, shall be without prejudice to the final accounts, (except where measurements are specifically noted in the measurement book as "final measurements" and have as such been signed by the Contractor), and shall not be considered by itself to be evidence of any facts, stated in or to be inferred from such payments or of any work done or Materials supplied, or of the manner of its execution.

15.5 Final Measurements And Payments.

- (i) Soon after the issue of the Completion Certificate, as per Clause 17.1 and 17.2 the Engineer shall have the final measurements taken, recorded and signed, as in the case of interim measurements referred to in Clause 15.2. A joint accountal of any plant, equipment and Materials issued by the Employer to the Contractor, shall also be prepared and signed jointly.

- (ii) Based on above, the Contractor shall submit a draft Final Bill with supporting documentation at the earliest but not later than 60 days from the issue of the Completion Certificate.
- (iii) The Engineer shall check the bill within 60 days of its receipt and return the bill to the Contractor for correction if any. Employer shall pay 75% of the undisputed amount of the bill to the Contractor at the stage of returning the bill.
- (iv) The Contractor shall resubmit the bill with corrections within 30 days of the return together with a written discharge in form of "No Claim Certificate" (Annexure VI of these conditions) representing full or final settlement of all money due to the Contractor under or in connection with the Contract or a list of total unsettled claims in accordance with Clause 16.1.

The Employer, shall, on receipt of the Certificate, arrange to make payment, subject always to any deductions under these presents, due to the Contractor, within a period of further 30 days failing and after which the Employer shall be liable to pay interest at 10% per annum which shall be compounded every 3 months. Provided always, that, no interest shall be payable on any amount disallowed or withheld under Clause 15.10 and 16.2 or disputed by the Engineer or the Employer in any case.

The Engineer for his pure convenience retains the right to instruct the Contractor to furnish the details of both on account and final bill in soft form as well.

15.6 Round Off

In every payment to the Contractor, sums of less than fifty paise shall be omitted and sums of fifty paise and more up to one rupee shall be reckoned as one rupee.

15.7 Payment By Cheque/E-Payment.

All payments to the Contractor will be made by cheque or through "E-Payment" as decided by the Employer.

15.8 Tax Deduction at Source.

Tax deductions will be made at source as per statutory requirement from every payment made to the Contractor at rates notified from time to time.

15.9 Production of Vouchers

- I. The Contractor shall, whenever required by the Engineer, produce or cause to be produced for examination by the Engineer, any quotation, invoice, cost or other account books, vouchers, receipts, letters, memoranda or any copy of or extract from any such documents and also furnish information and returns, as may be required, relating to the execution of this Contract or relevant for verifying or ascertaining the cost of execution of this Contract or ascertaining the Materials supplied by the Contractor are in accordance with the Specifications laid down in the Contract. The Engineer's decision on the question of relevancy of any documents, information or returns shall be final and binding on the parties.
- II. If any part or item of the work is allowed to be carried out by a sub-Contractor, assignee or any subsidiary or allied firm through the Contractor, and shall have power to examine and inspect the same. The above obligations are without prejudice to the obligations of the Contractor under any statute, rules or orders.

15.10 Withholding Any Lien For Sums Claimed.

- i. The Employer shall have lien over all or any moneys that may become due and payable to the Contractor under the Contract, and / or over the deposit of

- Performance Guarantee/Security deposit or any other amount or amounts made under the Contract and which may become payable to the Contractor.
- ii. And further, unless the Contractor pays and clears immediately on demand any claim of the Employer, the Employer shall at all times be entitled to deduct the amount of the said claim from the moneys, securities and / or deposits which may have become or will become payable to the Contractor under these presents, or under any other Contract or transaction whatsoever between the Employer and the Contractor even if the matter stands referred to Arbitration. The Contractor shall have no claim for any interest or damage whatsoever in respect of any amounts withheld or treated as withheld under the lien referred to above and duly notified as such to the Contractor.

15.11 Signature on Receipts For Payments.

Every receipt of payment to Contractor including refund of the Performance Security shall be signed by the person authorized to do so on his behalf. In the event of death of any of the Contractor's partners in case the Contractor is a partnership firm, during the currency of the Contract, it is hereby expressly agreed that every receipt by any one of surviving Contractor's partners, shall, if so signed as aforesaid, be a good and sufficient discharge as aforesaid, provided that nothing in this Clause shall be deemed to prejudice or affect any claim, which the Employer may hereafter have against the legal representatives of any Contractor's partner so dying, for or in respect of breach of any of the conditions of the Contract. Provided also that nothing contained in this clause shall be deemed to prejudice or affect the respective rights and obligations of the Contractor's partners, or of the legal heirs/representatives of any deceased Contractor/partner interse.

15.12 Post Payment Audit.

It is an agreed term of the Contract, that the Employer reserves to himself the right to carry out a post payment audit and /or technical examination of the Works, and the Final bill including all supporting vouchers, abstracts, etc, and to make a claim on the Contractor for the refund of any excess amount paid to him, if as a result of such examination, any over-payment to him is discovered to have been made in respect of any work done or alleged to have been done by the Contractor, under the Contract. If any under-payment is discovered, the same shall be paid by the Employer to the Contractor. Such payments or recoveries, however, shall not carry any interest.

16 CLAIMS & LIENS IN RESPECT OF CLAIMS IN OTHER CONTRACTS.

16.1 Claims

The Contractor shall send to the Engineer's Representative once in every three months an account giving particulars, along with full details and justification, of all claims for any additional payment to which the Contractor may consider himself entitled and of all extra or additional work ordered by the Engineer which he has executed during the preceding three months. No final or interim claim for payment for any such work or expense will be considered which has not been included in such particulars.

16.2 Lien in Respect of Claims in Other Contracts.

Any money due to the Contractor either alone or jointly with others, including the Performance Guarantee/Security deposit amount returnable to him, may be withheld or retained by exercise of lien by the Employer, against any claim of the Employer in

respect of payment of a sum of money arising out of or under any Contract other than the present Contract made by the Contractor, alone or jointly with the Employer. It is an agreed term of Contract that the sums of money so withheld or retained under this clause by the Employer, shall be kept withheld or retained till the claims arising out of or under the other Contract, are either mutually settled or determined by the Arbitrator, or by the competent Court, as the case may be and the Contractor will have no claims of interest or damage in this regard whatsoever.

17. COMPLETION AND MAINTENANCE CERTIFICATE

17.1 Completion and Completion Certificate

After completion of the Work the Contractor shall serve a written notice of such completion, (whether of the whole of the Works or any part of the work for which a separate date of completion is stipulated in the Contract) to the Engineer. The Engineer or Engineer's representative within 30 days of the receipt of this notice shall conduct a complete joint survey of the Works (including carrying out any Tests as prescribed in the Contract) and prepare a Defects List jointly with the Contractor. The defects pointed by the Engineer or Engineer's representative shall be rectified by the Contractor within 30 days and there after acceptance report be signed jointly by the Contractor and Employer or Engineer on his behalf. This report shall be treated as "Completion Certificate".

17.2 Completion Certificate not to Absolve.

The Contract requires defects free Completion and completion certificate issued as per Completion Certificate Sub-Clause 17.1 above, shall not absolve the Contractor from his liability to make good defects, imperfections and shrinkages or faults, which may appear during the Defects Liability Period specified in the Contract, arising in the opinion of the Engineer from any design for which the Contractor is responsible or any Materials or workmanship being not in accordance with Drawings or Specifications or instructions of the Engineer. These defects shall be rectified by the Contractor at his own cost and if he fails to do so, the Engineer may employ labour, plant and machinery and Materials or appoint another agency or Contractor, to amend and make good such defects, imperfections, shrinkages and faults all costs for the same, and, shall be borne by the Contractor and shall be recoverable from any moneys due to him under this or any other contract.

17.3 Maintenance Certificate.

17.3.1 Definition of „Defects Liability Period“.

In the Contract, the expression "Defects Liability Period", shall mean the Defects Liability Period named in the Special Conditions of Contract, calculated from the date of completion of the Works, as certified by the Engineer in accordance with Clause 17.1 and 17.2.

17.3.2 Maintenance Certificate

The Contract shall not be considered as completed, until a Maintenance Certificate shall have been signed by the Engineer at the end of Defects Liability Period stating that the Works have been completed and maintained to his satisfaction.

17.3.3 Final Approval by Maintenance Certificate.

No certificate other than „Maintenance Certificate“ referred to in Sub-clause 17.3.2 of these conditions, shall be deemed to constitute final Approval by Engineer of discharge of Contractor’s obligations under the Contract.

17.4 Cessation of Employer’s Liability.

The Employer shall not be liable to the Contractor for any matter, arising out of or in connection with the Contractor, or the execution of the Works, unless the Contractor shall have made a claim in writing in respect thereof within 60 days from the date of completion of the Works.

17.5 Unfulfilled obligations.

Notwithstanding the issue of Maintenance Certificate, the Contractor and the Employer, shall remain liable for the fulfillment of any obligation incurred under the provision of the Contract, prior to the issue of the Maintenance Certificate, which remain unperformed at the time such certificate is issued, and for the purpose of determination of the nature and extent of any such obligation, the Contract shall be deemed to remain in force between the parties hereto.

18 RISK & RESPONSIBILITY.

18.1 Contractor’s Care of Work.

- i. The Contractor shall take full responsibility for the care of Works from the commencement of the Works until the date stated in the Completion Certificate for the whole of the Works is issued pursuant to Clause 17.1 and 17.2.
- ii. The Contractor shall not demolish, remove or alter structures or other facilities on the Site without prior Approval of the Engineer.
- iii. If the Engineer shall issue a Completion Certificate in respect of any part of the Permanent Works for which a separate date of completion is stipulated as provided for in Sub Clause 17.2, the Contractor shall cease to be liable for the care of that part of the Permanent Works from the date stated in the Completion Certificate in respect of that part for which responsibility to take care will shift to Employer.
- iv. Provided further that the Contractor shall take full responsibility for the care of any outstanding work, which he shall have undertaken to finish during the Defects Liability Period. If any loss or damage happens to Works during the period for any cause while the Contractor shall be responsible for the care thereof, the Contractor shall rectify the loss or damage at Contractor’s risk and cost so that the Works conform with the Contract.
- v. In the event of any such damage, loss or injury happening from any of “**Force Majeure**” for the portion of work already measured, the Contractor if and to the extent required by the Engineer shall undertake the repair and make good the defect at the cost of the Employer.
- vi. The Contractor shall also be liable for any damage to the Works occasioned by him in the course of any operations carried out by him for the purpose of completing any outstanding work or complying.

18.2 Urgent Repairs.

If, by reason of any accident, or failure, or other event occurring to or in connection with the Works, or any part thereof or proximity thereof, either during the execution of the

Works, or during the Defects Liability Period, any remedial or other work or repair shall, in the opinion of the Engineer or the Engineer's Representative, be urgently necessary and the Contractor is unable or unwilling to do such work or repair or other work at once, the Engineer may authorize the carrying out of such repair or other work by a person other than the Contractor. If the work or repair so got done by the Employer is work which, in the opinion of the Engineer, the Contractor was liable to do at his own expense under the Contract, all expenses incurred by the Employer in carrying out the same shall be recovered by the Employer from the Contractor.

18.3 Damage To Employer's Property, Private Property And Life.

The Contractor shall be responsible for all risks to the Works and for trespass and shall make good, at his own expense, all loss or damage to the Works themselves or to any other property of the Employer or the lives, persons and property of others from whatsoever cause in connection with Works until they are taken over by the Employer; in case the Employer is called upon to make good any such costs, loss or damages, or to pay compensation (including that payable under the provisions of Workmen's Compensation Act or any statutory amendments thereof or under any other law of land applicable to contract) to any person or persons sustaining damage as aforesaid by reason of any act, omission or negligence on the part of the Contractor the amount of any costs or charges (including costs and charges in connection with legal proceedings), which the Employer may incur in reference thereto, shall be charged to the Contractor. This will include any payment made by the Employer for any legal proceedings.

18.4 Indemnity By Contractor:

18.4.1 Indemnity Against All Actions of Contractor:

The Contractor shall hold and save harmless and indemnify the Employer, from and against all actions, suits, proceedings, loss, costs, damages, charges, claims and demands of every nature and description brought or recovered against the Employer, by reason of any act or omissions of the Contractor, his Representative or his employees, in the execution of the Works or in the guarding of the same. All sums payable by way of compensation under these conditions shall be considered reasonable compensation payable to the Employer, without reference to the actual loss or damage sustained, and whether or not any damage shall have been sustained.

18.4.2 Indemnity Against All Claims of Patent Rights And Royalties.

The Contractor shall defend, indemnify and save harmless the Employer from and against all claims and proceedings for or on account of infringements of any patent rights, design, trademark name or copyright or other protected rights in respect of any construction equipment, Plants, Materials, goods or design (submitted by the Contractor pursuant to his obligations under the Contract) used for or in connection with or for incorporation in the Works and from or against all loss, expense, costs or damages whatsoever in respect of such claims or proceedings or in relation thereto, except here such infringement results from compliance with the design or Specifications provided by the Engineer.

18.5 Indemnity By Employer.

The Employer shall indemnify and hold harmless the Contractor against all claims, damages, losses, and expenses in respect of:

- a. Bodily injuries or damages to persons which is attributable to any negligence, willful act or breach of the Contract by the Employer.
- b. Where the injury is contributed partially by the other Contractor, the proportion of the liability to be borne by each party will be decided by the Engineer.

19 FORCE MAJEURE

If, at any time during the currency of the Contract, the performance in whole or in part by either party of any obligation under this Contract shall be prevented or delayed by reasons of any war, hostilities, invasion, acts of public or foreign enemies, rebellion, revolution, insurrection, civil commotion, sabotage, large scale arson, floods, earthquake, large scale epidemics, nuclear accidents any other catastrophic unforeseeable circumstances, quarantine restrictions, any statutory rules , regulations, orders or requisitions issued by a Government department or competent authority or acts of God (hereinafter referred to as "event") then, provided notice of the happening of such an event as given by either party to the other within 21 days of the occurrence thereof.

- a. Neither party shall be reason of such event be entitled to terminate the Contract or have claim for damages against the other in respect of such non-performance or delay in performance.
- b. The obligation under the Contract shall be resumed as soon as practicable after the event has come to an end or ceased to exist.
- c. In case of doubt or dispute, whether a particular occurrence should be considered an "event" as defined under this clause, the decision of the Engineer shall be final and binding.
- d. Works that have already been measured shall be paid for by the Employer even if the same is subsequently destroyed or damaged as a result of the event. The cost of rebuilding or replacing any work that has been measured shall be borne by the Employer.
- e. If the Contract is terminated under this Clause, the Contractor shall be paid fully for the work done under the Contract, but not for any defective work or work done which has been destroyed or damaged before its measurement.

20. SETTLEMENT OF DISPUTES AND ARBITRATION.

20.1 Dispute TO Be Referred To And Settled By Engineer At The First Place.

Should any dispute or difference of any kind whatsoever arise between the Employer and the Contractor, touching, in connection with, or arising out of the Contract, or subject matter thereof, or the execution of Works, whether, during the progress of Works or after their completion and whether before or after termination, abandonment or breach of Contract, it shall, in the first place, subject to the provisions under Sub-clause 17.4 be referred to and settled by the Engineer, who shall, within a period of sixty days after being requested in writing by either party to do so, give written notice of his decision to the Employer and the Contractor. The Engineer while considering the matters of dispute referred to him, shall be competent to call for any records, vouchers, information and enforce the attendance of the parties either in person or through authorized representatives, to sort out or clarify any issue, resolve the differences and to assist him to decide the matters referred to him. Subject to

arbitration, as hereinafter provided, such decision in respect of every matter so referred shall be given by the Engineer and parties shall proceed with the execution of works with all due diligence irrespective of whether any of the parties goes in or desires to go in for arbitration. If no intimation of reference of any claim to arbitration has been sent to him by either the Employer or the Contractor within a period of sixty days from receipt of such notice, the said decision of the Engineer shall remain final and binding upon the Employer and the Contractor and the same shall be deemed to have accepted by them. The Employer or the Contractor shall not seek any arbitration thereafter.

20.2 Referring Of Dispute For Arbitration

If the Engineer shall fail to give notice of his decision, as aforesaid, within a period of sixty days after being requested or if either the Employer or the Contractor be dissatisfied with any such decision of the Engineer, then the matter in dispute shall be referred to arbitration as herein provided.

20.3 Dispute Due For Arbitration

Disputes or differences shall be due for arbitration only if all the conditions in Sub-clauses 20.1 and 20.2 are fulfilled.

20.4 Settlement of Disputes

The demand for arbitration shall specify the matters, which are in question, or subject of the dispute/s or difference/s as also the amount of claim item wise. Only such dispute/s or difference/s in respect of which the demand has been made by the party/parties shall be referred to arbitration and other matters if any shall not be included in the reference.

20.5 Nomination of Arbitrators/Sole Arbitrator.

Matters to be arbitrated upon shall be referred to a sole Arbitrator if the total value of the claim is upto Rs 5 million and to a panel of three Arbitrators if total value of claims is more than Rs 5 million. The Employer shall provide a panel of three arbitrators which may also include DFCC officers for claims upto Rs 5 million and a panel of five Arbitrators which may also include DFCC officers for claims of more than Rs 5 million. The Employer at the time of offering the panel of Arbitrator(s) to be appointed as Arbitrator shall also supply the information with regard to the qualifications of the said Arbitrator nominated in the panel along with their professional experience, phone nos. and addresses to the contractor. The Contractor shall have to choose the sole Arbitrator from the panel of three and/or one Arbitrator from the panel of five in case three Arbitrators are to be appointed. The Employer shall also choose one Arbitrator from this panel of five and the two so chosen will choose the third arbitrator from the panel only. The Arbitrator(s) shall be appointed within a period of 30 days from the date of receipt of written notice/demand of appointment of Arbitrator from either party. Neither party shall be limited in the proceedings before such arbitrator(s) to the evidence or arguments put before the Engineer for the purpose of obtaining his decision.

No decision given by the Engineer in accordance with the foregoing provisions shall disqualify him from being called as a witness and giving evidence before the arbitrator(s) on any matter, whatsoever, relevant to dispute or difference referred to arbitrator/s. The arbitration proceedings shall be held in Delhi only. The language of proceedings that of documents and communication shall be English.

This is a condition of contract agreement /Arbitration that Arbitrators so nominated shall be professional Engineers/s. In case of 3 Arbitrators, one of the arbitrators shall be an accounts officer.

This is also a condition of contract that in case above procedure for nomination of arbitrator/s cannot be adopted due to whatsoever reason may be, then it will be deemed that no arbitration clause exist in contract agreement and normal law of land shall prevail to settle the disputes.

20.6 No Suspension of Work.

The reference to arbitration shall proceed notwithstanding that works shall not then be or be alleged to be complete, provided always that the obligations of the Employer, the Engineer and the contractor shall not be altered by reasons of arbitration being conducted during the progress of Works. Neither party shall be entitled to suspend the work to which the dispute relates on account of arbitration and payments to the Contractor shall continue to be made in terms of the Contract.

20.7 Award To Be Binding On All Parties.

The award of the sole arbitrator or a bench of three arbitrators shall be binding on all parties.

20.8 Rules Governing The Arbitration Proceedings.

The arbitration proceedings shall be governed by Indian Arbitration and Conciliation Act 1996, as amended from time to time including provisions in force at the time the reference is made.

20.9 Limitation of Time.

No dispute or difference shall be referred to Arbitration after expiry of 60 days from the date of decision by the Engineer, if notified, or from the date when the Engineer ought to have given his decision in terms of provisions under Sub-clause 20.1 in case of failure on the part of the Engineer to give notice of decision.

20.10 Interest on Awarded Amount

Where the arbitral award is for payment of money, no interest shall be payable on the whole or any part of the money for any period till the date on which the award is made.

20.11. Fee to Arbitrator/s

The cost of arbitration shall be borne by the respective parties. The cost shall inter-alia include the fees of the Arbitrator(s) as per the rates fixed by the DFCC from time to time.

21 NOTICES

21.1 Notices to Contractor

- i. All notices to the Contractor shall be served by post or telex or telefax or by hand to the Contractor or his authorized representatives
- ii. The Contractor shall, on award of the Contract, furnish to the Engineer, the name, designation, address and telephone, telex and telefax numbers and e-mail address of his representative referred to in **Clause 4.4**.

21.2 Notice to Employer and Engineer

All notices to the Employer or Engineer shall be served by post or telex or telefax, or by delivering by hand to the address nominated for the purpose.

21.3 Change of Address

Parties to the Contract may change the nominated address with a notice to all concerned failing which all correspondence made on given address will be deemed to have been duly received by the concerned parties.

21.4 Change in Constitution of Firm

The Contractor shall forth with notify the Employer of any change in constitution of the firm. It is agreed terms & conditions of contract that no such change will be made effective unless specifically approved by the Employer failing which contract is liable to be terminated under Clause 11.4 of this GCC. .

SCHEDULE OF ITEMS, RATES & QUANTITIES

SCHEDULE OF ITEMS, RATES & QUANTITIES

Name of Work: Construction of Boundary Wall on DFCC alignment in the Dist of Gautam Budh Nagar in Rewari-Dadri Section					
S.N	ITEMS	Unit	Qty	Rate	Amount
	Schedule A NS Items				
1	Earth work in excavation by mechanical means (Hydraulic excavator)/ manual means in foundation trenches or drains (not exceeding 1.5 m in width or 10 sqm on plan) including dressing of sides and ramming of bottoms, lift up to 1.5 m, including getting out the excavated soil and disposal of surplus excavated soil as directed, within a lead of 50m. All kinds of soil	Cum	8500	149.74	1272790.00
2	Filling available excavated earth (excluding rock) in trenches, plinth, sides of foundations etc. in layers not exceeding 20cm in depth, consolidating each deposited layer by ramming and watering, lead up to 50m and lift up to 1.5m.	Cum	6644	66.18	439700.00
3	Reinforcement for RCC work including straightening, cutting, bending and placing in position and binding, All complete: Thermo-Mechanically Treated bars	Kg	288300	61.84	17828472.00
4	Brick work with F.P.S bricks of class designation 75 in foundation and plinth in Cement Mortar 1:6 (1 cement : 6 coarse sand)	Cum	1390	3072.72	4271081.00
5	Structural steel work riveted, bolted or welded in built up sections, trusses and framed work, including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all using structural steel i.e. angle iron, M.S tube T-Iron, Box channel etc. in grating, frames, guard bar, ladder, railing, brackets, gates and similar work	Kg	5000	67.12	335600.00
6	Finishing wall with water proofing cement paint snowcem plus of M/s. Snowcem or equivalent of required shade: New Work (two or more coats applied @3.84 kg/10 sqm)	Sqm	20600	44.60	918760.00
8	Cast in situ R.C.C: P/L Cast in situ controlled cement concrete M30 grade in various locations, laid compacted and cure. Item to include approved shuttering at all heights and levels for concrete finish, bracing, bolting, wedging, easing striking, removal, cost of construction/ contraction/control joints etc complete, props using X and K bracings (wooden ballis as props shall not be allowed) allowance for forming grooves, drip throats, chamfers, cutouts, opening etc wherever called for and dressing with approved shuttering oil to prevent adhesion. The shuttering shall be of marine ply of required thickness (min 12mm thick) or 4mm thick steel plates adequately stiffened and braced as approved by Engineer to pattern include the cost of admixtures/ plasticizers if used by the contractor. This item shall also include the concrete required to be waterproofed such as water tanks, retaining walls, base rafts etc. in case of integral waterproofing no extra payment. Item to include earthwork in excavation for all kind of soil for foundation of retaining wall and refilling of sides of foundation etc.				
a	Pile cap/column/wall footing, Pedestal, tie beam at plinth level and similar works	Cum	1296	8132.20	10539331.00
b	Columns, Column caps, Pedestal at top of Columns, Retaining walls, Shear walls etc. as required. Item to include	Cum	172	8689.20	1494542.00

	Columns and Column caps.(above plinth level)				
9	Plain cement concrete 1:3:6 (using 40mm and down coarse aggregate) as bed concrete under boundary wall foundation and other locations as required including earthwork in excavation for all depths and area in all types of soils, demarcating of center line , setting out, levelling etc laid, consolidated, cured and finished etc.	Cum	900	4456.00	4010400.00
10	Precast RCC with M 30 grade in tie beams, boundary wall, gutter, window sills, lintels, steps of staircase, cover of drain, sump, manhole and all other locations as called for etc. complete cast to profile and thickness required and or as directed, cured, hoisted and installed at all stages including necessary formwork/mould made up of plywood /steel etc. for concrete finish F4 adequately framed, braced and stiffened aligning position, necessary temporary supports wherever called for etc. to the thickness required and or as directed by the Engineer. The rate is also to include the cost to transportation, placing, aligning, providing temporary supports and stays for precast concrete members in a approved manner. Reinforcement shall be paid separately.(70% payment on casting and casting of panels will be done at site).	Cum	1928	8800.60	16967557.00
11	Barbed Wire Fencing of the acquired land along the DFCC alignment except the area of Regional office and Dadri yard. The rate includes all taxes, lead & lift, labour & wastage. Analysis of Rates and approved drawing enclosed.(Sheet-II)	Kg	12820	90.00	1153800.00
12	Construction of Service Road as per specifications and approved drawing enclosed (Sheet-I)	Sqm	10000	544.17	5441700.00
13	Construction of Inspection Huts (2 nos) as per approved drawing enclosed.(Sheet-IV)	Sqm	40	10000.00	400000.00
14	Construction & Commissioning of Tube Wells as per estimate in the office of DyCPM/NOIDA. .	No	02	--	1862340.00
15	Supply, Installation & Commissioning of Diesel Generator set 5 KVA with wall mounting exciter Panel & Push Button start and stop assembly (Air cooled) with acoustic enclosure complete silent type DG sets conforming to RDSO spec. IRS(S)69/86 CPCB Noise & Emission Complaint) Kirloskar/Cummins/ Eicher/Mahindra make engine/alternator along with battery of min. 12V, 80AH as per IRS(S) 88/93 of standard exide/upmac/amco make. Control panel with Ampere, Volt, Frequency & Hour Meter. It includes 100 Amp MCB.This includes Installation & Commissioning of DG set and DG Panel with push button start-stop in Generator room or as decided by site engineer and supply, installation and commissioning of switch boards as per instructions of Engineer-in-charge. This also includes supply ,erection, wiring and commissioning of power supply changeover arrangement from local to DG supply and battery charger as per Railway standard practice. The minimum rating of all the change-over	No	02	199500.00	399000.00
16	Taking electric connections from local power supply authority, at Inspection Huts	No	02	30450.00	60900.00
17	Providing and installing retro-reflective Single sided overhead signboards comprising of customized modular PU Epoxy Coated MS angle iron frame work, aluminum composite panel(ACP) as base board, micro prismatic retro-reflective sheet and electro cut coloured overlay film. The horizontal and vertical members of the MS frame module shall be made of a pair of MS angle iron 50x50x5mm in box shape. No panel size shall be more than one Sqm and each panel shall be braced diagonally (One way only) with MS angle iron 50x50x5mm. The MS frame module shall have length not more than 3M. and multiple modules shall be connected together with 15mm. dia SS bolts of 304 grade spaced not more than 300 mm	Sqm	32	14463.00	462816.00

	center to center. The aluminium composite panel (ACP) shall have a thickness of 4mm with 0.5mm thick skin of aluminium on both sides. The ACP shall be routed, folded and fixed on the MS frame with VHB tape 25mm wide provided throughout the length and breadth of the frame including riveting at the right angle face of the frame with pop riveting or with self tapping SS screws 5mm dia spaced not more than 300mm center to center ensuring that no riveting is seen on either face of the frame. On the front face of the ACP, micro prismatic retro-reflective sheet conforming to Type-IX of ASTM: D 4956-07 shall be pressure fixed as background sheet (in white colour) which will be over laid with electro cut transparent film of approved make and colour to create a desired road sign. The rear side of the MS frame shall be covered with balancing ACP of the same description as mentioned above and shall be fixed in similar manner as described above. The rate shall include all materials, labour, equipments, fabrication, transportation, erection, installation and incidentals all complete as per direction of the Engineer-in-charge (Structural steel work except MS angle iron frame work for the sign board shall be paid for separately).				
18	Providing & Fixing Iron Board 18 gauge painted & written with synthetic enamel paint of approved brand & manufacture of required colour to give an even shade: Two or more coats on new work	Sqm	64	650.00	41600.00
Total Estimated Cost				6,79,00389.00	
Rs six crore seventy nine lacs three hundred eighty nine only					

The rate will be%(percentage) above/below /at par the estimated cost (to be filled by the Bidder/Tenderer)

- NOTE:
- 1) Bidders should quote %age above/below/at par both in words and figures.
 - 2) In case of cutting/overwriting, the rates in words shall be taken as final.
 - 3) Contractor has to quote a single flat percentage in the blank space above.
 - 4) All cuttings and over-writings should be signed by the bidders.
 - 5) Any drawings required to be seen by the bidder can be seen in the office of CPM/ DFCCIL at A- 102, Sector- 4, NOIDA (GB Nagar).

Guidelines for submitting tenders by Partnership Firms and their Eligibility Criteria

1 The Partnership Firms participating in the tender should be legally valid under the provisions of Indian Partnership Act.

2 Partnership Firms are eligible to quote tenders of any value.

3 The Partnership Firm should have been in existence or should have been formed prior to submission of tender. Partnership firm should have either been registered with the competent registrar or the partnership deed should have been notarized prior to date of tender opening, as per Indian partnership Act.

4 Separate identity/name should be given to the partnership firm. The partnership firm should have PAN/TAN number in its own name and PAN/TAN number in the name of the any of the constituent partners shall not be considered. The valid constituents of the firm shall be called partners.

5 Once the tender has been submitted, the constitution of firm shall not be allowed to be modified/alterd/terminated during the validity of the tender as well as the currency of the contract except when modification becomes inevitable due to succession laws etc, in which case prior permission should be taken from DFCCIL and in any case the minimum eligibility criteria should not get vitiated. The reconstitution of firm in such cases should be followed by a notary certified Supplementary Deed. The approval for change of constitution of the firm, in any case, shall be at the sole discretion of the DFCCIL and the tenderer shall have no claims what so ever. Any change in the constitution of Partnership Firm after opening of tender shall be with the consent of all partners and with the signatures of all partners as that in the Partnership deed. Failure to observe this requirement shall render the offer invalid and full EMD shall be forfeited. If any partner/s withdraw from the firm after opening of the tender and before award of the tender, the offer shall be rejected. If any new partner joins the firm after opening of tender but prior to award of contract, his/her credential shall not qualify for consideration towards eligibility criteria either individually or in proportion to this share in the previous firm. In case the tenderer fails to inform DFCCIL beforehand about any such changes/modification in the constitution which is inevitable due to succession laws etc. and the contract is awarded to such firm, then it will be considered a breach of contract conditions, liable for determination of contract under General Condition of Contract.

6 A Partner of the firm shall not be permitted to participate either in his individual capacity or as a partner of any other firm in the same tender.

7 The tender form shall be purchased and submitted only in the name of partnership firm and not in the name of any constituent partner. The EMD shall be submitted only in the name of Partnership Firm. The EMD submitted in the name of any individual partner or in the name of authorized partner(s) shall not be considered.

8 One or more of the partners of the firm or any other person(s) shall be designated as the authorized person(s) on behalf of the firm, who will be authorized by all the partners to act on behalf of the firm through a "Power of Attorney" specifically authorizing him/them to submit & sign the tender, sign the agreement, receive payment, witness measurements, sign measurement books, make correspondences, compromise, settle, relinquish any claim(s) preferred by the firm, sign "No Claim Certificate", refer all or any dispute to Arbitration and to take similar such action in respect of the said tender/contract. Such "Power of Attorney" should be notarized /registered and submitted

along with tender.

9 A notary certified copy of registered or notarized partnership deed shall be submitted along with the tender

10 On award of the contract to the partnership firm, a single Performance Guarantee shall be submitted by the firm as per tender conditions. The entire guarantee like Performance guarantee, guarantee for Mobilization advance, Plant and Machineries advance shall be submitted only in the name of the partnership firm and no splitting of guarantees among the partners shall be acceptable.

11 On issue of LOA, contract agreement with partnership firm shall be executed in the name of the firm only and not in the name of any individual partner

12 In case, the contract is awarded to a partnership firm, the following undertakings shall be furnished by all the partners through a notarized affidavit before signing of contract agreement:-

a) Joint and several liabilities:- The Partners of the firm to which the contract is awarded, shall be jointly and severally liable to the DFCCIL for execution of the contract in accordance with general and special conditions of the contract. The partners shall also be liable jointly and severally for the loss, damages caused to the DFCCIL during the course of execution of the contract or due to non-execution of the contract or part thereof.

b) Duration of the partnership deed and partnership firm agreement:-

The partnership deed/partnership firm agreement shall normally not be modified, altered, terminated during the currency of contract and the maintenance period after the work is completed as contemplated in the conditions of the contract. Any change carried out by partners in the constitution of the firm without permission of DFCCIL, shall constitute a breach of contract liable for determination of contract under General Conditions of Contract.

c) Governing Laws:- The partnership firm agreement shall in all respect be governed by and interpreted in accordance with the Indian Laws.

d) No partner of the firm shall have the right to assign or transfer the interest right or liability in the contract without the written consent of the other partner and that of the DFCCIL in respect of the tender/contract.

13 The tenderer shall clearly specify that the tender is submitted on behalf of a partnership concern. The following documents shall be submitted by the partnership firm, with the tender.-

a) A copy of registered/notarized partnership deed duly authenticated by Notary.

b) Power of Attorney duly stamped and authenticated by a Notary Public or by a Magistrate from all partners of the firm in favour of one or more of the partners(s) or any other person(s) as detailed in para (8) above.

c) An undertaking by all the partners of the partnership firm shall be given that they have not been black listed or debarred by DFCCIL or any other Ministry/Department of the Govt. of India/any State Govt. from participation in tenders/contract on the date of opening of bids either in their individual capacity or in any Firm in which they were/are partners. Concealment/wrong information in regard to above shall make the contract liable for determination under General Conditions of Contract.

14 Evaluation of eligibility of a partnership firm

Technical and Financial eligibility of the firm shall be adjusted based on satisfactory fulfillment of the following conditions:-

i) Technical eligibility criteria:- The tenderer should satisfy either of the following criteria:-

a) The partnership firm shall satisfy the full requirement of technical eligibility criteria (defined in “Para 23 of General Instructions to Tenderers (Section-III)”) in its own name and style;

OR

b) In case the partnership firm does not fulfill the technical eligibility criteria in its own name and style, but one of its partners has executed a work in the past either as a sole proprietor of a firm or as a partner in a different partnership firm, then such partner of the firm shall satisfy the technical eligibility criteria (defined in “Para 23 of General Instructions to Tenderers (Section-III)”) on the basis of his/her proportionate share in that proprietorship/partnership firm reduced further by his/her percentage share in the tendering firm.

ii) Financial eligibility criteria:- The tenderer shall satisfy either of the following criteria:-

a) The partnership firm shall satisfy the full requirements of the financial eligibility criteria (as defined in “Para 23 of General Instructions to Tenderers (Section-III)”) in its own name and style.

OR

b) In case the partnership firm does not fulfill the financial eligibility criteria in its own name and style, but one or more of its partners have executed a work/contract in the past either as sole proprietor or as partner in different firms, then the arithmetic sum of the contractual payments received by all the partners of the tendering firm, derived on the basis of their respective proportionate share in the such firms reduced further by their respective percentage share in the tendering firm, tendering firm shall satisfy the full requirements of the financial eligibility criteria (as defined in Para 23 of General Instructions to Tenderers (Section-III)”).
