PRE-BID QUERIES- ITB, PROCUREMENT PHASE (Part-II, Section-A)

| SN | Clause No. & Page No. | Tender Condition | Tenderer's Queries | Clarification by DFCCIL |
|----|--------------------------|---|--|-------------------------|
| 1 | 4.1_ITB Page 22 of 211 | (B): Technical Eligibility Criteria: The Bidder must have successfully completed or substantially completed any one of the following categories of work(s) during last 07 (seven) years, ending last day of month previous to the one in which tender is invited: Three similar works each costing not less than the amount equal to 15% of advertised value of the tender, OR Two similar works each costing not less than the amount equal to 20% of advertised value of the tender, OR One similar work each costing not less than the amount equal to 30% of advertised value of the tender. Similar works: - The Similar nature of work is defined as under: Mechanized Track Maintenance using On-Track Machines anywhere in Railway Sector in any country of the world. OR Operation and Maintenance of ON Track Machines anywhere in Railway Sector in any country of the world. OR Mechanized Track laying by NTC/T28 and/or renewal of track by TRT/PQRS/T28 and/or Mechanized Track deep screening, shallow screening and/or through weld renewal by mobile flash butt welding plant anywhere in railway sector in any country of the world. OR | Please appreciate that the scope of work is highly technical requiring experience and expertise of trained, specialized and skilled workforce. This is to ensure quality and efficient operation and maintenance of the complex track machines owned by DFCCIL. Further the scope of work is predominantly linked to proper maintenance of the track network to accomplish required parameters resulting in safe operation directly related to safety of public and property at large. The workforce is required to be rigorously trained in the operation & maintenance of the specified on-track machines and its competency must be certified. Untrained & non-skilled operation shall lead to unforeseen risks & costs towards the maintenance of tracks and more specifically specialized ontrack machine. In this context, please appreciate that being a highly technical work with significance being placed on the technical aspect and safety of public at large, technical competency towards operation & maintenance of specific on-track machines (as specified in the tender documents) in Indian railway perspective in envisaged. Generalized on-track machines with totally varied parameters, specifications shall impair the specialized scope of works of the tender document. Accordingly, prior technical experience of tender on-track machines along with competency certificate for operation & maintenance of same is envisaged to ensure experienced & earnest participation." | |

B

Page 4 of 23

| | | Any work of Supply of ON-Track tamping machine(s) and it's spares for laying/maintenance of track in railway sector in any country of the world. | Please consider/ modify the clause requirement as below: Definition of Similar work shall mean: "Supply, Installation, Testing, Commissioning of similar on Track Tamping Machine. AND Operation & Maintenance of on Track Tamping Machine". Note: - The Contractor should have experience of Operation & Maintenance of Any Track Tamping Machine as given in Schedule for a minimum period of 03 (Three) months in Indian Railway Network including PSU's (Proof of the said quantum of work must be submitted). | |
|---|------------------------|---|--|------------|
| 2 | 4.1_ITB Page 23 of 211 | (c) Financial Eligibility Criteria: The Bidder must have minimum average annual contractual turnover of V/N crores. Where V= Advertised value of the tender in crores of Rupees N= Number of years prescribed for completion of work for which bids have been invited. The average annual contractual turnover shall be calculated as an average of "total contractual payments" in the previous three financial years, as per the audited balance sheet. However, in case balance sheet of the previous year is yet to be prepared/audited, the audited balance sheet of the fourth previous year shall be considered for calculating average annual contractual turnover. | It is understood that the scope of the works is extremely financial and therefore requires the tenderer's financial stability. This is to ensure efficient and timely execution of the operation and maintenance of the complex track machinery owned by DFCCIL. Since this is a long-term contract, financially sound and honest bidders are appreciated. Please consider/ modify the clause requirement as below: Financial Eligibility Criteria: The bidder must have received payments in the current financial year up to the date of publishing of bid on IREPS portal and previous five financial years, at least 150% of the advertised value of the tender. | No agreed. |

| 3 | 4.1_Note_ITB | (f) If a bidder has successfully completed a work as subcontractor and the work |

Please advise whether work experience certificate issued through Intermediate contractor by DFCCIL shall be recognize authentic or not.

The existing provision of 4.1 (f) of ITB will be changed as under:

(f) "If a bidder has successfully completed a work as subcontractor and the work experience certificate has been issued for such work to the subcontractor by a Govt. Organization of any country, the same shall be considered for the purpose of fulfillment of credentials. Work experience certificate from private individual shall not be considered. However, in addition to work experience certificates issued by any Govt. Organisation, work experience certificate issued by Public listed company having average annual turnover of Rs 500 crore and above in last 3 financial years excluding the current financial year, listed on National Stock Exchange or Bombay Stock or listed on top 20 foreign stock exchange or stock exchanges of OEM's country. incorporated/ registered at least 5 years prior to the date of closing of tender, shall also be considered provided the work experience certificate has been issued by a person authorized by the Public listed company to issue such certificates.

In case tenderer submits work experience certificate issued by public listed company, the tenderer shall also submit along with work experience certificate, the relevant copy of work order, bill of quantities, bill wise details of payment received duly certified by Chartered Accountant, TDS certificates for all payments received and copy of final/last bill paid by company in support of above work experience certificate."

PRE-BID QUERIES- TECHNICAL SPECIFICATION (Part-III, Section-D)

| SN | Clause No. & Page No. | Tender Condition | Tenderer's Queries | Clarification by DFCCIL |
|----|--------------------------|--|---|--|
| 1 | 2.14_TS Page 56 of 211 | During transfer from one station to another, it shall be capable of travelling on its own at speed of 80 kmph and a speed of 100 kmph when hauled in a train formation as last vehicle. Since the machine is likely to cover long distances on its own power, the travel drive system shall be robust to sustain these requirements during the life of the machine. The machine should be capable of hauling an 8-wheeler coach/Wagon (90 ton approximately) at the specified speed above and as specified in clause 2.12. | It is understood by this clause, that machine shall be capable of hauling 8-wheeler coach/wagon (90 ton approximately) at speed of 80 kmph. Our kind submission is that, please reduce this hauling speed to 50 Kmph as machine will not be capable to haul 90-ton load on the same speed at which it is capable of travelling. | The item 2.14 Technical Specifications will be modified as under: "During transfer from one station to another, it shall be capable of travelling on its own at speed of 80 kmph and a speed of 100 kmph when hauled in a train formation as last vehicle. Since the machine is likely to cover long distances on its own power, the travel drive system shall be robust to sustain these requirements during the life of the machine. The machine should be capable of hauling an 8-wheeler coach/Wagon (90 ton approximately) at the 60 Kmph speed and as specified in clause 2.12" |
| 2 | 3.5_TS Page 57 of 211 | Machine shall also be able to do lining and lifting without towering of any one or both tamping units. | Suggested Changes | The item 3.5 Technical Specifications will be modified as under: "The free length between the two bogies shall be long enough to permit the track lifting and lining up-to 150 mm in one go, with 60 kg rails on concrete sleepers, without excessive stresses in the rail or on the lifting mechanism. Machine shall also be able to do lining and lifting without lowering of any one or both tamping units." |
| 3 | 3.10_TS | The machine shall be capable of carrying out on plain track, automatic lifting, levelling, tamping and lining of 1000 sleepers or more in an hour of working. While tamping turnouts, it shall be capable of tamping one 1 in 12 turnouts on PSC sleeper, complete with 10 sleepers on plain portion on the approaches of the turnouts in an hour of working at the following tamping parameters: | The specification indicates that the introduced machine will be able to tamp all four rails of the switch up to the back of the crossing. It is also known that the switch structure of DFCCIL is also different and longer than the switch structure of railways. Taking all these technical aspects into account, it is recommended that no single tie tamping machine shall be capable of tamping a 1 in 12 turnouts of more than 42-meter length on PSC sleeper complete with | The item 3.10 TS will be modified as under: "The machine shall be capable of carrying out on plain track, automatic lifting, levelling, tamping and lining of 1000 sleepers or more in an hour of working. While tamping turnouts, it shall be capable of tamping one 1 in 12 turnouts on PSC sleeper, complete with 10 sleepers on plain portion on the approaches of the turnouts |

| Page 59 of 211 s i | | Please be informed that the required feature is not a standard feature for similar machines. Request you to please relook into it as this has major cost implication. IP based cameras will not work in remote areas and are also not necessary as all working parameters and the status of machine can be seen in the system prescribed under 3.23. The usage of such | |
|---------------------------------------|---|--|-------------|
| Page 59 of 211 c | closely from anywhere in the country from any location, suitable number of IP based cameras are to be installed. The camera shall be fixed on machine at such location | areas and are also not necessary as all working parameters and the status of machine can be seen in the system | Not agreed. |
| t t t t t t t t t t t t t t t t t t t | that the live video of the important working units of machine which are working on track, location of worksite and post-work track can be seen by the authorized person with commonly used browsers in India over the internet. Camera shall be password protected and be decentralized, IP based. It shall have recording function built-in and thus can record directly to any standard storage media, such as SD cards. We are requesting to delete this clause. | |
| Page 58 of 211 | The machine should be equipped with a centralized computer-based control and monitoring system which shall monitor the health of machine working system such as engine (lubricant oil pressure, temperature, rpm with engine running hours etc.), hydraulics (hydraulic pressure in different units, temperature, oil level in tank etc), pneumatic (pressure of different units), electrical (charging/discharging rate, | The parameter list as such is not defined to 100%. If some of them are fixed and the word "etc" is mentioned, there is room for ambiguity and unwanted discussions. The total list has to be defined in advance and make part of the technical description. We also assume that the technical solution shall be used as a fleet management tool and to provide MIS for the operation team to understand the maintenance condition, | |

| | | voltage etc.). There shall be provision of recording and logging of machine working hours and such gauge shall also be displayed on the monitor of the computer installed in operator cabin. All these data should be displayed on a monitor installed in working cabin and there shall be facility to store these data for 100 engine running hours. Minimum storage of 500 GB shall be available for this purpose. Arrangement for providing 4G/5G internet connection for sending data in soft format directly from the computer shall also be available for storage of recorded data. It should also have facility to interface with Human Machine Interference (HMI)/Display and various other sensors. The data transfer unit should be compatible with the Track Management System (TMS) of DFCCIL. |
|---|---------|--|
| 7 | 3.25_TS | The machine shall be equipped with GPS |

to monitor the performance of each machine with deviations becoming visible in RED. The Dashboard shall ensure a comprehensive view of whole fleet and highlights machines requiring attention. These whole data shall be stored in a cloud based software interlinked with TMS, the linking to be done by DFCCIL. The machine shall be equipped with GPS, GSM/GPRS based remote monitoring capabilities for various track parameters and vital parameters of track machine. It shall also have facility to interface with Human Machine Interference (HMI)/Display and various other sensors. The Software shall be made available for 10 year incl. all required maintenance activities and updates. The SIM to be provided by DFCCIL on FOC base to manufacturer of the machine before inspection so that commissioning of machine is hampered. Request to modify the clause accordingly for clarity.

The clause 3.25 of Technical Specifications will be modified as under:

Page 60 o

Page 60 of 211

The machine shall be equipped with GPS, GSM/GPRS based remote monitoring capabilities for various track parameters and vital parameters of track machine. It shall also have facility to interface with Human Machine Interference (HMI)/Display and various other sensors. The data transfer unit shall be compatible with the Track Management System (TMS) of DFCCIL.

The parameter list as such is not defined to 100%. There is room for ambiguity and unwanted discussions. The total list has to be defined in advance and make part of the technical description. We also assume that the technical solution shall be used as a fleet management tool and to provide MIS for the operation team to understand the maintenance condition, to monitor the performance of each machine with deviations becoming visible in RED. The Dashboard shall ensure a comprehensive view of whole fleet and highlights machines requiring attention. These whole data shall be stored in a cloud based software interlinked with TMS, the linking to be done

"For fleet management and to provide MIS for the operation team to understand the maintenance condition and to monitor the performance of machine, a Dashboard system is needed to monitor comprehensive view of whole fleet and highlights machine parameters requiring attention and on deviated parameter shall become red on dashboard. For the same machine shall be equipped with GPS, GSM/GPRS based remote monitorina capabilities for various track parameters and vital parameters of track machine. It shall also

| | | | by DFCCIL. The machine shall be equipped with GPS, GSM/GPRS based remote monitoring capabilities for various track parameters and vital parameters of track machine. It shall also have facility to interface with Human Machine Interference (HMI)/Display and various other sensors. The Software shall be made available for 10 year incl. all required maintenance activities and updates. The SIM to be provided by DFCCIL on FOC base to manufacturer of the machine before inspection so that commissioning of machine is not hampered. Request to modify the clause accordingly for clarity. | have facility to interface with Human Machine Interference (HMI)/Display and various other sensors. The data transfer unit shall be compatible with the Track Management System (TMS) of DFCCIL." |

| | | no extension of time shall be granted without LD. | kind submission is that all these should be in the scope of DFCCIL. However, supplier shall provide required documents, drawings etc. for RDSO speed certifications of supplied track machines on DFCCIL including CRS sanction prior to operationalization of the supplied track machines. | 23.1 "Provisional Speed Certificate: Whenever a new rolling stock is introduced in DFCCIL, a provisional speed certificate is issued by RDSO of Indian Railways based at Lucknow, based on certain design parameters of the machine. The final speed certificate of the machine is given after conducting detailed oscillation trial of the machine, which is a time taking process. Therefore, issue of provisional speed certificate for the machine becomes a necessity and based on the same the approval of |
| | | | 22 | based on the same, the approval of running of the machine on DFCCIL track is taken from CCRS/MD(DFCCIL). For issue of provisional speed certificate, the following actions are required to be taken by the contractors: |
| | | | | a) Current suppliers, whose models are approved: The contractor shall give details of the model, year of introduction in Indian Railways, details of speed certificate issued etc. The OEM and Contractor shall certify that no change has taken place in the model being offered with respect to design of under frame i.e. suspension system/arrangement, wheel & axle assembly, bogie, braking arrangement, loading pattern of the machine etc. and the distribution of axle loads, lateral forces, unsprung mass and braking force coming on rails is the same. If, there is any change in above respect, the action shall be taken as detailed in para (b) below: |
| | | | | An |

| | | b) Current suppliers, whose models are not approved/or new: As soon as the contractor completes the design of the machine as per specifications, the technical details as per Annexure (TS8A and TS8B) which in no case shall be more than 9 (nine) months from signing of contract, shall be supplied to DFCCIL, for processing of provisional speed certificate for the machine so that it can be permitted to move on track on case-to case basis. More technical details (other than mentioned in Annexure (TS8A and TS8B) can also be asked for issue of provisional speed certificate for the machine. The firm will also submit the technical details as per pro-forma placed at Annexure-TS2 for track vehicle dynamic simulation. The contractor shall submit the track vehicle simulation report. |
|--|--|---|
| | | c) New suppliers, whose models are new: The technical details shall be supplied as detailed in clause (b) above. |
| | | 23.2 FINAL SPEED CERTIFICATE: Final speed certificate of the machine is given after conducting detailed oscillation trials of the machine. For this purpose, DFCCIL shall conduct running speed tests on the DFCCIL main line track on one of the machines supplied to them preferably with in warranty, in accordance with procedure outlined in Annexure-TS9 with the machine running up-to speed 10% higher than the maximum speed mentioned in clause 2.14 above." |

PRE-BID QUERIES- SCC (O&M) (Part-IV, Section-F)

| SN | Clause No. & Page No. | Tender Condition | Tenderer's Queries | Clarification by DFCCIL |
|----|---------------------------------------|--|--|---|
| 1 | 1.1_SCC _O&M Page 110 of 211 | The Scope includes operation and maintenance work of machine be outsourced for a period of Twelve years after commissioning of machines. The period of 144 months shall be counted from date of commissioning of each machine. | It is understood that Track Machine being a very specialized sector requires experienced personnel for operations even during the commissioning period and it is not possible for DFCCIL to recruit/deploy experienced personnel for such a short period only. Please clarify the scope of obligations during the commissioning period of the machine. | A new clause numbered 15.0 in SCC during Delivery and Commissioning phase will be added as under: 15.0 "All expenditure (except cost of HSD) related to operation and Maintenance of machine (including manpower) required during Commissioning period of individual Machines are included in scope of SOR item No.1." |
| 2 | 1.5_SCC _O&M Page 111 of 211 | (a) Contractor's obligations: iii) Ensuring availability of Track machine for tamping for 25 days in month. The time consumed in Maintaining the machine as per 1000 Hrs, IOH and POH will be considered as availability for purpose of counting 25 days. | Any kind of schedule maintenance mentioned in maintenance manual as well as in latest IRTMM are integral parts of operation and maintenance and it shall not be excluded from availability of machine except daily maintenance. Hence it is requested to kindly amend this clause. Please consider/ modify the clause requirement as below: Ensuring availability of Track machine for tamping for 25 days in month. The time consumed in Maintaining the machine as per weekly, 50 Hrs, 100 Hrs, 200/250 Hrs, 1000 Hrs, IOH and POH will be considered as availability for purpose of counting 25 days. | The clause 1.5 (a) iii) of SCC O&M phase will be modified as under: iii) "Ensuring availability of Track machine for tamping for 25 days in month. The time consumed in Maintaining the machine as per 1000 Hrs, IOH and POH schedules will be considered as availability for purpose of counting 25 days." |
| 3 | 1.6.7_SC C_ O&M | 1.6.7 The Contractor shall provide adequate and appropriate security at their disposal to protect and preserve the Machine from antisocial during working and stabling of machine in DFCCIL yard from time to time. Contractor | Clause of hypothecation by DFCCIL will provide security to the machine fleet. General security of the fleet will be in the contractor's scope, however since the machines will be working on remote location, locations prone to disruptions by third parties & unsocial | The clause 1.6.7 of SCC O & M phase will be modified as under: 1.6.7 "The Contractor shall provide adequate and appropriate security at their disposal to |

8

| | Page 114 of 211 | has to ensure 24X7 safety and security of machines during complete O & M phase. | elements –foreseeable risk to the contractor's machine & equipment is a likely event. In order to mitigate such kind of risk, it is requested that the machines being used for DFCCIL work to be hypothecated by DFCCIL, which in-turn also gives leverage to the DFCCIL for overall management of the contract and safeguarding the assets. | protect and preserve the Machine from anti- social during working and stabling of machine in DFCCIL yard from time to time. Contractor has to ensure 24X7 safety and security of machines during complete O & M phase. If, contractor have procured any insurance for safety and security of Machines, then it will be reimbursed to contractor on actual cost basis for which contractor has to submit the Machine insurance invoice copy." |
|---|--|--|--|---|
| 4 | 1.6.10_S CC_ O&M Page 114 of 211 | 1.6.10 All tools and plants, drawings, manuals which are supplied by the DFCCIL are to be handed over back in good condition after expiry of the contract period to authorized DFFCIL unit. | It is never possible to handover back each and everything to DFCCIL in good condition after completion of 12 years of contract. So it is requested to please amend/delete this clause as every items has its own shelf life and it also dissipates as the time passes. | The clause 1.6.10 of SCC O & M phase will be modified as under: 1.6.10 "The machine in good working condition without over due schedule of 100 Hrs, 200/250 Hrs, 1000 Hrs, IOH and POH shall be handed over back to DFCCIL after expiry of the contract period, otherwise cost of over due schedule will be recovered from payment due to Contractor." |
| 5 | 1.6.16_S CC_ O&M | 1.6.16 One 4-wheeler vehicle in good condition with proper road permit and insurance (Safari/ Scorpio or similar) for transporting men and material required for day to day working will be provided by contractor during O & M period for use by O & M crew and DFCCIL Inspectors (on machine) without any extra payment. | Kindly clarify that who shall be responsible to bear fuel cost 4-wheeler vehicle. | The clause 1.6.16 of SCC O & M phase will be modified as under: 1.6.16 "One 4-wheeler vehicle in good condition with proper road permit and insurance for transporting men and material required for day to day working will be provided by contractor during O & M period for use by O & M crew (on machine) without any extra payment. The cost of fuel required for 4 wheeler has to be borne by contractor himself." |
| 7 | 1.7.1_SC C_ O&M Page 115 of 211 | 1.7.1 All Workshop facilities to be arranged by contractor including repair of under frame system and for wheel turning. | As repair of underframe and wheel frame required permanent setup of pit and wheel lathe respectively, these are not possible for supplier/contractor to arrange these permanent setups only for four machines. So, it is requested to please incorporate all these obligations in the scope of DFCCIL. | The clause 1.7.1 of SCC O & M phase will be modified as under: 1.7.1 "All Workshop facilities to be arranged by contractor including repair of under frame system and for wheel turning. In case this contractor request DFFCIL to arrange the same from IR, then if possible, for DFC it will |

| | | | | be arranged by DFCCIL on the cost of contractor. The Pit facility will be provided by DFCCIL free of cost at New Dadri or any other station of DFC." |
|----|---|---|---|---|
| 8 | 1.7.3_SC C_O&M Page 115 of 211 | 1.7.3 Daily maintenance will be done before start of Machine operations. Other schedule maintenance (weekly, 50 Hrs, 100 Hrs, 200/250 Hrs, 1000 Hrs, IOH (2000 Hrs) and POH are to be performed at appropriate time intervals in the balance time available after offering the machine for operational activities. 8 Hrs working time does not include time required daily routine maintenance activities. | It is well known that except daily schedule maintenance all other maintenance mentioned like IOH, POH is not possible to perform in balance time available after offering the machine. Hence, it is requested to kindly delete this clause. | The clause 1.7.3 of SCC O & M phase will be modified as under: 1.7.3 "Daily maintenance will be done before start of Machine operations. The weekly, 50 Hrs, 100 Hrs, 200/250 Hrs Schedule maintenance are to be performed at appropriate time intervals in the balance time available after offering the machine for operational activities. 8 Hrs working time does not include time required daily routine maintenance activities." |
| 9 | 1.7.9_SC C_O&M Page 116 of 211 | 1.7.9 Contractors is allowed to use existing infrastructure including pit at DFCCIL Track Machine Maintenance Depots facility free of cost, if available. | It is our kind submission that availability of pit shall ensure by DFCCIL free of cost by any means. | The clause 1.7.9 of SCC O & M phase will be modified as under: 1.7.9 "Contractors is allowed to use DFCCIL Track Machine Maintenance infrastructure available at free of cost, if it is free when contractor needs the same." |
| 10 | 1.8.4_SC C_O&M Page 116 of 211 | 1.8.4 The contractor shall complete a standard daily report accurately depicting operational times, delays, reasons for 'NO work', machine availability, progress achieved by each track machine and track labour. DFCCIL representatives will also sign this report on a daily basis. In case of difference of opinion, he will write his observations on the daily report submitted by the contractor for his signature. The signed joint daily report shall be the basis for invoicing and shall constitute DFCCIL's acceptance of day-to-day work apart from the completion of scheduled maintenance in timely manner. Daily progress and history shall be mailed to the nominated DFCCIL | It is our kind submission to please define the acceptance criteria of output delivered by machine to avoid any dispute during currency of contract. | The clause 1.8.4 of SCC O & M phase will be modified as under: 1.8.4 "The contractor shall compile and submit a standard daily report accurately depicting operational timings, delays, reasons for 'NO work', machine availability, progress achieved by each track machine and maintenance input given to machine. DFCCIL representatives will also sign this report on a daily basis. In case of difference of opinion, he will write his observations on the daily report submitted by the contractor for his signature. The signed joint daily report shall be the basis for invoicing and shall constitute DFCCIL's acceptance of day-to-day work apart from the completion of |

| | | official/s along with weekly and monthly progress reports in the prescribed format. | | scheduled maintenance in timely manner. Daily progress and history shall be mailed to the nominated DFCCIL official/s along with weekly and monthly progress reports in the prescribed format. The output during actual tamping timing shall not be less than 90%(individual block) and 95% (on monthly average) of rated output indicated by OEM of Machine." |
|----|--|---|--|--|
| 11 | 1.10_SC C_O&M Page 117 of 211 | CONSUMPTION OF HSD OIL BY MACHNIE 1.10 HSD oil for track machine working will be supplied by DFCCIL. However, actual consumption of HSD oils should not be more than 2.5% w.r.t. rated HSD requirement per hours. | Consumption of HSD oil always depends on machine idle, working and running time as well as machine rpm. Hence it is not possible to figure out that consumption of HSD is more or less than 2.5% w.r.t. rated HSD requirement per hour. So, it is requested to please delete this clause. Kindly consider that opening and closing of HSD shall jointly signed by DFCCIL engineer and contractor's supervisor on daily basis for the purpose of recording consumption of HSD. | The clause 1.10 of SCC O & M phase will be modified as under: 1.10 "HSD oil for track machine working will be supplied by DFCCIL. However, actual consumption of HSD oils should not be more than 5% (individual day) and 2.5% (on monthly average) of rated HSD requirement per hours by OEM. If this limits shoots, then contractor has to do engine overhaling even if not due as per schedule in order to bring the HSD consumption with prescribed limits mentioned above in this clause." |
| 12 | 1.15.1_S CC_O&M Page 119 of 211 | 1.15.1 For overall supervision, control and management of track machines and work, contractor shall deploy one qualified graduate engineer having Degree in Civil engineering/Mechanical/Electrical/Industrial engineering along with overall working experience of 3 years. If contractor is not able to initially deploy the qualified supervisor as above, or provide a replacement within 15 days, a penalty of Rs. 2,00,000/- per month (for part of month- on prorata basis) per supervisor duly updated for PVC applicable for item No. 2/4 of SOR as per item No. 9.7.3 of ITB or part thereof will be imposed. Dy.CPM/DFCCIL is also empowered to stop the work with associated penalties under situation of shortage of qualified track supervisor/s. | For overall supervision, control and management of track machines and work, contractor shall deploy one qualified graduate engineer having Degree in Civil engineering/Mechanical/Electrical/Industrial engineering along with overall working experience of 3 years is contradictory to clause 1.5 of SCC/O&M which already demands 01 supervisor for each machine. Kindly clarify. | The clause 1.15.1 of SCC O & M phase will be modified as under: 1.15.1 "For overall supervision, control and management of all 4 track machines and contract, contractor shall deploy one qualified graduate engineer having Degree in Civil engineering/Mechanical/Electrical/Industrial engineering along with overall working experience of 3 years. If contractor is not able to initially deploy the qualified supervisor as above, or provide a replacement within 15 days, a penalty of Rs. 2,00,000/- per month (for part of month- on prorata basis) per supervisor duly updated for PVC applicable for item No. 2/4 of SOR as per item No. 9.7.3 of ITB or part thereof will be imposed. Dy.CPM/DFCCIL is also empowered to stop the work with associated |

| 14 | 1.20_SC C_O&M Page 121 of 211 | Siding 1.20 Only siding track for stabling, repair and maintenance of the track machine shall be provided by the DFCCIL free of charge. The arrangements for security shall be made by the Contractor at his own expenses. Water supply arrangements may be made by contractor at his own cost and if connection will be provided by DFCCIL a lump sum charge of Rs. 5,000/- will be taken per month. The electricity charges as per actual meter readings as per applicable rates of State Electricity Board will be borne and paid by contractor in case DFCCIL power is being utilized. | Charges of Rs 5000/- is too high, so our kind submission is that please amend this clause. Please consider/ modify the clause requirement as below: The siding for stabling, repair and maintenance of the track machine shall be provided by the DFCCIL free of charge. Water supply connection will be provided by DFCCIL, at lump sum charge of Rs. 1,000/-per month. Metered electricity connection will be provided by DFCCIL, and electricity charges as per applicable rates of State Electricity Board will be borne and paid by contractor. | penalties under situation of shortage of qualified track supervisor/s." The clause 1.20 of SCC O & M phase will be modified as under: 1.20 "Only siding track for stabling, repair and maintenance of the track machine shall be provided by the DFCCIL free of charge. The arrangements for security shall be made by the Contractor at his own expenses. Water supply arrangements may be made by contractor at his own cost and if connection will be provided by DFCCIL a lump sum charge of Rs. 1,000/- will be taken per month. The electricity charges as per actual meter readings as per applicable rates of State Electricity Board will be borne and paid by contractor in case DFCCIL power is being utilized." |
|----|--|--|--|---|
| 15 | 1.21_SC C_O&M Page 121 of 211 | 1.21 Storage for spare parts: Contractor should make his own arrangements for storage of spare parts, materials etc. at his own cost. A open space of size 250 sqft (approx.) will be provided for storage of spares at nearest IMD/IMSD free of cost. | Spare parts and material involve a major part of contract cost and are very important for efficient, effective, and timely operation and maintenance of machines. Keeping these aspects, it is requested to DFCCIL to provide sufficient covered space free of cost for storage of spare parts and materials. | The clause 1.21 of SCC O & M phase will be modified as under: "Storage for spare parts: Contractor should make his own arrangements for transportation and adequate storage of spare parts, materials etc. at his own cost." |

| 16 | 1.22.1_S CC_O&M Page 121 of 211 | Accommodation of staff: Accommodation of the staff shall be arranged by the Contractor at his own cost. Contractor may purchase and provide camp coaches with bio-toilets as per RDSO drawing no RDSO/TM/01/11 for accommodation of staff. Such camp coaches, will be stabled in the track machine siding/any other siding in same yard, for which no charge will be levied by DFCCIL. Contractor will also maintain and keep the camp coaches track worthy as per Railway rules. | It is our kind submission to please incorporate provision of camping coaches in the scope of DFCCIL and amend the exiting clause. Please consider/ modify the clause requirement as below: For accommodation of the contractor's machine staff, DFCCIL shall provide refurbished camp coaches with bio-toilets & generator as per RDSO drawing no RDSO/TM/01/11 for accommodation of staff. Such camp coaches will be stabled in the track machine siding/any other siding in same yard, for which no charge will be levied by Railways. The contractor will also maintain and keep the camp coaches track worthy as per railway rules. He is also permitted to improve the furnishings in the camp coaches. IOH/POH of the camping coaches will be done by Railway free of cost. Charges for providing electricity, water, fuel, consumables etc. shall be borne by the contractor. | Not agreed. |
|----|--|---|---|---|
| 17 | 1.26.1_S CC_O&M Page 122 of 211 | the contractor shall provide flagman or look out men for protection of such persons | This is contradiction to clause 1.17 of SCC/O&M which already says that "Necessary safety staff/look out men/hand signal men/hooter men etc. will be provided by the DFCCIL" itself. | · · · · · · · · · · · · · · · · · · · |
| 18 | 1.29.1_S CC_O&M Page 123 of 211 | In case contractor is shifting machine for IOH, all transit expenses are to be born by contractor including cost of HSD. The time taken for shifting of machine for IOH/POH on DFCCIL/IR network will be considered as free time. | Machine working location is always subject to DFCCIL instruction and scope of work. It is not possible to assume distance for the purpose of HSD consumption from workshop where IOH/POH being conducted. Hence it is requested that in case contractor is shifting machine for IOH, all transit expenses are to be born by contractor excluding cost of HSD. | |
| 19 | 1.28.2_S CC_O&M | 1.28.2 In case DFCCIL is shifting machine form one section to other section of DFCCIL, all transit expenses are to be born by DFCCIL. | It is understood that the time taken for shifting of machine from one section to another section is completely dependent on track | The clause 1.28.2 of SCC O & M phase will be modified as under: |

| | Page 123 of 211 | The time taken for shifting of machine will be considered as free time. | clearance arranged by DFCCIL. Hence it shall be considered as availability for the purpose of counting 25 days rather than considering free time. | 1.28.2 "In case DFCCIL is shifting machine from one section to other section of DFCCIL, all transit expenses are to be borne by DFCCIL. The days taken for shifting of machine will be considered as availability for the purpose of counting 25 days." |
|----|--|--|---|---|
| 20 | 1.30.3_S CC_O&M Page 124 of 211 | 1.30.3 During the period of Warranty the Contractor shall be liable for the replacement of any part at site, of any parts supplied by the Contractor which may be found defective of his own manufacture or those of his subcontractor / supplier whether arising from faulty materials, workmanship or negligence in any manner on the part of the Contractor provided always that such defective parts as are not repairable at site are promptly returned to the Contractor if so required by him at his (Contractor's) own expenses. In case of parts of executed work detected faulty/not as per specifications during guarantee period, contractor should replace all such items irrespective of the fact whether all such items have failed or not. The Contractor shall bear the cost of repairs carried out on his behalf by the Employer at site. In such a case, the contractor shall be informed in advance of the works proposed to be carried out by the | We request DFCCIL to remove this clause as the warranty conditions are already mentioned in the technical specification of the machine. | The complete existing clause 1.30 of SCC O&M phase is proposed for deletion and new clause will be as under: 1.30 Warrantee / Defect Liability Period "Since the DFCCIL is paying the material cost vide item No. 3/5 on lumpsum basis, so the Defect liability clause will not be applicable beyond 2 years of commissioning subjected to clause No. 1.6.10 of SCC O & M phase." |
