## **SECTION - 4**

### **SCOPE OF WORK**

## **SECTION – 4**

### **SCOPE OF WORK**

#### **4.1 Background and General Information**

Railway lines connecting the four metropolitan cities of Delhi, Mumbai, Chennai and Kolkata are termed as “Golden Quadrilateral & its Diagonal” (GQD), which comprise only 16% of route length, but carries more than 58% of total freight traffic carried over IR. In 2006, Government of India (GOI) established the Dedicated Freight Corridor Corporation of India (DFCCIL) under the Companies Act of 1956, as a Special Purpose Vehicle, wholly owned by the Ministry of Railways (MOR), with mandate to build and operate Dedicated Freight Corridors (Eastern and Western Corridors). Two dedicated freight corridors are presently under construction namely Eastern Corridor (EDFC) from Sahnewal to Sonnagar, and Western Corridor (WDFC) from Dadri to Jawaharlal Nehru Port Terminals (Mumbai) with route Kms of more than 2800 kms are in advanced stage of construction and these corridors will be partially commissioned shortly. Further, two more corridors viz. East Coast Corridor and East West Corridors have been sanctioned for traffic survey. On EDFC the section of New Sahnewal- New Sonnagar is planned to be further extended upto New Dankuni through PPP mode for which tendering process is in progress. The DFCCIL corridors will be immensely enriched rail corridors on account of heavier axle load feature, larger moving dimensions, higher speed, higher throughput capabilities and enhanced safety elements inbuilt into the system.

New Khurja to New Bhaupur section of EDFC has been commissioned and dedicated to the Nation by the Hon’ble Prime Minister on 29.12.2020 and New Rewari to Madar section of WDFC has been commissioned and dedicated to the Nation by the Hon’ble Prime Minister on 07.01.2021. New Rewari to New Palanpur section of WDFC will be operational by March, 2021.

DFC envisages to launch customized transportation products on these sections and further on new upcoming sections. One of such segments will be focused on non-conventional rail transportation products on the above new section of New Rewari- New Palanpur, which will be operated and managed by selected business partners of DFC.

Pursuant to Mandate given by the Railway Board Vide Letter no-TCR/1078/2020/RO-RO/DFCCIL/3333602 dated 15-01-2021, DFCCIL proposes to operate RORO trains between New Palanpur and New Rewari. In this product segment, loaded and empty trucks can be carried on flat rail wagons provided by DFC, which will enable door to door service piggyback on fast and safe movement assured by DFC. These wagons will be modified for safe carriage of trucks in which trucks will be properly secured on the top of flat wagons. On WDFC, trucks with high payload can be easily carried on flats owing to higher and wider moving dimensions’ clearance available in the section.

#### **4.2 Objectives for RO-RO Service**

4.2.1 The high speed Dedicated Freight Corridor enables Indian Railways to regain its market share of freight transport by creating additional capacity and guaranteeing efficient, reliable, safe and cheaper options for mobility to freight customers.

Presently, the transportation cost of road transport is very high due to high cost of fuel, road tolls and wages of drivers. On the other hand DFCCIL will bring down the transportation cost of rail transport owing to higher axle load, speedier transport and long haul trains. DFCCIL can complement the road transport with its cheaper cost of transportation. With this objective, the concept of Roll On Roll Off (RO-RO) is planned to be implemented over DFCCIL. RO-RO means carrying loaded/ empty trucks on Flat Railway Wagons. This concept will reduce the transportation time and cost for road trucks, drastically. It will help DFCCIL to attract the new traffic of road truckers to rail. Advantage of RO-RO service will be as under :

- Providing Door to Door service to the rail customers for very long leads.
- Elimination of multiple handling
- Carriage of road trucks will reduce carbon footprints (air pollution) and noise pollution.
- Saving diesel fuel will save the country's import bill.
- Less congestion on roads, public safety, faster movement, reduction in inventory cost.
- Less wear and tear of the trucks and improved working life of the trucks.
- Proper rest to the driver and attendant and better quality time to them.

4.2.2. New Palanpur to New Rewari section of WDFC will be commissioned very shortly (March-April) for which the construction work is at final stage. New Palanpur will serve the traffic originated from the industrial hubs of Ahmedabad, Vadodara, Bhuj, Mundra, Kandla, Ghandhidham and Surat. On the other hand, New Rewari will serve the traffic originated from the industrial hubs of Delhi NCR, Agra, Ludhiana, Haridwar and Rudrapur.

4.2.3 **Reserve Price** : The Sole Rights for marketing and operating RORO trains on the given circuit will be awarded based on open tenders in which Reserve Price/minimum Freight Charge [for the operation of one 45 BRN Rake, from New Palanpur Jn. [PNUN] to New Rewari Jn. [REJN] and New Rewari Jn. [REJN] to New Palanpur Jn. [PNUN] -WDFC Section of 636 Route Km each direction here after, also referred to as the 'Circuit'] will be Rs. 9,00,000/- (Rupees Nine lakhs). Eligible Bidders offering maximum freight charge over and above the aforesaid Reserve Price in their financial offer (format at Annexure - 5) will be awarded the sole rights for operation of RO-RO service. No other RORO train will be run on the circuit by any other operator as the selected Business Partner will have the sole right to run RORO trains on the given circuit.
