Any exposure of the aptitude test and answer key to the applicant would be tantamount to leakage of the answer key of the aptitude test, which could be misutilised rendering future selection almost impossible.

The formula to calculate T-score is:

$$T = 50 + 10 \left(\frac{x - \text{Mean}}{SD} \right), \text{ (where } x \text{ is candidate's score in the test and } SD \text{ is Standard Deviation)}$$
