Arrangements for controlling Air Pollution.

14. Mitigation Measures for Ambient Air Quality

1. Pre Construction / preparatory Phase: The dust generation due to pre-construction activities shall be temporary in nature and localized and shall be effectively countered by sprinkling of water wherever required.
2. Construction Phase: Contractor shall undertake following e specific measures regarding this aspect:-
 - a) Locating plant at a significant distance from nearest human settlement in the predominant down wind direction.
 - b) Vehicles delivering fine materials like soil and fine aggregates may be covered to reduce spills on existing roads.
 - c) Water shall be sprayed on earthworks, temporary haulage and diversions on a regular basis.
 - d) Batch type hot mix plants fitted with the bag filter / cyclone and scrubber shall be installed for the reduction of the air pollution.
 - e) Hot mix plant and crushers shall be located at least 1 km from habitations and in down wind direction.
 - f) Pollution control systems like water sprinkling and dust extractors and cover on conveyors shall be installed for the crushers.
 - g) All vehicles, equipment and machinery used for construction shall be regularly maintained to ensure that the emission levels conform to the SPCB/CPCB norms.
 - h) Air pollution monitoring plan has been delineated for construction phase separately for checking the effectiveness of the mitigation/measure shall be adopted during the construction phase of the Contract
